### Focusing on the Needs of Individuals

Edward Jones has maintained one focus: to help individuals build financial security and progress toward their investment goals. Together with our affiliates in the U.S. and U.K., we serve investors from more than 8,700 offices, each operated by an investment professional and a full-time service and support professional.

Edward Jones provides a combination of quality investments and highly personalized service that is unique in a world where financial advice is increasingly impersonal. Our focus is on individuals, families and small business owners and we're ready to meet with our customers where and when it's convenient for them.

### Your Investment Success is Our Number One Priority

Edward Jones believes everyone's financial situation is unique. While many investors do share common goals (like saving for their children's education expenses, building a nest egg for retirement or earning a higher income in retirement), they all have different situations to consider throughout their investing years. That's why your local Edward Jones investment representative is committed to taking the time to listen to you and to learn about your specific goals before making recommendations.

Our customers' goals are as unique as they are, but Edward Jones investment representatives share a single goal - to help people like you.
