Water FOR Tomorrow

Our NEW Design Series will be launched on March 3rd at Seneca College with City TV personality, Frank Ferragine.

Frank will introduce us to what is new with water efficient and low maintenance plants. Find out what new varieties are on the market, and what old favourites are making a comeback. With so many options, you may just run out of space in your garden!

Now in its seventh year, the Water for Tomorrow Summer Water Use Reduction Program is launching its first ever water efficient garden design series. Whether you are a beginner gardener or a pro, you will learn something about creating a beautiful, low maintenance and water efficient garden. Each seminar will focus on a specific design topic for your garden.

FREE Landscape Advice Offer

Water for Tomorrow also offers FREE lawn and garden assessments to York Region residents. Trained advisors will come to your house and perform a personalized garden assessment that will help you reduce your water needs and create a beautiful lawn and garden. Whether you are looking for garden ideas, help with grubs or chinch bugs or you just want a healthier lawn, our landscape advisors will help. This is a FREE service for York Region residents. Register soon, spaces are limited!

FREE! for Residents of York Region
