

HEALTHY LIVING

LCI wants you to LOOK Great this summer

Lasercom Clinics International (LCI) is Canada's leader in Hair removal with over 250,000 treatments performed. LCI Markham is pleased to introduce the latest in laser equipment from Candela, the leader in innovative medical and aesthetic laser and light technology. In response to the increased demand for innovative cosmetic and aesthetic procedures, LCI Markham now offers the most recent medical and aesthetic applications to the Greater Toronto Area with Candela's GentleYAG. The GentleYAG has the highest peak power in the industry, allowing our medical practitioners unmatched flexibility and efficacy in performing a wide variety of procedures. The GentleYAG has the capacity to perform permanent hair reduction on all skin types including tanned patients safely and effectively. In addition to cooling systems used in other clinics, such as ice packs and cooling tips, LCI Markham uses an exclusive skin-cooling machine to provide clients with the most comfortable and effective treatment possible. All treatments at LCI Markham are performed by internationally trained medical doctors.

Although originally designed to facilitate hair removal for darker skin types, the GentleYAG has also grown in popularity because of its impressive vascular treatment capabilities. The GentleYAG can be used to remove unsightly vascular lesions such as spider veins and hemangiomas. Perhaps the most exciting treatment performed by the YAG is non-invasive skin tightening or wrinkle reduction. The latest trend that is taking America by storm is non-surgical facelifts using laser technology. The GentleYAG "tightens" skin by heating its underlying layers and forming new collagen, resulting in smoother, younger looking skin. Dr. Mark Taylor, a Dermatologist at the Gateway Aesthetic Institute and Laser Center in Salt Lake City, Utah, praises the GentleYAG for its ability to perform a wide variety of procedures, and in particular its skin-rejuvenating capabilities. Dr. Taylor claims "Candela's GentleYAG laser is an exceptional new way to get rid of wrinkles and tighten skin...The patients I have treated with the GentleYAG are overwhelmingly happy with the results." Dr. Taylor goes on to say that "because it is so quick and results in little redness, patients can receive a skin-tightening treatment during their lunch break, and their co-workers wouldn't even notice." Get a smoother, more youthful appearance in just 30 minutes without the downtime and discomfort of traditional surgical procedures such as facelifts or other alternative therapies. Contact LCI Markham to book your appointment with the GentleYAG today.

LCI Markham is currently offering an introductory price for Vein Removal Treatment, starting at \$99; Wrinkle removal and Skin Tightening starting at \$199 per treatment, and 40% off all new Laser Hair Removal Packages. This offer will expire on Sept 15/05. LCI Markham is conveniently open evenings and weekends at 445 Apple Creek Blvd, Hwy 404 & 7. To book a free consultation and a free patch test, call 905 415-2737 or email: lci-markham@on.aibn.com. Website: www.lcisosmooth.ca
