# Music Mania tradition with family

*From page 1.*

been stepped up to three times a week.

But this is the time when everyone is rewarded for their efforts. The various segments of the cast starts to work together and can see the program taking shape.

The dancers and the chorus and the band are all working together," Ms Gibbs said.

She enjoys working with the cast, which includes people of all ages. She got a chuckle when a couple of the older cast members referred to them as "kids."

Toria, who is studying computer science at the University of Waterloo, received the Character Youth Award in 2005 for her work on the Mayor's Youth Committee.

At university, Toria is involved with her faculty's student government and represents computer science students in academic meetings

with professors. She's completing a co-op this spring and living at home, allowing her take part in the show.

For Colleen Clarke, Music Mania seems to have been a love affair spanning more than 25 years. She was in the dance troupe in 1979 and the chorus in 1980.

In the early 1990s, both Ms Clarke and her husband were presidents of the couples club. Since then, she's been involved some years and not others as family responsibilities have ebbed and waned.

Over the years, she's danced, sang, done make-up, sold fundraising mugs and worked with the stage crew.

When she sees Toria on

stage, "I know how my parents must have felt to see me up on stage," Ms Clarke said.

Her parents sang and danced in the show until the early 1980s. Her dad did memorable impressions of Don Harron's Charlie Farquharson character, complete with moth-eaten sweater and cap. He even portrayed one of The Beatles.

Colleen's mom joined Stouffville United Church at the age of 10, singing in the choir for more than 50 years.

The most memorable part of Music Mania is the friendships that are made, Ms Clarke said. "It is a really great inter-generational thing, between young and old."

The show is at 7:30 p.m. on April 26, 27 and 28 at Stouffville District Secondary School, 183 Bramble Cres. in Stouffville. Tickets are \$15 for adults and \$6 for children 12 and under and are available at Cards TV and Appliance, Fame International, M. & M. Meat Shops, Reid's Antiques, Stouffville Florist and 1001 Variety Store

## FOCUS on Business

**IF YOU OWN A HOT TUB YOU NEED...**

**Spa Solution**

MegaNutrition Inc.® of Uxbridge, Ontario has been distributing fine and high quality natural health products to Canadians for many years and is proud to have Spa Solution™ as one of its best selling goods. Our natural water treatment alternative for hot tubs is the answer to so many health issues as our skin is the largest organ in our body.

It's a fact. You need to test and treat your spa constantly to keep the water free from dangerous contaminants. If you don't, your hot tub could become the breeding ground for all kinds of nasty things that could make you sick or make your hot tub very unattractive. However, there is a big problem with the way most spas are treated: harsh, dangerous and harmful chemicals are used.

Many of the chemicals used to treat your spa are toxic. And that's not all. The elevated temperatures of spas cause these chemicals to be more active and an even greater threat to your health. Elevated temperatures also open up the pores of your skin, making you more vulnerable to attack from these chemicals. If that isn't enough...these harsh chemicals are absorbed directly into your blood stream when you breathe the vapours caused by the elevated temperatures. Is it any wonder that more than 80% of the people who use hot tubs have some kind of adverse reaction like red eyes, dry skin and irritating rashes?

There are other problems with chemicals. Most are corrosive which means more maintenance and additional costs to replace parts of the equipment. You have to constantly test the water to make sure all is in balance. And when something is out of balance, you add more chemicals. After a while you've got yourself a potent chemical soup! When it gets this bad, it's time to drain the tub and then start the whole process all over again. And don't forget that the chemical soup that used to be your spa water, once drained, is now damaging the environment.

It's a serious situation. There finally is a better, safer and healthier way that you can enjoy the pleasures of your hot tub while not exposing yourself to cancer-causing chemicals and destroying the environment. Marketed for well over 25 years, the No-maintenance, No Chemical, All Natural, Less Expensive Hot Tub Water Treatment Alternative comprised of a unique and powerful formula of seaweed enzymes specifically designed to keep your hot tub clean and healthy is Spa Solution™. An easy and economical two-step process to eliminate chemicals from your hot tub experience.
