#### GORMLEY

Mr. and Mrs. Orville Heise and daughter from Dallas Centre, Iowa, are visiting this week with the Heise family.

Mr. and Mrs. Milton Heise and family of Richmond Hill visited Saturday evening in the Heise home.

Quite a number of Gormley Brethren in Christ Young People attended Youth Conference at Wainfleet over last weekend.

Mrs. W. Bruce and Genevieve, Mr. and Mrs. John Bruce and Karen enjoyed a motor trip over the weekend as far north as Manitoulin Island.

We welcome to our community Mr. and Mrs. Eric Morby, newlyweds from Toronto, who have rented a part of the former Falkowski home. The rest of this home is occupied by Mr. and Mrs. Donald Doner.

Had you been in New Gormley last Friday night—or closer to Saturday morning—you would have been awakened by the music of the chivalry gang who visited Mr. and Mrs. Donald Doner.

Mr. and Mrs. Murray Bennett and Miss Grace Doner had supper last Thursday evening in the home of Mr. and Mrs. E. Hunt.

Three of our local school teachers, Mrs. Murray, Mrs. Pope and Miss Miriam Heise, are taking a summer course in Toronto.

Messrs. Donald, Jim and Murray Brown spent a week's vacation in the north and last weekend called on the Terrys in Parry Sound.

Miss Beula Heise is visiting Mrs. D. Hilt.

Mr. and Mrs. Archie Cameron of Woodbridge and Mr. and Mrs. A. Jones and Joyce of Dickson Hill visited Sunday with Mrs. A. T. Gooding and Mr. and Mrs. Ken Jones.

Guests of Mrs. E. Jones on Sunday were Mr. and Mrs. Harry Jones and family.

Miss Judy Wilcox and Miss Mary Latimer are holidaying at Camp Ashunyoong.

#### Births

**RINGWOOD**—Mr. and Mrs. Joe Ringwood (nee Bernice Redshaw) Box Grove, wish to announce the birth of a son on July 20, 1951, at Markham Nursing Home.

**WIDEMAN**—Mr. and Mrs. Lloyd R. Wideman, Stouffville, (nee Evelyn Flyler) are happy to announce the birth of their son, Glenn Lloyd, on July 18, 1951, at the Brierbush Hospital, Stouffville.

**FLIGG**—Mr. and Mrs. Carman Fligg, Claremont, announce the birth of their daughter, Donna Frances Beatrice, on Friday, July 20, 1951, at Unionville.

**STECKLEY**—Harold and Irene Steckley (nee Boden) are happy to announce the birth of their daughter, Marilyn Ann, on Saturday, July 21st, 1951, at Grace Hospital, Toronto.

**BOLENDER**—Mr. and Mrs. Lloyd Bolender, Stouffville, R.R.4, wish to announce the birth of their daughter on Friday, July 20, 1951, at the Brierbush Hospital, Stouffville.

**KENNEDY**—Mr. and Mrs. Reginald Kennedy, Uxbridge, are happy to announce the birth of their son on Tuesday, July 24th, 1951, at the Brierbush Hospital, Stouffville.

**PUGH**—Mr. and Mrs. Merlyn Pugh, Claremont R.R.2, are happy to announce the arrival of their son, on Wednesday, July 25, 1951, at the Brierbush Hospital, Stouffville.

#### Weddings

##### SMITH—GINGELL

On Saturday, July 21st, in St. Philip's Anglican Church, Unionville, Rev. F. Herman officiated at the double ring ceremony of Beatrice Anne, daughter of Mr. and Mrs. F. G. Gingell, to Myrl Melville Smith, son of Mr. and Mrs. H. Smith, Unionville. Miss Ma Weighill played the wedding music and accompanied Mr. Hugh Martin, soloist, who sang "Through the Years" and "O Perfect Love." The bride, given in marriage by her father, wore white embroidered organza over taffeta. Her finger-tip veil was held by a halo of orange blossoms. She carried red roses and stephanotis. She was attended by her sister Gladys, as maid of honor, wearing green taffeta, and the groom's sisters, Mrs. Don Maynard and Mrs. Larry Sanderson, as bridesmaids, wearing yellow and pink taffeta. Joan Smith was flower girl wearing blue taffeta. All carried bouquets of roses, sweet peas and carnations. David and Dean Summerfeldt, nephews of the bride, were ring bearers. The groom was attended by his brother-in-law, Larry Sanderson, Ben Cox and Don Maynard were ushers.

A reception followed in the Sunday School room. The bride's mother received wearing blue print with navy accessories and complimentary corsage. The groom's mother received in white and green print with white accessories and complimentary corsage. For travelling the bride wore blue with white accessories and the groom's gift, a diamond necklace and earrings to match. The happy couple left by motor for points south to Kentucky and on their return will reside in Unionville.

## New Method for Saving of Hay Crop

The following article on Emergency Measures for saving the big Hay Crop was prepared by Mr. R. E. Goodin, Assistant Director of Crops, Seeds and Weeds Branch, Toronto:

"With abundant crops of clover and mixed hay all over the Province of Ontario this year, together with the fact that weather conditions have not been too favorable for normal ordinary methods of hay making, it would seem that some emergency measures are now necessary in order to make best use of our present valuable crops. Considering present prices for livestock products, together with costs of feeds especially with high protein content, the situation becomes even more important.

"What to do under these circumstances is the question, therefore, that comes in the mind of practically every farmer today. The answer seems to centre around the use of grass silage, and where present silo accommodation is not available, the trench silo may be used.

"Trench silos are not, exactly new. They have been used to a limited extent in America for the past forty years. Trench silos have recently increased in popularity due possibly to their successful use in the storage of grass silage in Europe and in the U.S.A. Increasing costs of construction and scarcity of materials for conventional silos have also been factors towards promoting their popularity.

From the standpoint of grass silage, this method of preserving valuable nutrients in grass for feeding during the off-grass season, permits summer feeding conditions for the entire year, thus providing a feed with high protein and carotene content, which actually means that money can be saved because it is not necessary to purchase as many millfeeds and concentrates.

"Preventing loss of food nutrients by excessive weathering and leaching is therefore important and under present conditions, the trench silo has many advantages for this purpose because it: (a) Can be built at the cost of labor alone if left unlined.

(b) It can be dug with farm equipment—tractor, plow, scraper.

(c) It can be filled without a blower if the fresh hay is firmly packed.

(d) It can be easily enlarged. "While the trench silo can be dug with an equipment available, perhaps the most common method is with a bulldozer. However, a trench along the side of the barn or stable can be dug with a scraper as an emergency measure. The excavated earth can be piled on each side of the trench. A side hill location is ideal leaving one end open at ground level, and with the bottom of the trench sloping towards the entrance at least a quarter of an inch per foot. Ensiled material at this time of year will usually have good quality

without the use of a preservative. "Although cut material is usually used in trench silos, new mown hay in its natural state has also been successfully made into grass silage. Care should be taken to properly distribute and pack the material. With trench silos, a tractor can be used for this purpose.

"Further particulars may be obtained from Agricultural Representatives in each county and district or from two pamphlets on the subject recently published by the Silage Research Committee of the Ontario Agricultural College. For those persons who live close to a farmer who has successfully used grass silage, it is suggested that they obtain particulars from him. Farmers particularly in Eastern Ontario might well enquire about trench silo, and the use of grass silage from Dr. P. O. Ripley at the Central Experimental Farm, Ottawa, where a typical low cost trench silo has been built and has been in use during recent years.

"Although the present situation calls for emergency measures to preserve maximum amounts of home-grown feed, there may be some farmers who wish to take advantage of this year's good hay crop to add additional organic matter to their soils. For this purpose and where the feed is not actually required this year, the plowing under of hay crops, especially those infested with weeds is highly recommended. Such a practice will pay big dividends in later years from the standpoint of

keeping the soil in good tith. In other words, this valuable source of humus can serve a very worthwhile purpose of plant food, or crop can be preserved by way of grass silage for meat and milk products. Therefore, everyone should put forth very special efforts to make the most of it."

Most of us enjoy the other side of the argument. We get an enormous kick out of learning how illogical and absurd our opponents are.
