Lindsay shot up because she always said that she'd try anything once. Today she's trying to live with hepatitis C.

Thousands of people across Ontario have been infected with hepatitis C from unsterile equipment used for drug use, piercing and tattooing. Although symptoms may not show up for years, you will eventually get sick. And you can pass it on to someone else. So ask your doctor about getting tested. Because detection is key to controlling the virus. 1-877-234-4343 (TTY 1-800-387-5559) [www.health.gov.on.ca/hepc](http://www.health.gov.on.ca/hepc)

Hepatitis C. Find out if you have it. Get tested.
