You can beat our carpets but you can't knock our wood!

A warm and welcoming kitchen

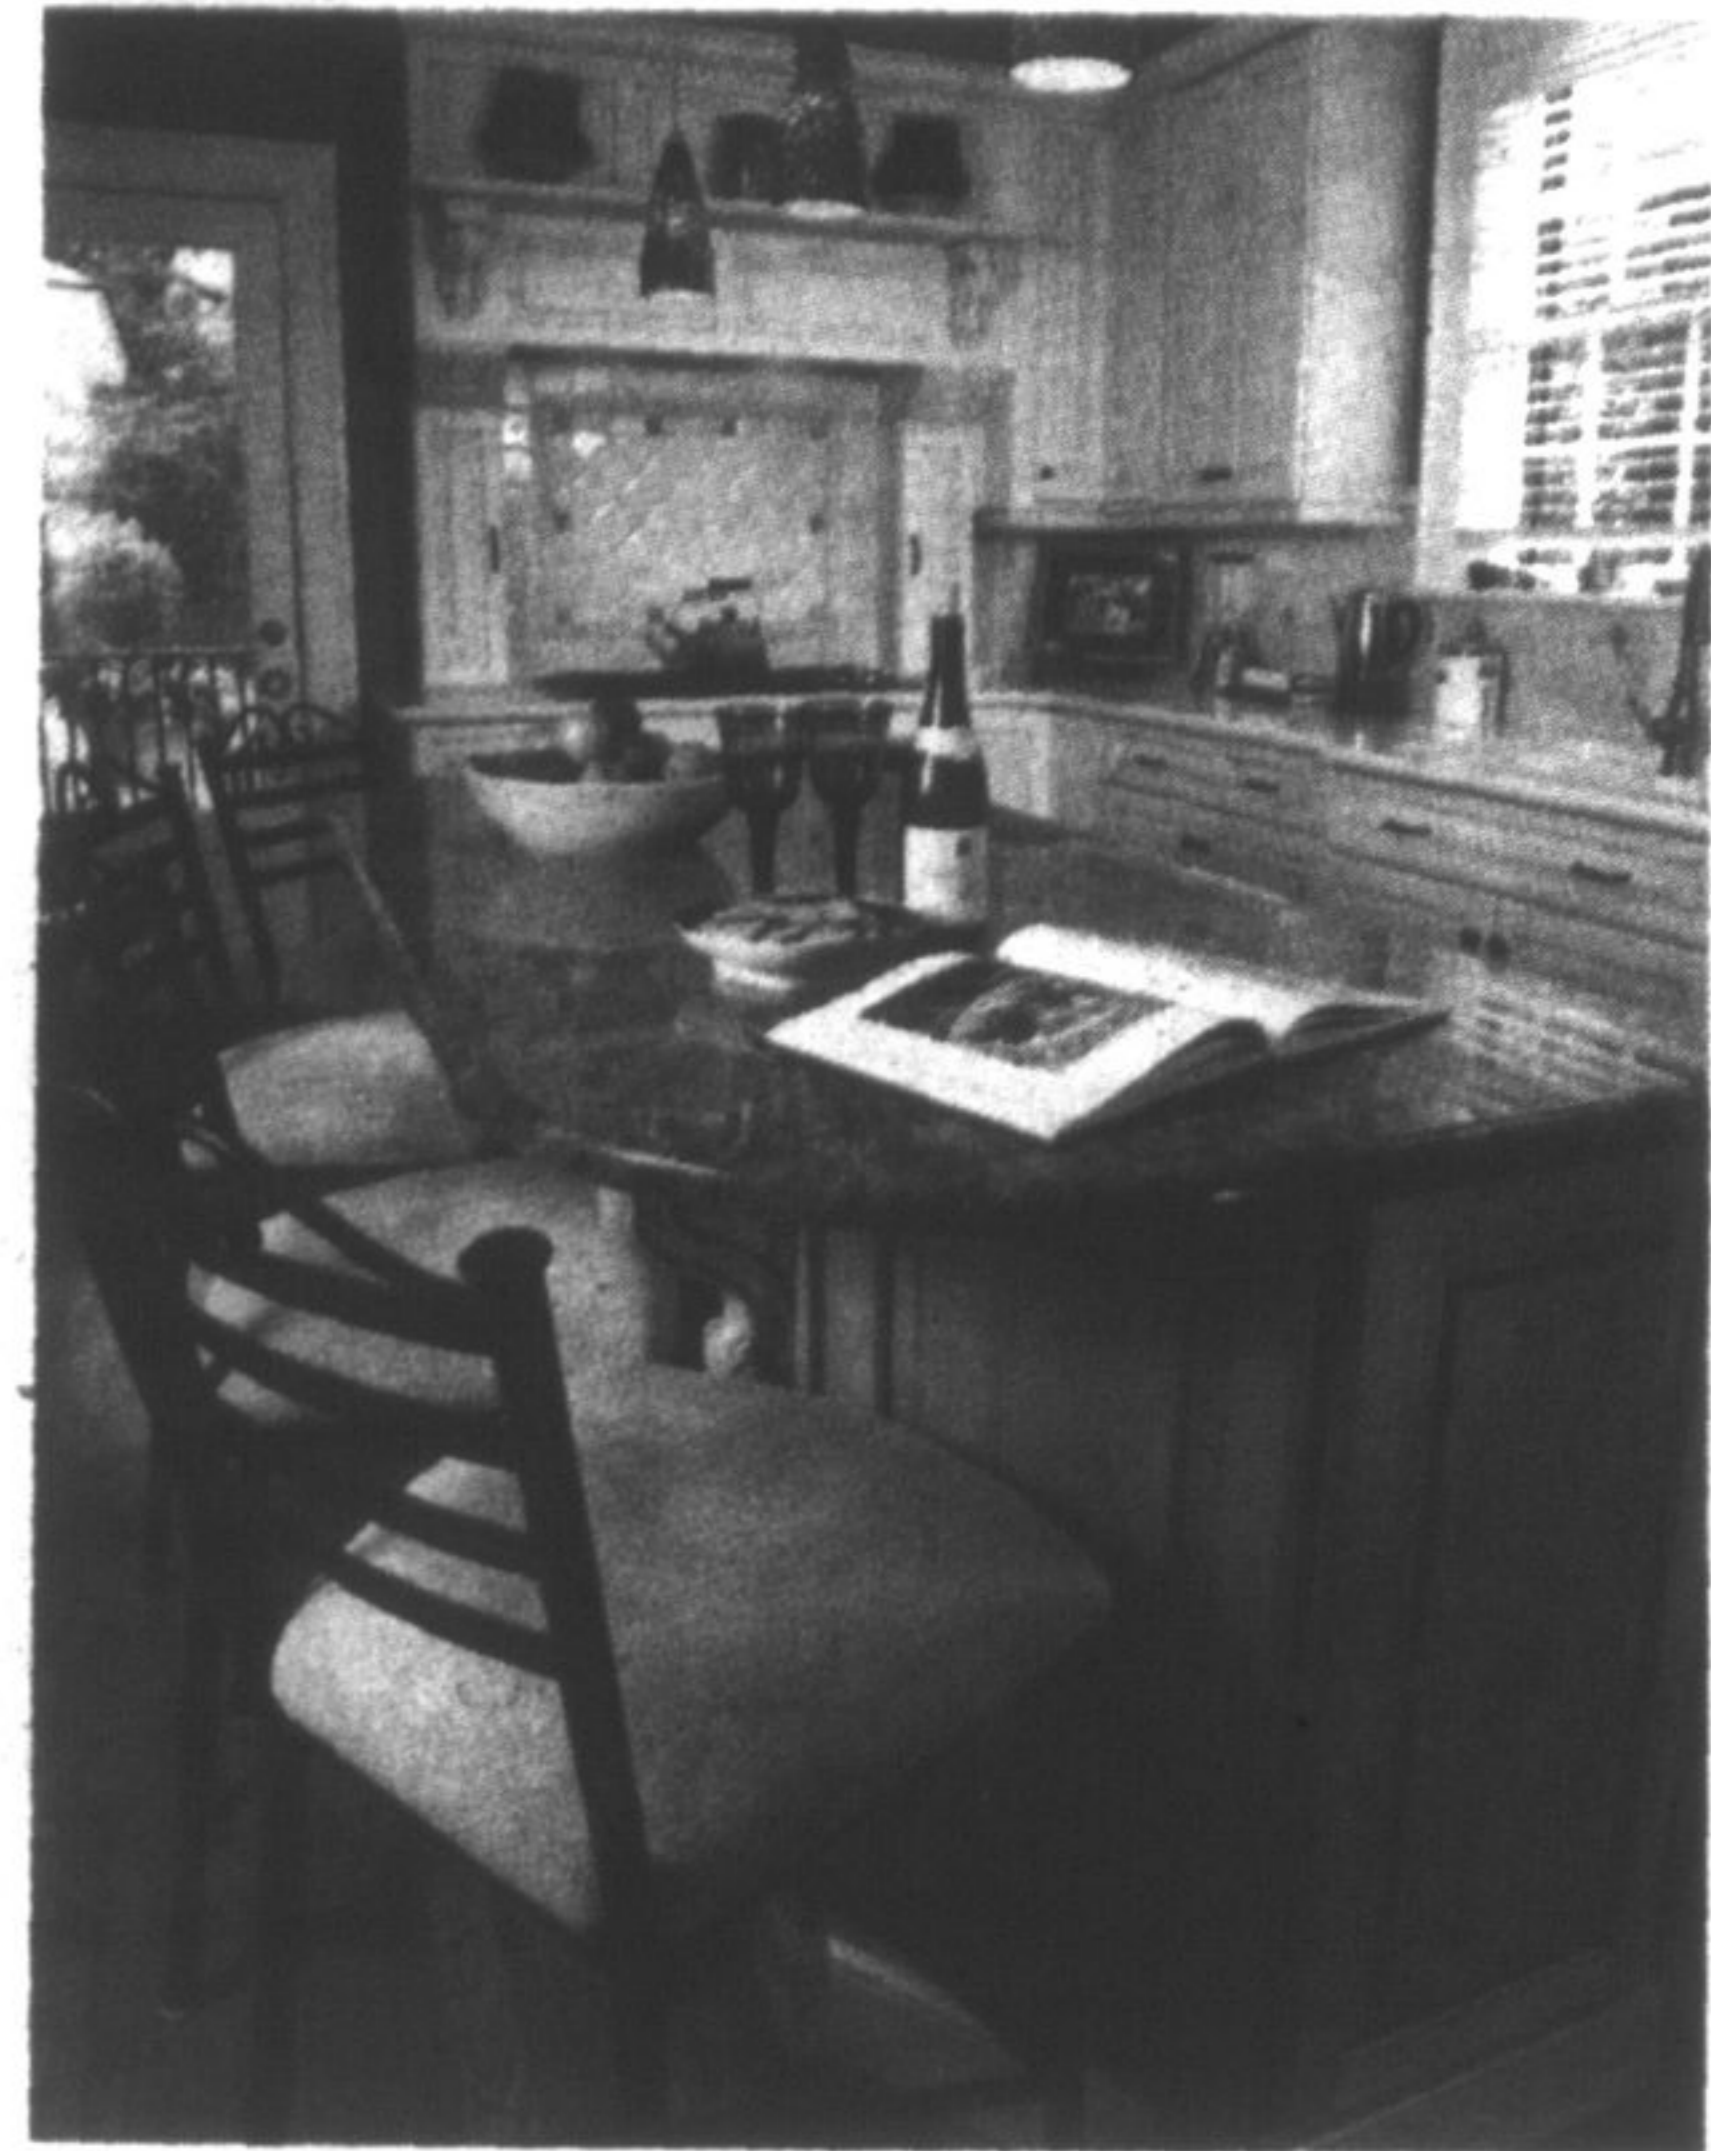

A kitchen should always inspire friendliness, creativity and a good appetite! Leave the more classic styles for the dining room and express your personality in the kitchen. If your appliances are too old, add a touch of originality by replacing them with ones in an antique style, for example, or an unexpected colour.

For your kitchen cabinets, be daring in your choice of materials and finishes. Rather than repainting them in just one colour, add patterns, or use stencils to create designs which harmonize with the rest of the room.

Around the table, chairs can add interest to any kitchen. Choose different styles which have a common element, such as complementary colours, antique styles or the same fabric.

Accessories can also add small decorative touches. For example, pretty boxes can be used to store pasta, beautifully shaped and coloured bottles can be used for oils and exquisite, modern bowls for fruits.

Combine efficient cooking with inspired decorating by keeping everything close at hand on supports, shelves and hooks on a wall or on a colourful, perforated panel to create an interesting focal point in your kitchen. In this way, you can display your

bowls and kitchen utensils, cake plates and serving dishes, salt and pepper sets and any other interesting plates and casseroles. Decorative accessories such as colourful, enticing art work, inspired by nature, fruits, vegetables, can also be incorporated into the kitchen.

We spend a lot of time in our kitchens so make it a welcoming gathering place for all those delicious meals.
