## Dr. Krista Lee & Dr. Anthony Antoniazzi embrace the community of Stouffville!

**W**ith many years of education and practical experience, Dr. Krista Lee and Dr. Anthony Antoniazzi have opened LA Orthodontics on the historic Main Street of downtown Stouffville, embracing this warm community and supporting it at the same time.

LA Ortho was opened in January of this year, taking over the office from Dr. Barbara Frackowiak. This has been Stouffville's only orthodontic office for more than 15 years. Now, the knowledgeable and caring Dr. Lee and Dr. Antoniazzi have opened the office full-time to meet the many needs of residents. **We would encourage you to ask your friends and family if they had a chance to meet the new orthodontists and how their experience has been!**

Located conveniently on Main Street, Dr. Lee and Dr. Antoniazzi specialize in orthodontic treatment for children and adults. Orthodontics is the process of aligning your teeth and correcting your occlusion (bite). Orthodontics can be achieved in

many ways, from traditional braces, to the advancements in the field with ceramics braces (that are clear and virtually unnoticeable), to clear plastic aligners that fit over your teeth and are invisible (commonly known as Invisalign). They can also attach braces to the backside of your teeth so they are hidden completely.

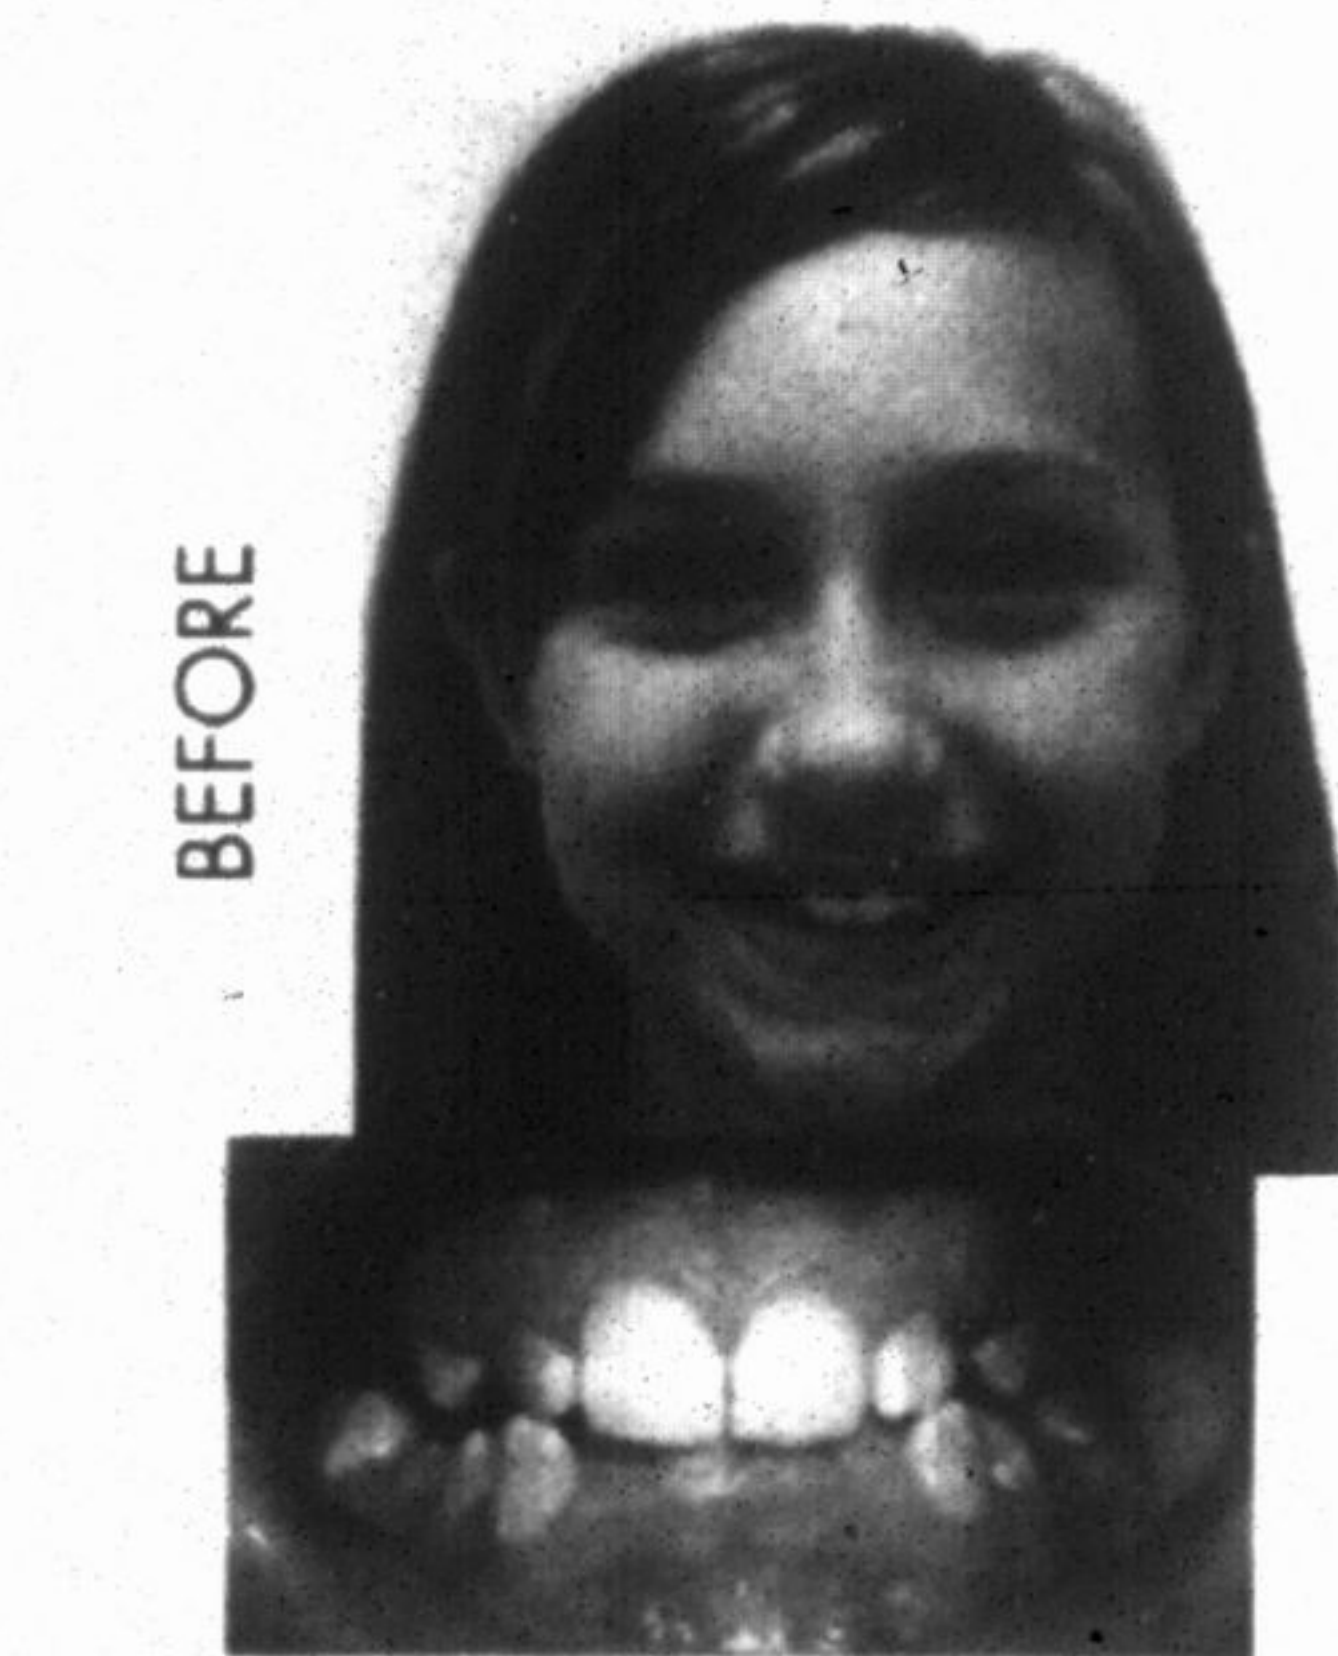

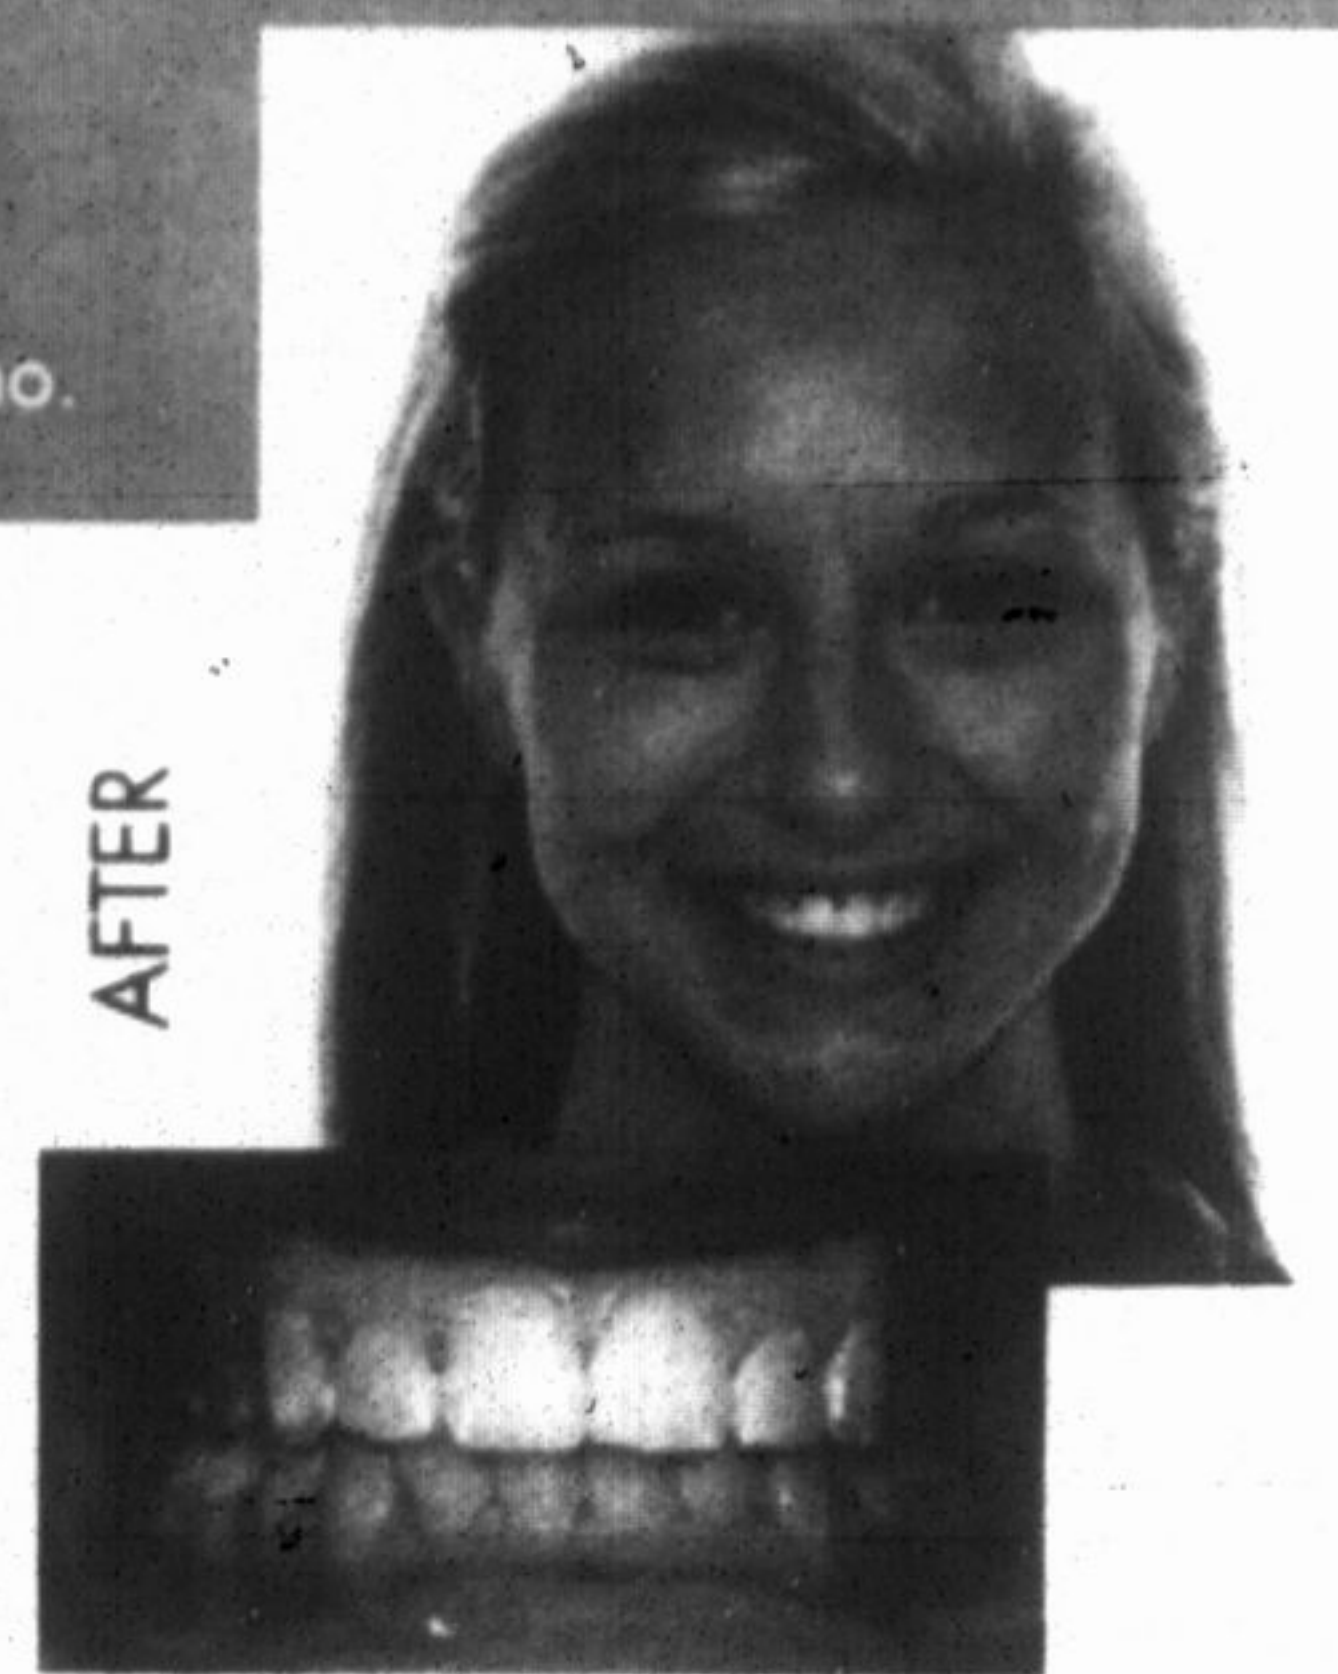

Each type of brace has a specific use and Dr. Lee and Dr. Antoniazzi can help educate you and tailor the most suitable treatment to fit all of your needs. **In fact, The American Association of Orthodontists recommends that every child have their first orthodontic check-up by age 7.** If you have a concern, you should see the LA Ortho team to ensure that your child's teeth, bite and jaw growth are all developing properly and in harmony. Adults should see LA Ortho if they have ever wanted to improve their smile, function or health.

Many people think that orthodontics is only for esthetics however orthodontic

treatment can have a dramatic effect on your overall health and quality of life. Benefits include: increase in self-confidence and self-esteem and improved function and ability to clean and care for your own teeth. **Dr. Lee and Dr. Antoniazzi are both Certified Orthodontists as recognized by the Royal College of Dentists of Canada and you will experience their team approach at LA Ortho.**

They have been updating the interior of the office and invite you to come by and see the new changes and renovations. They have already had the opportunity to be involved with the community with the Whitchurch-Stouffville Chamber of Commerce and with the businesses of Downtown Stouffville, They also believe it is important to be community-minded citizens and give back to the community.

**LA Ortho is accepting new patients. No referral is necessary and consultations are always complimentary, so contact them today to schedule your visit.**
