## Get Educated on Laser Hair Removal at Sherlase

"Not all laser hair removal systems and clinics are created equal," says Sheri Kurtz, owner of the Sherlase Clinic, Markham.

"The consumer needs a great deal of information before selecting a laser hair removal program and clinic. Unwanted hair is a big problem for men, women and teens. The correct laser and the expertise of the technician ensure the success of each treatment."

Sheri has over eight years experience removing unwanted hair and takes pride in educating her clientele. "Consultation is a must. People just don't know all there is to know about laser hair removal and there is a lot of misinformation out there. I feel it is my responsibility to offer clients a free consultation to inform them about the procedure for their individual needs," says Sheri.

"Skin types, amount and location of hair, partially determine the treatment plan. Many Middle Eastern, Asian and dark skinned people have attained excellent results. Tanned people can also consider these laser treatments because the laser bypasses the epidermis and directly affects the hair follicles."

The Coolglide is a FDA approved laser with enough power to eradicate hundreds of hair follicles at once making this a fast, efficient laser.

At Sherlase Clinic the professionals provide the most current technology available. Consultations are always confidential and free of charge.

As well as laser hair removal, the clinic offers an extensive range of advanced medical esthetics.

The Sherlase Clinic is located on the southeast corner of Markham Rd. and Sixteenth Ave.

## Tomorrow's Drivers your journey to a safer future

In 1994, the Ontario government introduced the graduated licensing program for first time drivers. During the past eight years, auto-related personal injuries have dropped by 24 per cent, the number of auto collisions has dropped by 31 per cent, and many experts have deemed the program a success.

While these lower injury and collision statistics are impressive, unfortunately there are still too many bad drivers on the roads today. Also, too many students do not receive adequate driving instruction before they get behind the wheel.

"A majority of driver education courses offer the Ministry-approved driving course for a very low price," says Shawn Kahn, executive director of Tomorrow's Drivers. "But many of these courses fail to provide the kind of comprehensive instruction that students need to become safe drivers."

Tomorrow's Drivers offers a comprehensive driving education program aimed at developing safe drivers for life. Whether you're an experienced driver who would like to upgrade your driving skills, or a beginning driver who wants to learn the proper way to drive, Tomorrow's Drivers wants to hear from you.

Tomorrow's Drivers offers a Ministry-approved beginner driver education course that includes 25 hours of in-class instruction with low student-teacher ratio, and eleven hours of one-on-one, in-car hands-on training. They also provide a workbook for students that can be used for future reference. "We specialize in training the young, newly licensed and/or nervous drivers," says Mr. Kahn. "Our mission is to develop smart, safe and sure drivers."

A large percentage of fatal auto accidents are due to driver inexperience, impulsiveness, poor judgment by drivers, and distractions by passengers. At Tomorrow's Drivers, young drivers learn valuable driving skills, and they develop

the skills and the confidence to handle a vehicle under various driving conditions.

"Knowledge is the first step to becoming a better driver," says Mr. Kahn. "Studies have shown that understanding the risks of driving, and one's own limitations, can prevent crashes. We teach students how to scan the environment and to sharpen their critical risk management skills."

Tomorrow's Drivers works with drivers from the time they obtain their learning license until they are fully licensed. "We make it our responsibility to make sure that all students receive excellent theoretical and practical instruction," says Mr. Kahn. "We also pick students up and drop them off, book the road test, and provide a car if required."

Mr. Kahn believes that anyone can learn to drive. "But learning to drive well requires a dedicated approach to driver education," he says. "We want to teach drivers to drive the correct way to ensure their safety on the road. We are a school that believes in making a safer future by training tomorrow's drivers today. I can't stress enough to parents that driver education is an 'investment' in their child's future, and I urge them not to compromise their child's safety. Their future is in your hands."

Tomorrow's Drivers offers a free Aim-High Seminar for a student's parent or partner so that they can learn what is being taught during the course.

Upon graduation, students who pass both the written test with a score of 90% or more and the MT drivers test on their first attempt, will be awarded a unique gift. They will also receive a coupon for \$25 off preparation for the G2 exit test.

Tomorrow's Drivers is located at  
445 Apple Creek Blvd. in Markham.  
They can be reached at 905-940-9972.
