Do Red Cars Cost More To Insure?

The Car You Drive Can Impact Your Car Insurance Rate

Is Your Car To Blame For High Insurance Rates?

Many of us have heard that red cars cost more to insure, but is it true? In a word – NO. The colour of your car plays absolutely no part in the calculation of your insurance premium. However, the year, make and model of the car you drive does affect your rate. Insurance companies look at things like theft, safety ratings, and the claims history of each vehicle when setting their rates.

Should I Trade In My Car To Get A Better Rate?

Probably not. If you are in the market for a new or used car, considering the cost of insurance makes a lot of sense. However, switching cars for the sole purpose of getting a lower rate may not be your best option. Why? Because the type of car you drive is just ONE of a host of variables used by insurance companies in setting your rate.

What's The REAL Secret to Lowering Your Rate?

The simplest and easiest thing you can do to lower your rate is to SHOP AROUND. Why? Because the rates charged by different insurance companies, to insure the same driver, with the same car, for the same coverage, can vary by hundreds and even thousands of dollars.
