

Spring Home & Garden Guide

Transform your space with affordable improvements

If the economy has dampened your plans for sprucing up your home, then think again. You can make a dramatic change to an outdated kitchen without a huge investment. Create new excitement by simply replacing your countertop with one made from the latest generation of laminate. Today's laminate is more striking than ever before. It's possible to find laminate styles and finishes that take inspiration from granite, marble, glass -- even the surface of the moon -- sparing your budget in the process.

Today's kitchens have become more sophisticated with the use of high-drama materials. When shopping for laminate materials that can complete the high-end look you desire. Here are some other improvements that have high impact without requiring a big financial investment:

- Remove your kitchen cabinet doors, sand and refinish with either new stain or paint. Replace the hardware and achieve a new look.

- Lighting can dramatically make over a room. Consider installing small task lights under cabinets to shed more light on countertop areas. Replace dated ceiling fixtures with new.
- Rather than replacing a dishwasher that doesn't match your other appliance's stainless steel theme, purchase stainless steel sheeting with an adhesive backing to apply over the front panel of the dishwasher to match the refrigerator and stove.

Burrows Landscaping

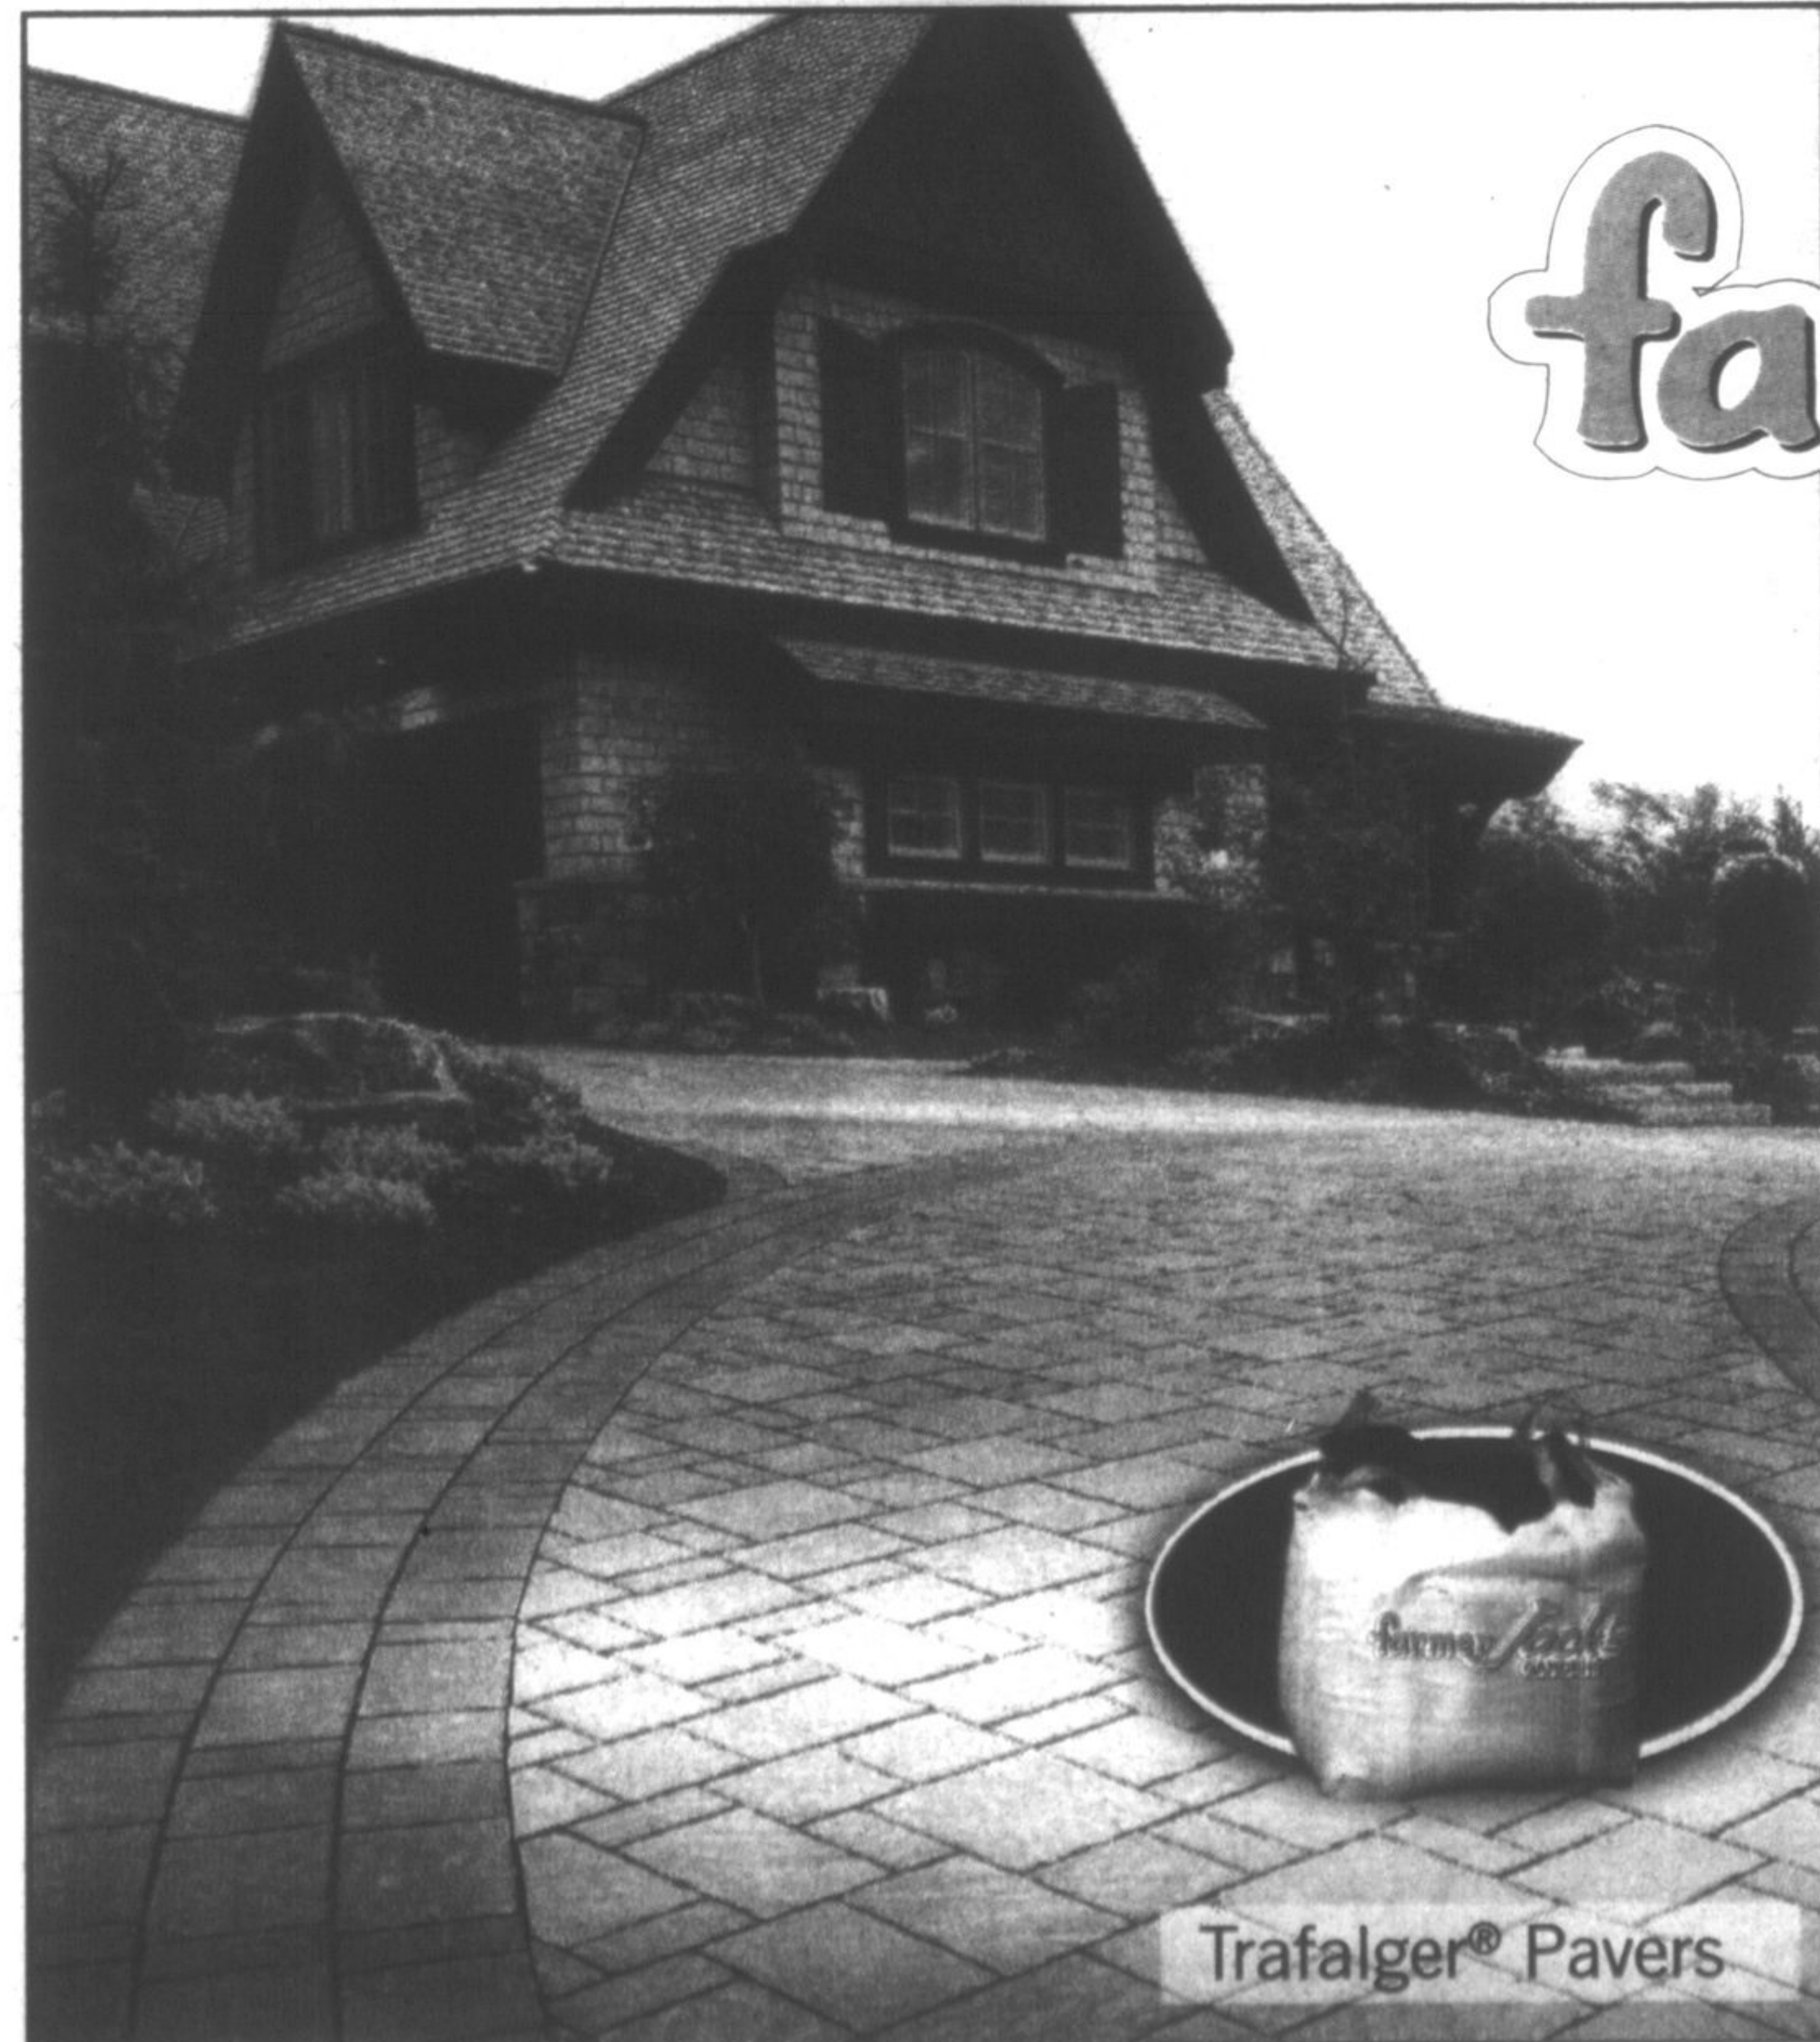

Quality Residential Landscaping

- front walks • garden planting + accent lighting • property clean-ups
- tree + brush removal
- backyard patios
