ough up its render it necessary.

filling a consumptive's grave, when, by the timely use of Bickle's Anti-Consumptive Syrup the pain can be allayed and the danger avoided. This syrup is "pleasant to the and unsurpassed for relieving, healing and curing all affections of the throat and lung, coughs, colds, bronchitis, etc.

On Tuesday two gents in a top buggy and leading another buggy behind went eastward along Main St. but they had not proceeded many rods until the one at which they sat dissolved partnership with the running gear and gravitation did the rest. It reminded us of Pat when he fell from a third storey window, he said the fall did not hurt him it was the stopping too quick. The horse seemed to regard this as part of the program and went leisurely forward till caught.

It is suggested that the success of the free silverites in the United States would mean disaster to American Insurance Companies doing business in Canada. They are at present doing about 31 per cent of the insurance business of the Dominion. Most of their policies have no provision for their payment in gold, which would mean a tremendous discount in case free silver succeeds in the United States. The probabilities are, however, that all such companies will guarantee payment of the policies in gold rather than lose their large and profitable Canadian business.

HEALTH RETURNS—Under the act relating to the registration of births, marriages and deaths, passed by the Ontario Legislature in 1896 the Division Registrars or Clerks of the several municipalities in the Province are required to make a return to the Registrar General on or before the 5th day of every month of all deaths registered by them during the month as being caused by the following contagious diseases, viz: Smallpox, scarlatina, diphtheria or croup, measles, whooping cough, typhoid fever or malaria and tuberculosis. The act went into force on the first of June, 1896, and the first returns have been made for that month. Out of 745 municipalities in the province, 365 sent in reports. The other 380 made no returns, either through ignorance or as a consequence of a literal construction of the act, which does not really require registrars of municipalities in which no deaths occur to make reports.

## Special sales every Saturday night

in neckwear at Monkhouse's NORWAY PINE SYRUP cures Coughs, Colds, Hoarseness, Croup, Asthma, Sore Throat and Lung troubles.

For Sale or to rent—a new brick house with modern improvements, apply to J. A. Todd Stouffville.

John Macdonald, S. Cook and T. E. Holden started on Tuesday for Huntsville on a prospecting trip to the prairie to engaging in this season's cattle trade.

COUGHS AND COLDS lead to consumption if neglected. Dr. Woods' Norway Pine Syrup cures quickly and pleasantly. It is a natural remedy for a throat and lung troubles.

J. W. Turner a few days ago had a mishap with his team on the 8th of Whitechurch. The neckyoke strap gave way, letting the tongue down, and he had to run the team into the fence to stop them.

The state of affairs in South Africa becomes grayer. The British forces were forced to retire from a pass in the Matopos Hills owing to a well directed fire by the enemy from the caves studding the mountain. In consequence of this repulse it is said that more Imperial troops have been telegraphed for.

## TO RENT.

On Stouffville St., Stouffville, opposite C. Armstrong's, good frame house, 1 of an acre of land on which is a good orchard, plenty of hard and soft water, rent very reasonable. Apply at the residence of Thos. Lewis, Altona, or Ab. Davis, Stouffville.

DENTISTRY—If you want teeth carefully extracted and with the least possible pain call on Dr. Smith, above Spofford's Block. Gold filling, crown and bridge work and every modern method of attending to the teeth scientifically and thoroughly performed. Every appliance on hand for executing the most perfect work.

Mrs. Harry Pearson, Hawtreay, writes: For about three months I was troubled with fainting spells and dizziness which were growing worse, and would attack me three or four times a day. At last my husband purchased a bottle of Northrop & Lyman's Vegetable Discovery has done for me. I then procured another, and before it was used my affliction was completely gone and I have not had an attack of it since.

How short-lived are the animosities of nations! A few months ago there was no epithet too harsh for the German Emperor. He was gibbeted in music hall ditties, he was rallied at in the press, and in society unrepeatable things were said of him. Now there is a distinct revival of the paterfamilias "blood being thicker than water," and we are rapidly returning to the conclusion that the Kaiser is a splendid fellow. The naval architects toasted him with enthusiasm, and with happy tact the master of many legions has sent a gold wreath to the First Royal Dragoons, of which he is colonel, to remind England that Prussia fought by her side at Waterloo. The truth is that the loves and hates of nations are founded, not on kinship, nor on history, but on self interest, and as this changes public feeling changes too.

THE RUSSIAN Government is making rates for through travel on the trans-Siberian railway that threaten to interfere very seriously with travel by steamer through the Suez Canal to ports of China and Japan. The journey from Moscow to Vladivostok will cost \$56 first class, \$34 second class, and \$22 third class. The time needed will be 12 days and 15 hours, for express trains only 9 days 11 hours and it is to be expected that eventually it will be reduced to 7 days and 14 hours. If we compare these charges and length of time with those of the steamers which now connect us with Western Europe, either via the Suez Canal, or across the American Continent, the enormous advantages of the Siberian line become evident. The quickest possible trip from London to Yokohama, via Brindisi and the Suez Canal takes at least 88 days. If the route across the American continent is taken 10 days may be saved, as it takes only 8 days to reach Quebec; the Pacific line will take you across the continent in 6 days, and 11 days more are needed to cross the Pacific ocean. When the Russian line is constructed through Manchuria to the Yellow Sea, the route to China will be shortened to such a degree that the journey from Moscow can be easily accomplished in a week. The Siberian Railway is a very costly undertaking, but it may soon become the greatest highway of Commerce in the world. The advantages are always in favor of a water route because of the low freight rates, but the low tariffs prepared for the new railway must prove to be very attractive.

## Mrs. Toole, of Toronto, visited at J. Bray's.

Dr. Low's Worm Syrup removes worms of all kinds in children or adults. Children cry for it.

BACON—For sale a quantity of farmers' dried meat. Geo. Silvester, Ringwood.

Market Drug store is the place to get pure English Paris Green, pure Hellbore and insect powder.

Mrs. Wells, L. D. S., will be in her office, Mission House, Stouffville, professionally on Thursday, August 13, 1896.

The second annual camping-out of the Christian Church in Ontario is now being held at Morton Park and will be closed on Sunday next.

Why do judges of good Chewing Tobacco insist on getting genuine BEAVER Plug? It has no equal. Refuse cheap imitations. Sold by A. E. Gilbert & S. M. Warriner.

We regret to state that Mrs. J. Wilnot Brown on Wednesday of last week got one of the bones of her arm broken near the wrist, but hope she may soon recover the full use of it again.

The Hurontario Electric Railway will likely yet be an accomplished fact. A party of engineers left Toronto last week to go over the ground between Port Perry, Walkerton, Kincardine and Godrich. It is expected that part of the work will be completed in about 60 days, and track-laying will then be proceeded with.

It is stated that the Spanish Government have paid the enormous price of £700,000 each for the two war vessels recently bought at Genoa, while a contract has just been given for two torpedo boat destroyers at £200,000, which was dearer than the tender of a first-class English firm, on the ground that quicker delivery would be secured. Nothing short of a panic can explain such extravagance.

The following from the London Globe in reference to United States politics is significant:—"There is a clear issue between the gold standard allies to extreme protection, and free coinage couple with consociatory socialism. Whether McKinley or Bryan is elected British interests are bound to suffer. While the victory of McKinley is certain to harass our trade with the United States, that of Bryan could not fail to produce a financial convulsion which might shake the old world to its very foundation.

In returning from the Baptist Church Sabbath School last Sunday afternoon S. George, wife and child met with what might have proved a serious accident. As soon as the horse got on Main St. he began a brisk trot and one of the lines having slipped to a certain extent through Mr. George's hand, he in endeavoring to hold the animal up, drew it to the ditch and buggy and horse were upset therein. Mr. George and their child escaped without injury, but Mrs. George was considerably injured on the left side. However she is improving nicely and we hope she may soon be fully recovered from the results of the mishap.

The Scientific American has reached the mature age of fifty years. It is therefore with commendable pride that its editors and proprietors have prepared a special anniversary number, with four times the usual number of pages, to celebrate the occasion. The number contains reviews of the progress made in the last fifty years in the sciences and the arts, gives historical sketches of some of the most notable inventions made during this period and is filled with interesting illustrations. Among the subjects treated are The transatlantic steamship, naval and coast defence, railroads and bridges, the sewing machine, Photography, the phonograph, telegraph, telephone, iron and steel, physics and chemistry, progress of printing, the bicycle, electric engineering, telescopes, ocean telegraph (portraits), shipyards of the United States, a large group of distinguished inventors, reproduced from an old steel engraving, is presented. The anniversary number is provided with a characteristic cover, and is printed in a style fully up to the regular issues of the paper. It will doubtless be generally preserved for future reference. A very large edition of this interesting number is being issued. All articles have been contributed by specialists, and are of great value as a work of reference. In size, this issue is equivalent to an ordinary sized book of 442 pages. Subscription price, \$3 per year, or for the special, 10¢ a copy. Munn & Co., Publishers, New York.

## Milburn's Beef Iron and Wine is recommended by Physicians as the best.

Jacob Burkholder left on Tuesday to visit old friends in Michigan and Indiana.

WANTED—A strong girl for general house work, immediately. Apply to Mrs. Reid, Church St.

The probabilities are that the Methodist church will for the future be lighted by electricity.

Mr. C. W. Malloy, B. A., late headmaster of Lucan High School, has been employed as headmaster of the Aurora High School.

W. D. Townley, acting postmaster at Sutton, died very suddenly of heart failure at the depot while waiting for a special train to come in about 9 p. m., on Thursday July 16th inst. Deceased was local agent for the Montreal Telegraph Co. since its lines were extended to Sutton and has been acting postmaster for the last twenty years.

Sleeplessness is due to nervous excitement. The delicately constituted, the financier, the business man, and those whose occupation necessitates great mental strain or worry, all suffer less or more from it. Sleep is the great restorer of a worried brain, and to get sleep cleanse the stomach from all impurities with a few doses of Parolee's Vegetable Pills, gelatine coated, containing no mercury, and are guaranteed to give satisfaction or the money will be refunded.

The hearing of the arguments and suggestions for the division of Ontario County into electoral districts for county council elections will take place at Whitby on Monday, Aug. 3rd before Judges Dean, of Lindsay, and Benbow of Port Hope. In all probability when this division is made some new reform will be anticipated, chief among which is the prospect of a strong majority in favor of a house of refuge.

The present system of Danish dairying is based upon keeping much the greater portion of the land in grass, while the balance is employed in raising soiling cows. The cows are very generally tethered in the pastures, thereby saving much waste from the trampling of the grass and from the unnecessary wandering about of the animals. It is an interesting sight to witness a herd of 50 or more cows tethered in a straight line across the field with military precision, and mowed in advance twice each day. The saving amply repays the labor. At six o'clock they are taken to their stalls and fed the green crop that may be ready for them, while the bran and oil cake are usually fed in the morning. For winter feeding mangolds are generally grown, and cabbages are extensively fed in the autumn. Nearly all the butter is made in creameries where the farmer receives 24 cents a quart for his milk. The regulations for the production of milk are very stringent.

ARMY WORM—A despatch from Guelph says that the fields in which the army worm has been working at the Guelph Agricultural College are now being cut, and the damage is much greater than was first supposed. The first field cut was a crop of barley lying west of the lawn, just over the Rock road. The worms had taken nearly all the leaves off and most of the awns, but the grain was not so much injured. The next was a field of twenty acres of Siberian oats, a beautiful crop looked at from the road, but scarcely a leaf was left on the field, and from the greener stalks every oat was stripped. Mr. Rennie, the farm Superintendent, estimates that there are from 15 to 20 bushels of the oats cut off by the worms and left upon the ground. Next the oats is a field of spring wheat, also very much injured. Mr. Rennie cut a swath of oats on one side of the field next to a crop of turnips, and by using Paris green destroyed a great many of the worms near that side of the field. They seemed to gather on the cut grain during the night and feed upon it. Now that the oats are cut and in the shock, thousands may be seen upon the sheaves during the night and early morning. The worms seem to cut off the heads, and when a sheaf is lifted and shaken the oats fall to the ground. The cut oats lie thick over the ground, and are mixed with the droppings from the worms which resemble millet seed, and are everywhere over the field. The late cuts are much injured, and some farmers have cut the green oats and covered them like hay. It is said that if common salt be laid in a train on the ground so that the worms would require to crawl over it, enough salt would adhere to them to cause death.
