Ninth Line report due

BY ALI RAZA
aliraza@yrmg.com

Town council will receive a staff report regarding a gravel pit on Ninth Line at its next meeting on Aug. 23.

The site — 14245 Ninth Line, Concession 9, part of Lot 14 — is home to a large pit that was previously used in a gravel extraction program by the Ministry of Natural Resources. The MNR's licence has been surren-

dered and the current operator of the site is requesting an amendment that would allow a limited number of pre-approved contractors to temporarily stockpile excess fill in a restricted area of the site.

Currently, the operator imports clean fill for the gravel pit under the town's site alteration by-law 2014-101-RE. The current plan requires an assessment of each source site of excess fill

to the property. While the regulation works for large-scale infrastructure projects that generate the bulk of excess fill, it is not practical for small-scale construction projects that take days to complete, a press release from the town says. The town will test all sources of stockpile to meet standards of acceptable quality. A public information centre was held on June 23.
