## NOTICE

### WATER SUPPLY IMPROVEMENTS TO THE COMMUNITY OF STOUFFVILLE

The Region of York has completed the commissioning process for the supply of lake based drinking water to the Community of Stouffville. As part of York Region's Long Term Water Supply initiative to provide a secure water supply to the Community of Stouffville, the groundwater supply is being supplemented with lake-based water from the York Water System (YWS). The YWS has been implemented by connection to a new pump station located at the North Markham Reservoir on McCowan Road just south of Stouffville Road and water supply is being conveyed through a watermain on Stouffville Road to the existing system.

The YWS also supplies water to Markham, Vaughan, Richmond Hill, Aurora and Newmarket through the same treatment facilities that service the City of Toronto.

#### Quick Facts:

- Stouffville's groundwater supply and the YWS supply meet the provincial drinking water requirements and are of high quality.
- The supplement of YWS water supply will decrease the demand on the underground aquifers and provide additional security by having a lake-based source.

If anyone has further questions, please contact the Public Works Department at 905-640-1910 ext. 306.
