## IXL Educational Consultants:

### Success increases success!

Do you know someone who is under-achieving at school? Have you been trying the usual tutorial services and they do not seem to make a difference in overall achievement levels? Are you becoming frustrated because you don't know what to do next?

IXL Educational Consultants focus on teaching skills that encourage independent learning and building self-confidence. Success will not happen, if the techniques are not clear on the step-by-step process to achieve it.

There are many methods that can be taught in an organized manner to promote learning. The methods change the approach to learning. Students who experience difficulty learning must be taught how to learn to increase their success. Once they have mastered the skills and use them consistently, they will be astounded at the results.

IXL Educational Consultants is not a traditional tutoring service that concentrates on individual subjects. Our mandate is to teach "HOW" to learn. The skills can be applied to all subject/levels for life-long learning.

(How to study; How to write exams; How to take notes; How to write essays...)

IXL Educational Consultants also complete Diagnostic Academic Assessments for students from grades 1-11, who have difficulty learning in school and whose parents suspect further support at school

is necessary. If you must wait too long for the school to complete the assessment, our experienced diagnostician can help. A professional report using standardized norms is necessary in order for students in elementary and high school to receive added support through the school system. Let's work together to get the process started now.

## Get Educated on Laser Hair Removal at Sherlase

"Not all laser hair removal systems and clinics are created equal," says Sheri Kurtz, owner of the Sherlase Clinic, Markham.

"The consumer needs a great deal of information before selecting a laser hair removal program and clinic. Unwanted hair is a big problem for men, women and teens. The correct laser and the expertise of the technician ensure the success of each treatment."

Sheri has over eight years experience removing unwanted hair and takes pride in educating her clientele. "Consultation is a must. People just don't know all there is to know about laser hair removal and there is a lot of misinformation out there. I feel it is my responsibility to offer clients a free consultation to inform them about the procedure for their individual needs," says Sheri.

"Skin types, amount and location of hair, partially determine the treatment plan. Many Middle Eastern, Asian and dark skinned people have attained excellent results. Tanned people can also consider these laser treatments because the laser bypasses the

epidermis and directly affects the hair follicles."

The Coolglide is a FDA approved laser with enough power to eradicate hundreds of hair follicles at once making this a fast, efficient laser.

At Sherlase Clinic the professionals provide the most current technology available. Consultations are always confidential and free of charge.

As well as laser hair removal, the clinic offers an extensive range of advanced medical esthetics.

The Sherlase Clinic is located on the southeast corner of Markham Rd. and Sixteenth Ave.
