Shame on that farming overcome, or that it will not pay the farmer to overcome them. That philosophy should hang its head in a shady place which teaches that after all our and dirt, and if they are not provided noxious weeds de not work much harm. with a cap a wooden plug can easily be prefecture of police on Friday. Anar-At the risk of being called enthusiast and crank and alarmist. I cannot refrain am yet alive to hit up my voice against commor tools will be needed, and a spiracy against the czar.

The amazing indifference of the way here banch on which to do a great deal A mass meeting of Cork the prevalence of weed life is is umply blocked near the bench, preferably, cent dynamite outrage in Dublic the reshocking to contemplate that a weed is more than a match sometimes for a man, and it is humiliating to think that pestiferous weed life is found more than a match for a greatly progressive agri-

It need not be so. This continent infest this continent not more probably than a score are able to stand up against cultivation for their eradication. Of all the forms of weed life in the | ful.-Am. Agriculturist. West which are troublesome and greatly aggressive ragweed is the worst. I would unhesitatingly crown ragweed king among the abominable weed pests that harrass the western farmer. Your papers frequently sound the alarm against the ingress of that misnomer

the Canadian thistle, but which of them is found urging your people to carry on a war of extermination against ragweed? Far be it from me to say one word that would lead your farmers to look upon the invasion of the Canadian thistle with indifference, but I am free to say at the same time that I regard regweed as a far worse fee to fight than the Canadian thistle. The Canadian thistle can be completely eradicated in two years and without the loss of one paying crop. This cannot be said of ragweed when it has once got a firm

It is not the purpose of this paper to give the modes of obliterating the more noxious forms of weed life. To do that would be to write a volume. My object is to sound the alarm in the hope of drawing attention to the question. But it may accomplish things which, if but generally practiced will accomplish much in reducins weed life. Thousands and tens a mousands of sheep may be given the portunity to turn there into mutton to feed the propertunity to turn there into mutton mover may be run over the pastures of the doc which was Fink.

The portunity to turn there into mutton mover may be run over the pastures of the doc was a fink of the doc was a fink.

Bagging Attachment For the Chatham Mill.

Just received a carload of those fam us-mills which farmers can secure at reason able prices. This machine is complete in every respect and will give the best satisfaction to those who use it. The manner of driving the barging attachment was recently much improved. It is now driven by a chain belt that will not slip nor come of the pullies. Anyone who has once used it would on no consideration go back to the old style of mill It distances anything of its kind on the market. A few points in its favor are these: -1st-It runs very easily. 2nd-It tak s up v fy little extra room on the floor. 3rd -- Fourteen inches square space on the floor will hold the machine, and any farmer can spare that from his barn or granary 4th - Will bag any kind of grain from the forest seed, such as timothy or clover, up to the coarsest grain and bushel or corn. 5th-Will bag from 60 to 80 bushels of wheat product, and 100 bushel of oats per hou . 6th-Your grain does not go to the floor, thereby saving conside waste. 7th-Two men with the Bagger will do as much work as three men wi Special out a for cle g alsike.
