

Re-Elect

Frank SCARPITTI

Your 1st Choice

on November 10th

Regional Councillor

The decisions made by Markham Council directly affects each and every resident. Faced with the strains that rapid growth has placed on our Town, Frank Scarpitti has stood up and fought our battles at every turn. By re-electing Frank with the most votes for the position of Regional Councillor we can rest assured that our interests will continue to be protected. Here are some vital issues that Frank feels strongly about ...

• Traffic Congestion

Frank believes strongly that before new subdivisions are approved, adequate roads and transit need to be in place first!

• Slowing Down New Development

Tired of crowded classrooms, scarce seniors accommodations, traffic gridlock, then speak up and help Frank slow down growth.

• Keeping the Lid on Taxes

As the parent of 3 young children, Frank understands the high costs of living and home ownership. As Budget Chief, Frank achieved a tax increase of less than the cost of living, while faced with significant cost increases.

• Protecting The Environment & Green Spaces

Frank led the fight and defeated the proposed 3000 acre industrial re-zoning in north Markham. He has championed the protection of the Rouge River and small streams, the Oak Ridges Moraine, Settlers Park and clean air measures. He feels strongly that we have a duty to future generations to protect what nature has bestowed.

Frank with his family, from left to right: Daniel, Frank, Nancy, Michael and Alessandra

A Message to All Provincial Candidates

Over the next few weeks, you will be asking Markham residents for their support on election day, October 2nd. While you do so, I would ask that you let us know your position on the following critical issues. Although they are not as newsworthy as tax reduction, jobs, or hydro, they do have a significant impact on the lives of Markham residents. So please let us know where you stand on the following ...

1. Will you support permanent funding for the much needed York Region Rapid Transit System?
2. Will you strengthen the Rouge Park Plan by passing special legislation under the Provincial Planning Act?
3. Existing Markham residents should not have to pay for infrastructure and community facilities to support new growth! Under current legislation existing residents do. This should not be the case!

Municipalities need a new deal. And we need your help in getting one. For my part, I will work professionally with whoever wins. The good of Markham residents requires a unified strategy. If I can help you understand the needs from a municipal perspective, please do not hesitate to contact me.

Together we can help Markham

Frank Scarpitti
Deputy Mayor

Frank Listens
