We clear acne with the Isolaz acne therapy

Unightly acne can cause stress and low self-esteem among pre-teens, teenagers and adults alike. Now there is a proven therapy that shows immediate results, and brings back healthy skin that provides self-confidence.

Isolaz is a new, deep-pore cleansing treatment that combines light, to kill bacteria, and suction to remove debris from the pores. The Isolaz vacuum applies gentle pressure on your pores while the painless laser helps destroy the acne-causing bacteria. This helps soften and remove blackheads, dead cells and other debris from deep in your pores, resulting in radiant, clear skin that is purified from the inside out. Clinical studies show immediate results within 24 to 48 hours, including reduced redness and immediate drying and flattening of the blemish. And people who have tried Isolaz have reported a visible reduction in pore size and improved skin tone and texture, resulting in a healthier overall complexion. The vast majority of patients with even stubborn acne are seeing improvement that lasts; in one study, 88 percent of patients treated saw clearing of a variety of types of acne after four treatments.

MediSpa Clinic on Main is the only area clinic providing the Isolaz therapy. Phone to book your no-obligation consultation, and see how dramatically improved skin tone and complexion can increase self-esteem and confidence.
