### NEW PROMISE OF HAIR (CELL) RESTORATION

Hair cells are the hair-like projections in Our bodies change as we age. As hair the inner ear that convert the mechanical cells in the inner ear die, our hearing force of sound waves into the electrical diminishes. There is a new hope that there impulses that are carried by the auditory may be a way to coax hair cells to grow nerve to the brain. As they die, either due again. Until this research is fully realized, to age, exposure to loud noise, or damage there are ways for you to improve your from medication, they are irretrievably hearing today with advanced hearing lost, and hearing goes with them. To instruments that are both discreet and effective. Call us to schedule a hearing address this problem, researchers have evaluation with a registered dispensing been looking for ways to replace or Audiologist. We are here for one simple find a substitute for hair cells that have died. Experiments performed at the reason: to help you improve the quality of the Massachusetts Eye and Ear Infirmary of your hearing and, thus, the quality of show that primitive stem cells can be your life.
