

Cedarwood, call it Brougham or Whitevale

By Wm. Newman, M.P.P. Ontario South

There has been a great deal of discussion and controversy over the new International Airport in the Township of Pickering. I am still very much opposed to the site for the airport for many reasons. The ecology of the area, the good agricultural land that will be taken, disruption of complete communities and many other factors too numerous to mention in this Release.

Up to the present time I have not had answers to my questions as to why the airport must be located here, or the technological reasons. I still do not know whether we really need a new airport at the present time and there are many other questions.

I am very much concerned about the many beautiful historical buildings in the Township of Pickering. I have had some assurance that some of these buildings will be saved for the future if the airport becomes a reality.

I am also concerned about the people who will be displaced and I am at this moment trying to arrange, if the airport goes through, that these people will have the right to seek accommodation in the new community of Cedarwood, if that is to be the name. I believe the name could very easily be changed. I feel that Brougham or Whitevale would be much more appropriate.
