Committee On The Costs Of Education

The Committee on the Costs of Education in the Elementary and Secondary Schools of Ontario has been appointed to undertake a comprehensive review of the costs of education in relation to the aims and objectives, programs, priorities and the like, of the educational system; to evaluate existing programs in the light of experience with them, the requirements of the present, and in terms of the expenditures of money for them; and to recommend policies as the Committee may determine.

The Committee will welcome assistance from representatives of groups, organizations, and associations and from the public through the provision of information, comments and suggestions in areas such as but not limited to:

- the use of the financial resources being provided for elementary and secondary education in Ontario in the attainment of the educational goals;
- the ability of the various differentiating factors in the legislative grant plan such as course, location level (elementary and secondary), and type (ordinary and extraordinary) to generate funds in proper balance consistent with the needs for the attainment of desirable educational objectives;
- the implications of ceilings on expenditures by local school boards, including the effect on the decision-making and autonomy of these boards;
- the various aspects of school programs with particular reference to innovations and new concepts as, for example, the "open plan" organization, technical and commercial programs and use of educational technology.

It will be appreciated if submissions could be made as soon as possible but not later than 31st March, 1972. They should be sent to:
