Fieldstone Windows Considering replacing your windows?

As winter melts away, you may have found yourself staring at old or damaged windows and wondering who to call.

Well, for exceptional windows and trim, there is simply no one better suited for the job than Fieldstone Windows.

Based out of Stouffville, Fieldstone Windows is a window installation company servicing York Region and the GTA. Founded by owner Ken Simpson, the company takes great pride in its work and is well-known for their attention to architectural details.

"Attention to detail is very important to us," explained Ken. "Most companies aren't too concerned with this."

As a trim carpenter by trade, and backed by over 15 years of experience in the construction business, Ken understands the importance of quality work, and only hires carpenters gifted with the same eye for details that Fieldstone Windows has come to be known for.

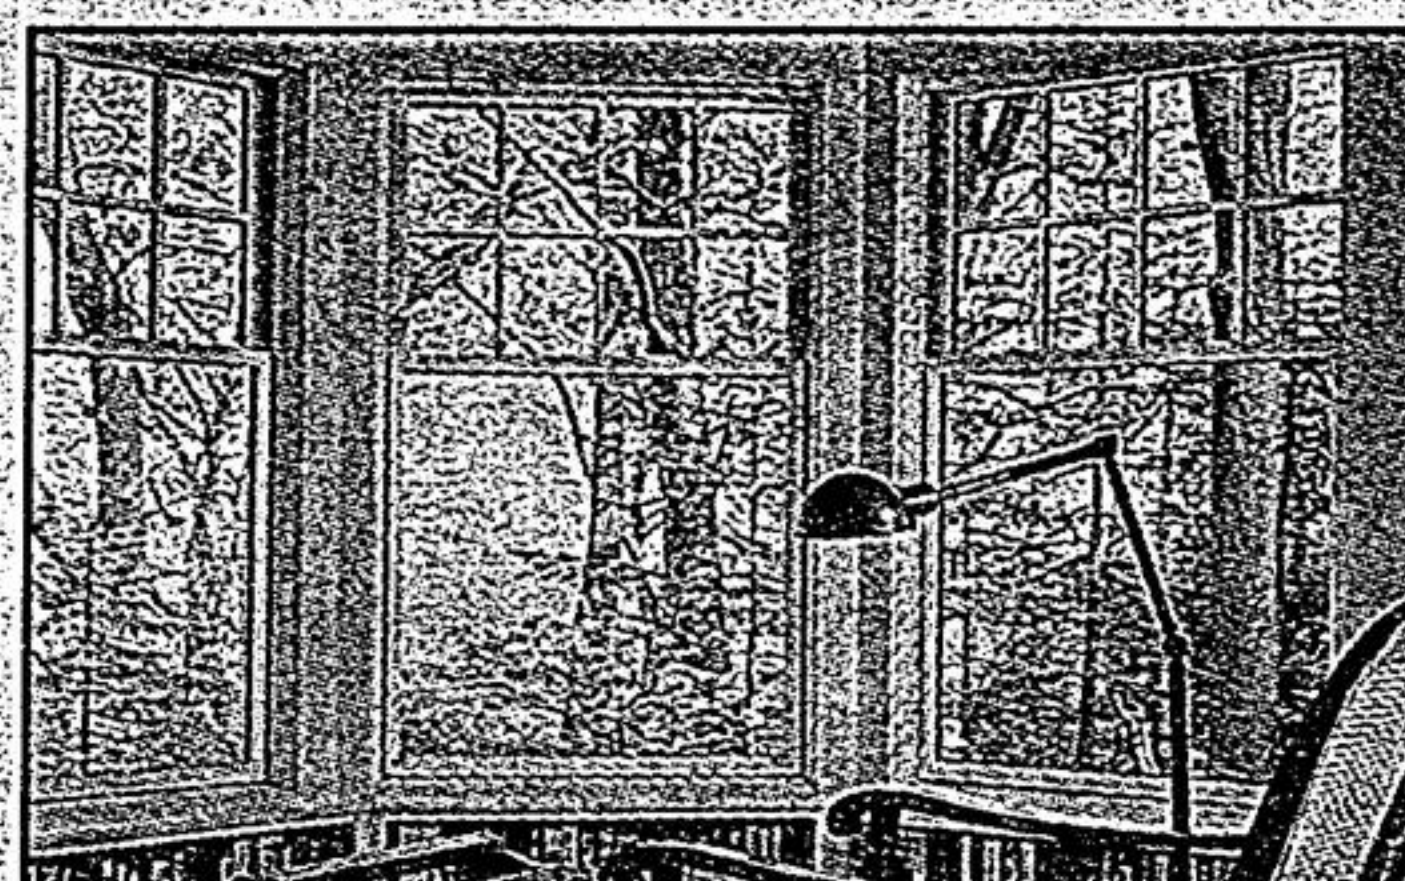

There are great advantages that come with Fieldstone Windows. Apart from the excellent craftsmanship and high quality, Fieldstone is primarily an installation business, and therefore is not tied exclusively to one manufacturer or brand. This way, the customer is empowered with the ability to make a choice.

In fact, Fieldstone Windows can call upon various manufacturers to find the perfect window for your home or business.

"We can find the product to fit the house," explained Ken. "A lot of window installation companies have loyalty to one manufacturer. However, we find the product to match the homeowner's need."

When it comes to replacing a window, Ken explained that there are two courses of action. Inserting the new window into the already existing frame, or the existing frame can be removed entirely. Ken recommends the second route, since an existing frame may require repairs, and may not be properly insulated and sealed.

Always dedicated and willing to do the best job possible, Ken doesn't believe in cutting corners. In

addition, Fieldstone Windows can revitalize your entire home with energy efficient windows, improved mouldings, windowsills, and more decorative features. Now you can create that window you have always dreamed of, but didn't know where to start.

Another popular product is the fibreglass entrance door. "Fibreglass doors don't dent like steel ones," Ken explained. "And they're warmer to the touch."

For a more stylish look, consider Simulated Divided Light windows. Another popular item, these windows simulate the divided glass panes of a traditional window.

"These windows provide a more architecturally designed look," said Ken. "And they give added depth to a window."

Nothing adds more curb appeal to a home than a bay or bow window, and a bell-shaped copper or metal roof can make a bold statement.

"Windows are highly practical aspects of a home, but they also serve another purpose as well," said Ken. "They are also design elements that can make or detract from a home's appearance."

Remember, for only the best service and quality, an amazing eye for details, and an impressive list of windows from a variety of manufacturers, Fieldstone Windows has the product you are looking for, and the ability to get the job done right.
