## DIABETES BREAST CANCER

### IT'S WORSE THAN YOU THINK.

More people die per year from diabetes than breast cancer. In fact, diabetes is a leading cause of death by disease in Canada. That's because diabetes puts you at higher risk for heart disease, stroke, kidney failure and other serious health complications. And research shows being over 40 increases your chances of being diagnosed with type 2 diabetes.

Type 2 diabetes accounts for 90% of all diabetes cases – but it is preventable.
