Do You Suffer From

Nerve Pain

ADVERTORIAL

3. Sensory nerves. These nerves relay information from your skin and muscles back to your spinal cord and brain. The information is then processed to let you feel pain and other sensations.

Because nerves are essential to all you do, nerve pain and damage can seriously affect your quality of life.

What Are the Symptoms of Nerve Pain and Nerve Interference?

With nerve interference there can be an wide array of symptoms. Which ones you may have depends on the location and type of nerves that are affected. Interference can occur to nerves in your brain and spinal cord. It can also occur in the peripheral nerves, which are located throughout the rest of your body.

Autonomic nerve interference/pain may produce the following symptoms:

- Too much sweating or too little sweating
- Lightheadedness
- Dry eyes and mouth
- Constipation
- Bladder dysfunction
- Sexual dysfunction

Interference to motor nerves may produce the following symptoms:

- Weakness
- Muscle atrophy
- Twitching, also known as fasciculation
- Paralysis

Sensory nerve Interference may produce the following symptoms:

- Pain
- Sensitivity
- Numbness
- Tingling or prickling
- Burning
- Problems with positional awareness

In some instances, people with nerve interference will have symptoms that indicate interference to two, or even three, different types of nerves. For instance, you might experience weakness and burning of your legs at the same time. To further complicate matters we don't all develop the same way and different un-expected nerves can cause similar problems. This has made it very difficult to diagnose disorders caused by nerve interference based on which nerve "should" cause what.

That is, until now...

In Markham/Stouffville, you can get your nerves scanned/checked for nerve interference at Elite Care Chiropractic.

Your invitation for a comprehensive consultation and examination to pinpoint the cause of your nerve interference/pain.

All you have to do to receive a thorough diagnostic examination and a comprehensive easy to understand report on your state of health is call 905-554-8444.

Mention this article (CODE: NER5444) and they will happily reduce their usual consultation fee of \$167 to just \$27.

But hurry, for obvious reasons – this is a time limited offer.

Don't suffer a moment longer...

Find out what is causing your nerve pain/interference, book a consultation now by calling 905-554-8444, they are waiting to take your call today.

Over the years, they've treated thousands of patients with nerve pain/interference. The vast majority of them have enjoyed superior, lasting relief. In fact, many who've suffered and have tried other remedies have told them they gave them back their lives!

Call them now and get a full and thorough examination to pinpoint the cause of your problem for just \$27, the normal cost of such an exam is \$167 so you will save \$140!

Call them now on 905-554-8444 and cut out or tear off the valuable coupon below and take it to your appointment. You'll be entitled to a comprehensive examination to diagnose the cause of your problem – and you'll be on your way to safe, lasting relief! Don't delay your important diagnosis and treatment another moment!

You can even call on the weekend and leave a message on their answer machine to secure your spot as they promise to return all calls; and during the week they are very busy, so if they don't pick up straight away do leave a message. So call now on 905-554-8444 and quote this special discount code: NER5444.

For obvious reasons they can't help everyone at this reduced price, so please call soon to secure your special opportunity.

Your nerve system is involved in everything your body does, from regulating your breathing to controlling your muscles and sensing heat and cold. Because your nerve system is so critical for your health when things go wrong with it you may experience excruciating pain and/or some very strange symptoms...

There are three types of nerves in the body:

1. **Autonomic nerves.** These nerves control the involuntary or partially voluntary activities of your body, including heart rate, blood pressure, digestion, and temperature regulation.

2. **Motor nerves.** These nerves control your movements and actions by passing information from your brain and spinal cord to your muscles.
