'Underdogs' need debates, Barker says

From page 1.

TV TIME FOR CANDIDATES

► **TUNE IN:** Mayoralty candidates in Whitchurch-Stouffville will debate tomorrow at noon, Nov. 3 at 4 and 7 p.m. and Nov. 4 at 11 a.m. on Rogers Television (Ch. 63). The debate was taped last week.

get that by sitting on the fence. We need to get to the people.

A third debate, for candidates in the Stouffville wards, 4, 5 and 6, begins at 7 at Latcham Hall. It's sponsored by the Whitchurch-Stouffville Chamber of Commerce. Mr. Mole says mayoralty candidates should also be taking part.

His challenge to the other mayoral candidates is for a "Real debate/round table discussion, with no monitor, only a referee." The two-hour meeting would cover five questions.

The theme? "I'm not going to let democracy die in this town."

Fellow mayoral candidate Don Barker hadn't received the challenge but said he'd gladly take part.

"I'm 100-per cent behind that," he said, while campaigning in downtown Stouffville Tuesday afternoon.

"It's the only way we underdogs have of getting to the people. I don't have the finances of the developers."

Pamela Courtot has also agreed to take part.

Mr. Mole was waiting yesterday to hear back from

the other mayoral candidates, incumbent Sue Sherban and former mayor Wayne Emmerson.

"I am very surprised that the various community groups didn't see fit to host these meetings," Mr. Mole said.

"Normally, there would be a meeting at Vandorf, Ballantrae and Latcham Hall."

"That said, there is still time for the various groups to support democracy in our town."

Think You've Heard It All?

by Lorraine Kennedy Vosu
Clinical Director/Owner
M.A., Reg. CASLPO Aud.(C) Audiologist

GETTING AN EARFUL

If you are one of the millions of Canadians who listens to music on a personal digital audio device, you could be getting more than you bargained for. These ubiquitous sound players, which send sound directly down the ear canal, pose the problem of being too good for your own good. According to a recent informal study by the House Ear Institute, researchers found that the new generation of digital audio players have such exceptional clarity that they allow listeners to hike the volume without the signal distortion that occurs with traditional analog audio. Without distortion, which acts as a sort of volume governor, listeners may expose themselves to unsafe levels of sound without realizing it. You've probably noticed people of all ages listening to music on iPods. If played too loudly and for prolonged periods of time, these sleek digital auto players can contribute to hearing loss. Please call us to schedule a hearing evaluation. Our full-time certified Audiologists use state-of-the-art technology, including video otoscopy, to thoroughly examine the internal parts of the ears. Please call us to schedule a hearing evaluation for your child.
