

Commissioner, Development & Infrastructure

A forward-thinking, dynamic urban municipality and one of Canada's most progressive environmental leaders, Newmarket understands that staying ahead of the curve is the only way we can impact the lives of our employees and our citizens. As an innovative leader on our team, you will be able to depend on us to continue fostering a culture that promotes initiative, learning and advancement. Join Newmarket and make a difference in your life, the lives of your team, and the lives of our citizens.

A track record of strong technical experience, demonstrated leadership, and significant strategic and interpersonal skills have prepared you to direct the Development & Infrastructure Services Commission. Your reporting departments (Public Works Services, Planning & Building Services, and Engineering Services) provide safe and efficient infrastructure that enriches the quality of life in the Town of Newmarket. As a collaborative member of Newmarket's Strategic Leadership Team, you will contribute to the corporate strategic direction while aligning divisional priorities and best practices that tangibly support and advance the community.

As a key liaison to Town agencies, departments and elected officials as well as other stakeholders including the public, you will build and grow relationships to achieve Town objectives together. Representing the Town in an advocacy role, you will respond to inquiries and provide recommendations in a manner that promotes positive outcomes. Your commitment to ethics and focus on fostering organizational accountability will ensure that goals, plans, and objectives are accomplished, and that all relevant agreements, budgets, regulations and legislation are adhered to. Demonstrating adept leadership and a motivational approach, you will ensure optimal coordination and delegation among your diverse team, building a strong and safety-focused culture. Moreover, your diligent attention to succession planning and collaboration will ensure that your great work is maintained over time.

Through strategic planning, successful transition management, and your experience in city building, you will lead Newmarket's development into an increasingly urbanized community, with a focus on upward growth. You are a seasoned project manager, with excellent organizational, analytical, problem solving, research and report writing abilities. Your exemplary communication abilities lend themselves to both the political arena and administration. Through excellent interpersonal, supervisory and negotiation skills, you have an impressive history of building teams, strong employee relations, and staff development. Your financial acumen and fiscal track record are strong, matched by experience in budget preparation and administration.

Candidates will be progressive leaders with experience in the municipal sector and urban environment, preferably holding Civil Engineering credentials. Advanced degrees in Planning, Business and/or Public Administration, and experience in related fields will be considered. For more information on the Town of Newmarket, please visit www.newmarket.ca.
