**The Progressive Montessori Academy** is very proud to announce the launch of its new bilingual program. Children will be learning skills in both English and French, in a non-competitive and nurturing environment.

Take advantage of your child's "windows of opportunity": sensitive periods in children's lives when specific types of learning occur. Scientists believe that language is acquired most easily during the first ten years of life.

Early stimulation sets the stage for how children will learn and interact with others throughout life. The PMA is committed to nurturing and developing a child's mind in all things related to work and play, now both in English and French.
