LOCAL ITEMS.

Sutton is talking of introducing electric lights on their streets.

Mrs. W. A. Clark is very ill from inflammation of the lungs.

Monkhouse has just opened a line of fancy cambric shirts 50, 75c. & \$1.00

Granite iron ware in large variety and small prices at Silvester & Dougherty's.

Mrs. Alfred Johnson, who for some time has been in bad state of health, is going away on a few weeks visit

SHILOH'S CURE is sold on a guarantee. It cures Incipient Consumption. It is the best cough Cure. Only one cent a dose; 25 cts. 50 cts. and \$1.00 per bottle. Sold by G. Colford, druggist.

Report says that the peach crop in the Niagara District is practically ruined by the severe frost. Plums are said also to have suffered severely. Similar reports come from the State of Delaware.

Daniel Ritz, Proprietor and publisher of the "Hamburg, Ont. Independent" says, "I was suffering from Dyspepsia and liver trouble, I took a few bottles of Shiloh's Vitalizer and it cured me. I can heartily commend it." Sold by G. COLLARD, druggist.

We are asked what is the pronunciation of the name Roentgen, also what is meant by the "X rays." The pronunciation is as if spelled Runtgen, the "g" being sounded hard as in "give." As the letter X is used in algebra to designate an unknown quantity, so in regard to the Roentgen ray it is used to designate their unknown properties.

Several towns in Vermont are considering projects for securing electric light, heat, and power by transmitting the energy of waterfalls and mountain streams in their vicinity, on the plan so successfully tried by several California towns. In some Pacific coast towns the power is transmitted distances of from ten to thirty and more miles. Many Vermont towns can secure adequate power within less than a dozen miles.

A CAUTION! A WARNING!
If, on blowing the nose in the morning, lumps and flakes are discharged colored with blood, especially on one side, lose no time in applying a remedy. Catarrh of the very worst kind has become seated, the walls are sore and full of small ulcers, and if not soon cured will be hard to cure and eradicate. "A stitch in time saves nine." Try Chase's Catarrh Cure.

Last Monday evening Rev. Dr. Williamson of Ingersoll delivered his lecture on "Fox Hunting or hotshot for Common Follies" under the auspices of the Epworth League. A large audience assembled to listen to Rev. Dr. Williamson, and he held their undivided attention from start to finish. The lecture was humorous anecdotal and eloquent and many hard bits were given to the common follies of society. The lecture was thoroughly enjoyed and a hearty vote of thanks was moved and seconded. The pastor occupied the chair and the choir rendered a number of fine anthems in grand style.

Two thirds of all the letters which pass through the post offices of the world are written by and sent to people who speak English. This evidently points to the fact that English is fast becoming the general medium of communication of all nations. As a great commercial force their language and their colonies force their language on all with whom they have dealings. Besides, no language so readily receives fresh supplies to its vocabulary so as to adapt it to all the new and varied circumstances that may arise. Those who imagine that the French language is gaining ground in Ontario may rest assured that the business of Canada is largely done in English and will eventually be all done in that language. In these times of close competition every unnecessary expense will have to be lopped off, and the day is not far distant when French as a commercial medium will become obsolete.

THE LASH—The time was in the history of England that this method of punishment was adopted in many public feeling became so much opposed to it that it was almost altogether discontinued. Owing to the frequency of indecent assault in Ontario and the fact that imprisonment is not a sufficient deterrent the "cat" is again being resorted to. The criminal who walks into prison as a second home, will assume the blanched cheek and terrorized countenance when a few strokes of the lash are added. Some there are who say that this mode of punishment is barbarous, but they forget that the crimes for which it is prescribed are of a heinous character and subversive of the well-being of society. The person who keeps good company and acts in accordance with the dictates of his own moral nature will never be subjected to this ignominious punishment.

We would also suggest its employment in cases of persistency in petty theft and whose repeated incarceration fails in its object. Shorter terms of imprisonment with the judicious infliction of this corporal punishment would in a short time much lessen the commission of many minor offences and be a financial gain as well to the law-abiding portion of the community

R. Wilson jr. of Toronto, visited in town this week.

D. Ramer, of Cedar Grove, visited A. R. Floury on Sunday.

Have you seen the dandy black worsted suit Monkhouse turns out for \$14.00?

For Sale or to rent—a new brick house with modern improvements, apply to J. A. Todd Stouffville

Harv. Langster, who has been attending the Philadelphia Dental College, arrived home this week.

Sarah Herbert, of "Winnipeg" Man. says: "I was cured of my general debility and better keeping quality of my blood and less water. After trying everything in its power, I took a few bottles of Shiloh's Vitalizer and it cured me. I can heartily commend it." Sold by G. COLLARD, druggist.

Mrs. and Mrs. Spofford went to Buffalo on Monday, being summoned thither on account of the serious illness of Miss White, Mrs. Spofford's sister.

WANTED.—To rent or to buy a cheap house in Stouffville, west of the Presbyterian Church. Possession to be obtained about April 1st, 1896. Apply to W. Reynolds, Glasgow.

A smooth tongued shoddy man has been victimizing a number of clergymen and others in the vicinity of London. He represented himself as the agent of an English manufacturer of a special line of black goods, and had arranged with a London tailor to have the garments made up at a very low rate. If people will persist in dealing with these fakers, instead of reliable merchants, they must put up with the consequences.

15 years of itching
Wm. Golding, commercial traveller 150 E. St. Toronto, says: "For 15 years I suffered untold misery from Itching Piles, sometimes called pin worms. Many and many weeks I had to lay off the road from this trouble. I tried eight other pills and ointments and so called remedies with no permanent relief to the intense itching and stinging, which irritated by scratching would bleed and ulcerate. One half a box of Chase's Ointment cured me completely.

China is at last waking up. She has engaged the services of a lot of European military officers, who will try to bring the army up to some sort of discipline and effectiveness. She is going to build roads wide enough for two vehicles to pass each other, and for the first time in her history will be heard the voice of the teamster on his way to market. The new railroads now existing are to be repaired and others are to be built. Telephones and telegraphs are to spring up, and magical changes are to take place.

An act to amend the Judicature Act and the law relating to the Superior Courts has been brought down by the Attorney-General. This act contains a number of amendments made in anticipation of the revision of the statutes. Among other things, it is provided that all actions against municipal corporations in respect to injuries sustained through non-repair of streets, roads or sidewalks shall hereafter be tried by a judge without a jury, and enables peace officers against whom actions are brought to have the same security for costs as police magistrates or justices of the peace.

There were 118 homicides in Chicago during the year ended December 31, 1895. Whisky and jealousy caused the most of them. For total depravity and atrocity some of them equaled any crimes since the days of Cain. Others in which despondent or insane parents killed their families and then killed themselves, excite pity more than censure. A number of the homicides proved to be acts of self-defense and the slayers were exonerated from blame by the grand and coroner's juries. But one murderer was hanged during the year, Harry Lyons, October 11, for killing Albert B. Mason. Two are under sentence of death for murders committed during the year. Henry Foster, colored, and John O'Neil, twenty murders escaped arrest, and 12 were found "not guilty" by juries. The figures seem to show the practical abolishment of capital punishment in Chicago.

How A MORTGAGE WORKS.—A mortgage makes a man hustle and it keeps a man poor. It is a strong incentive to action, and a wholesome reminder of the fleeting months of a year. It is an emblem of life in its meaning as the hour-glass and scythe that means death. A mortgage represents industry because it is like a bosom friend because the greater the adversity the closer it sticks to a fellow. It is like a brave soldier for it never hesitates at charges, nor cares to close in on the enemy. It is like the sand bag of a thug—silent in application but deadly in effect. It is like the hand of Providence—it spreads all over creation, and its influence is everywhere visible. It is like the grasp of the devil fish—the longer it holds the greater its strength. It will exercise feeble energies, and lend activity to a sluggish brain; but no matter how hard debtors work the mortgage works harder still! A mortgage is a good thing to have in a family—provided, it is in someone else's family.

Minaard's Lintment is the best Hair Restorer.

Monkhouse has a line of sample top shirts cheap, 40 to 75c. each.

Call and see W. H. Todd's new cutters and sleighs, the best stock in the county, at reasonable prices.

Jacob Burkholder sold one of his lots on O'Brien avenue to Frank Fockler. This deal looks like another new house soon, Frank.

CAPTAIN SWEENEY, U. S. A., San Diego Cal., says: "Shiloh's Catarrh Remedy is the best medicine I have ever found that would do me any good." Price 50 cents. G. COLLARD, Drugist

DANGER OF PROPERITY.—Notwithstanding the dangers of prosperity and the severe test it brings to our spiritual subjects, we must give that in our own minds which we all the truer and more we wish to realize our day dreams. But the attainment would bring unexpected trials to faith. The best part of life—the real gain of it—is in the struggle and aspiration rather than in the attainment.

North Adams continues to be puzzled over a queer crankiness of electricity in its vicinity, although when the great four and a half mile Hoosac Tunnel was built no ores magnetic or otherwise, were encountered, there was a general expectation that rich ore pockets would be found, yet, for an unexplained reason, not an electrician has been discovered who can send a telegraphic message on a wire running from portal to portal of that tunnel. So such wire run inside of ocean cable through the huge cavern or out of it therefore, such message has to be sent on wires strung on poles over the top of the mountains, fully nine miles, and that is the way of going and out-going passenger and freight trains are heralded to the keepers of the two tunnel approaches.

On the 6th day of April, prox., the Olympic Games, once so much renowned in ancient Greece will be reviewed. The stadium in which they were anciently held in the valley of Elis in Greece and which for years has been lying in ruins, has been restored by the munificence of a wealthy Greek gentleman. It is 655 ft. long, 100 ft. wide and has 25 ranges of seats and will seat 50,000 spectators. The seats, steps &c. are built of stone from the Parnassus and of Pentelic marble. The games will be of an international character and will include athletic sports both ancient and modern. The games date its chosen because it is the anniversary of the 75th year of Greek independence. The games will continue for five days and will be presided over by H. R. H. the Crown Prince of Greece. The next series of international contests will be held in Paris in 1900.

YOU CAN BELIEVE
The testimonials published in behalf of Hood's Sarsaparilla. They are written by honest people, who have actually found in their own experience that Hood's Sarsaparilla purifies the blood, creates an appetite, strengthens the system and absolutely and permanently cures all diseases caused by impure or deficient blood.

Hood's PILLS for liver and bowels, act promptly, easily and effectively.

James H. D. A. Foulds, of Aurora, is being sued by his wife for \$30 a week alimony. They were married on Nov. 17, 1887, and lived happily together until five years ago, when Mrs. Foulds, says, her husband began to ill-treat her. She accuses him of using violent language to her and also of assaulting her without provocation. On Feb. 25 last, she says, he threw her out of the house, beat and kicked her and left her lying insensible on the ground. She alleges, moreover, that since then he refuses to support her. Foulds denies the story. His wife claims that he owns \$7000 worth of property and \$16,000 worth of Manchester Ship Canal shares, besides having an income.

Mr. Nikola Tesla, the celebrated electrician, has been further experimenting with the X rays, and has secured radiographs showing the bony structure of birds and rabbits, even to the hollow of the bones. He has secured a radiograph of a rabbit after an hour's exposure, in which not only every detail of the skeleton is visible, but also a clear outline of abdominal cavity. The location of the lungs and the tur are also shown. In another instance an exposure of forty minutes gave a radiograph of the human skull, showing clearly not only the outline, but the cavities of the eyes, chin, cheek, nasal bones, the lower jaw and connections to the skull, the flesh and even the hair. "By exposing the head to a powerful radiation," Mr. Tesla says, "strange effects have been noted. For instance, I find that there is a tendency to sleep and the time seems to pass away quickly. There is a general soothing effect, and I have felt a sensation of warmth in the upper part of the head. An assistant independently confirmed the tendency to sleep and a quick lapse of time. Should these remarkable effects be verified by men with a keener sense of observation I shall still more firmly believe in the existence of material streams penetrating the skull. Thus it may be possible by these strange appliances to protect a suitable chemically into any part of the body.

A nice line of night robes at Monkhouse's.

W. McKay and his sister Miss Louise of Almira, visited in town on Sunday.

S. H. Griffin is opening up a new boot and shoe store in Todd's block, west end, Stouffville. Read advertisement in another column.

It may be only a trifling cold, but neglect it and it may fasten its fangs in your lungs and you will soon be carried to an untimely grave. In this country we have sudden changes and must expect to have coughs and colds. We cannot avoid them, but we can effect a cure by using Bickel's Anticongestive Syrup the medicine that has been known to fail in curing coughs, colds, bronchitis and all affections of the throat, lungs and chest.

In our part of the world is the proportion of births to the population is decreasing so rapidly as in Ontario. Again the percentage of marriages in relation to population has decreased so rapidly that it has become a problem of much gravity. In this connection it is interesting to note that in France during the past two years the population has actually decreased by 15,000. It looks as though the tax on bachelors will have to be reimposed.

Coke is becoming an important industrial agent. It artificially ages liquors, removes the effect of oily beans in coffee, and improves tobacco. In its late application to the rapid seasoning of wood for sounding boards and musical instruments, it increases the resistance of the wood to temperature and moisture, and adds to its acoustic qualities. It thickens linseed oil for linoleum in a few days whereas the old method of oxidation often took several months. It bleaches linen in less than a third of the time required by sunlight. It is also valuable in chemical and technical processes, especially in purifying starch derivatives from undesirable color, odor and taste.

STILL ANOTHER TRIUMPH—Dr. Thomas S. Bullen, Sunderland, writes: "For fourteen years I was afflicted with Piles; and frequently I was unable to walk or sit, but four years ago I was using Dr. Thomas' Electric Oil. I have also been subject to Quinsy for over forty years, but Electric Oil cured it and it was a permanent cure in both cases as neither the Piles nor Quinsy have troubled me since."

THE JUDICIAL OATH.—From time immemorial this method of attesting to the truth has been adopted. Originally, perhaps, it was voluntarily employed to intensify the truthfulness of statements made, or the veracity of persons resorting to it may not have been of a very high order. Therefore they call to witness the Great Jehovah, which they would be supposed scarcely to dare if about to utter a falsehood. It is bad enough to lie in the ordinary way of conversation, but to tell an untruth, calling upon the Author of our being to witness, is most deplorable. The evidence of perjury is nearly always difficult to obtain owing to the fact that every person is liable at times to be mistaken and one may conscientiously make a statement under oath and be telling what is not the fact. Should such a person be liable to an action for perjury no witness would be willing to state anything positively under oath for fear of prosecution in case he were mistaken. However, if the oath or its equivalent, affirmation, is to be employed every precaution should be taken to impress those taking them with their awful solemnity, and not administer them in the usual flippancy manner so common in some of our courts. The idea of uttering a falsehood in the face of an Omnipresent All-Powerful and Omniscient, Ruler of the universe, and contemplating to summon our Great Benefactor to witness detestable untruths is too horrible to even imagine. Falsehood may deceive fallible mortals but woe to the moral and spiritual advancement of the man who lies in the presence of his God. No more effectual course could be adopted to shut out from the soul the light of God's Spirit, without which this earth to mortals would be an incipient perdition.
