**Having shingles is bad... but what comes next can be even worse.**  
We are looking for men and women 18 to 90 years old who suffer chronic pain from Postherpetic Neuralgia (PHN) to participate in a clinical research study. PHN is a common nerve injury disease that can arise as a complication of herpes zoster (Shingles) infection. The study tests the effectiveness of an investigational compound on pain relief in patients with chronic pain from PHN. All office visits, medical evaluations, and study medications related to this study will be provided at no cost to patients.  
For more information about this study, please contact:  
 **The Lynde Centre for Dermatology**  
905-471-8011
