## Sandy's Auto Service Ltd. The Home of the Doctor ... A family business since 1975!

If you've never taken your car to Sandy's Auto Service Ltd., then the next time you need service or have a problem, go see Sandy and find out why he has earned the nickname, "The Doctor."

In fact, Sandy is now serving second generation clients! A family business since 1975, customers who used to see Sandy with their bikes are now bringing in their vehicles for servicing. It's that kind of loyalty "The Doctor" has built up over the past 27 years with his customers!

Modern vehicles today are equipped with numerous sensors and on-board computers to enhance safety and operating efficiency. Poor driveability and performance are often the result of a computer sensor that has become faulty over time and distance travelled.

Diagnosing problems in modern vehicles has become more challenging as many problems are intermittent, making them difficult to pinpoint. This is where the experienced and knowledgeable technicians at Sandy's Auto Service make use of the latest diagnostic tools and on-going training.

Sandy is certified by the National Institute for Automotive Service Excellence (ASE).

If you're having problems with your vehicle this summer or fall and are thinking of taking a long trip, owner Sandy Devitt and the staff can troubleshoot and correct problems on your specific model, before they become a major problem. They can also provide routine inspections and maintenance to help your vehicle last longer.

Since 1975, all their work at Sandy's Auto Service has been done "as necessary." That means that each repair is evaluated as to the

nature and extent of damage. You will be presented with as many options as possible to resolve any problem that you may have.

And, Sandy's Auto Service uses quality parts that meet or exceed your vehicle's original performance specifications.

Whether it's domestic or import, Sandy's Auto Service can provide tune-ups and diagnostics with computer print-out when requested.

Some of the many other expert services offered include 4 wheel disc and ABS brake repair, fuel injection, shocks/struts, exhaust, front end, lube-oil-filter, and MOT safety inspections. They also service and repair engines, transmissions, clutches and differentials.

Sandy's Auto Service is an accredited Ontario Drive Clean Test & Repair facility.

Call for your appointment. Ask for The Doctor (Sandy) or The Boss (Sharon) his wife.

Sandy's Auto Service Ltd. is located at  
 176 Bullock Drive, Unit 8, in Markham.  
 They can be reached at (905) 294-3868.

## Pain & Arthritis Centre Treats Patients Using Lasers

In the past decade, the development of laser technology in treating chronic pain and other physical discomforts has revolutionized health science. This remarkable technology has helped to improve the quality of life for thousands of Canadians.

Therapeutic laser technology is an effective method of treating muscles, tendons, ligaments, joints, connective tissue, and bone and skin tissue with one simple medical instrument. This cutting edge technology is non-invasive, painless, drug-free and has no harmful side effects.

In November 2001, Theralase Inc. opened a new pain & arthritis clinic in Markham that utilizes this state-of-the-art technology to treat a wide range of ailments. Each month, patients of all ages discover the relief that the Theralase Clinic offers in treating work related injuries such as repetitive strain injury, cervical vertebral syndrome, shoulder pain, lower back pain, sports injuries and inflammatory conditions such as arthritis.

The laser process works by injecting billions of photons of visible and invisible laser light deep into the tissue structures. The tissue contains protein strands that absorb laser light energy and then transform it into chemical energy. The body uses this energy to accelerate the healing process.

In combination with the laser therapy, the clinic provides patients with full chiropractic, physiotherapy and massage treatments that may include adjustments, deep vibrational massage, electrical stimulation, trigger point and muscle therapy (relax, release and stretch). The clinic also offers active rehabilitation programs, early back to work programs, functional restoration programs and outcome assessments for Motor Vehicle Accidents.

The staff at the Theralase Centre is experienced and qualified to provide the highest level of patient care in a friendly and welcoming environment. Dr. Anton R. Cherry, Director of Clinical Science at the Theralase Centre, is a graduate from Logan College of Chiropractic, and is Fellowship (Canada) and Diplomate (USA) eligible in Rehabilitation Science. He has been a liaison to FDA Phase-3 clinical trials on laser therapy.

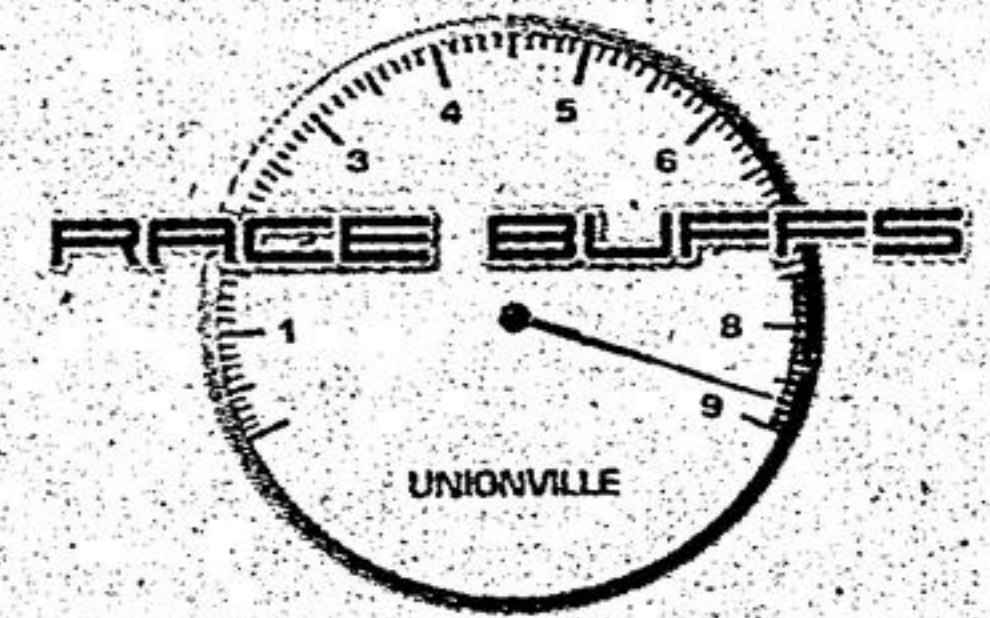

Susan Scott is a registered physiotherapist and occupational therapist with over 25 years' experience, specializing in chronic pain orthopedics, as well as motor vehicle accident assessments and treatments. Irina Makalsky is a registered physiotherapist who specializes in neuro-rehabilitation, orthopedics and home and work site assessments.

Theralase Centre welcomes new patients, and the public is invited to view the facilities and to discuss how this exciting new technology can provide relief for chronic pain and physical injuries.

The Theralase Centre is located in  
 Markham Gate at  
 600 Alden Road (at Warden), Suite 101.  
 They can be reached at 905-947-8455  
 or toll free at 1(866) 843-5273.  
 Their web site is at www.theralase.com.
