Beamax100™

Non-invasive, pulsed light
aesthetic treatment system

“There are three key elements in any aesthetic treatment system which are vital to the practitioner - positive treatment results, safety and cost-effectiveness. Beamax offers them all.”

Edgar Kaufman, M.D.
Aesthetic Specialist, AML Clinics

The Beamax100 is an advanced aesthetic treatment system designed for the cosmedics industry. Offering professional skin treatments for the aesthetic and anti-aging markets, it employs pulsed light technology for the following range of applications:

Hair Removal: Non-invasive, clean and relatively painless treatment for the permanent reduction of hair on any body area.

Typical regimen: 5-7 treatment sessions, spaced 4-12 weeks apart.

Skin Rejuvenation: Reversal of aging skin by creating neocollagenesis in the face, neck, upper chest and hands, improving skin homogenization, texture and glow to obtain a younger, fresher look.

Typical regimen: 4-6 treatment sessions, spaced 4 weeks apart.

Vascular and Pigmented Lesions: Effective treatment of a range of lesions, such as hemangiomas, PWS, solar lentiges, keratosis, age spots, telangiectasia, melasma and rosecea.

Typical regimen: 3-6 treatment sessions, spaced 4 weeks apart.

Acne: Ideal drug-free treatment of mild and moderate inflammatory acne.

Typical regimen: 8 short treatments over a period of 1 month to reduce papules and pustules by 60-65%.

Benefits

- ▣ Relatively small number of treatments to obtain results
- ▣ Effective solution for all patient types
- ▣ Cost effective
- ▣ Safe and reliable
- ▣ Compact and mobile
- ▣ Upgradeable to future clinic requirements
- ▣ Bizmax clinical, marketing and business maximization package
