**TO THE ELECTORS of UXBRIDGE TOWNSHIP**

In this decade the word "progress" seems to have many different meanings, all of which depend upon the attitude or outlook of the one who uses the word.  
To me, progress is consideration for the future  
— by rationing our natural resources. I mean, preventing the excavation of an entire township and safeguarding our trees, woodlots, scenic routes, etc.  
— by careful community planning to combat pollution and promote the comfort (health, recreation, services) of our residents.  
— by encouraging both individual and group enterprise within the township while discouraging large-scale interests who wish only to take from us and give token "benefits" in return.  
I am a candidate for election to the office of councillor in Uxbridge Township and I want PROGRESS for our area. Please consider me when you cast your ballot Dec. 4.

Uxbridge Township has been stagnated too long. A Township with two railroads, many highways, excellent terrain could entertain applications for light industry, thus sharing the tax burden among the ratepayers. This of course controlled by a new Council in a business-like fashion.
