

Cured of Piles,
Saved From Knife.

Mrs. Anton Meek, of Savannah, Ga., writes: "Ever since the birth of my first child, six years ago, I have suffered from piles; I could not bring myself to bear the thoughts of a surgical operation. Pyramidal Drug Co. sent me a sample of their piles, causes and cure, by air mail. I am now cured, and thank you all my druggists. 'Piles, Causes and Cure' mailed free. Pyramid Drug Co., Marshall, Mich."

Carpets,

Rugs,

The Great English Remedy.
Sold and recommended by all druggists in Canada. Only sell
it to those who are genuine to care all
forms of Mental Weakness, all effects of abu-
sion, and all forms of debility. It is also
a specific for Asthma, Coughs, Catarrh, &c.
Bacon, Oysters or Shrimps. Malted rice
receipt of one package daily. It will
be sent to any part of the world, free of charge.
The Wood Company, Windsor, Ont.

Wood's Phosphidine is sold in King-
ston by all responsible druggists.

MR. M'INTYRE IS CHAIRMAN

FILLS OFFICE FOR A SECOND TERM.

Inaugural Meeting For 1902 of the Board of Health—The Spread of Diphtheria And Cause Thereof—Princess Street Sewer Extension Again Reviewed.

The inaugural meeting for 1902 of the board of health was convened Wednesday afternoon in the city clerk's office. In attendance were John McIntyre, K.C., Cape Gaspé, J. D. Thompson, J. H. Robinson, J. D. Thompson, W. J. Simmonds, medical health officer for and sanitary inspector Gordon.

Upon motion of R. Meek, seconded by J. D. Thompson, John McIntyre, was re-elected chairman. Mr. Meek made passing reference to the efficient work performed last year by Mr. McIntyre.

In accepting office, Mr. McIntyre returned thanks but refrained from making an address, asking his colleagues to consider that he had spoken twice hours in offering their thanks.

Regarding iron pipes purchased for extension of Queen's and Princess street sewers by the harbor, chairman McIntyre stated that he had asked the city engineer for a report upon the pipes and had been promised one, which, however, was not forthcoming.

Mr. Meek pointed out that the board of works had reported that the pipes were too small for the purpose for which they had been prepared.

Capt. Gaskin thought it strange that the pipes, prepared under specifications of the late engineer, should now be found too small. Princess street sewer was larger at the top than at the bottom. At any rate, the pipes were originally intended to be used to carry the refuse from the Queen's street sewer, the outlet of Queen street across to Princess street, and thence the pipes were to carry the refuse out into the harbor. Some years ago \$12,000 was secured from the Ontario government for the construction of the Princess street sewer, which had not been built full size all the way through. In his opinion the pipes were plenty large enough to carry off the sewage from Queen and Princess streets sewers.

The city engineer was called in, and in answer to questions, replied that he had been unable to find any record of the improvement under discussion.

The pipes were stored in the city store, Ontario street.

Capt. Gaskin stated that coal tar and other salts accumulating in the Queen street slip greatly damaged boats lying therein.

Chairman McIntyre and engineer Kirkpatrick promised to look into the matter and report.

Richardson Bros. complained that an unosed sewer running beneath Leahy's street, King street, gave offense, as odors arose therefrom.

The city engineer stated that the sewer in question was a very large one, running under the city buildings. A man could walk it from the buildings, which drained into it.

Mr. Thompson advised proceeding at once towards filling up the sewer. It might be dangerous to interfere with a drain running across private property.

Mr. Gordon explained that some time ago a blockade had been placed, since when nothing offensive had found its way into Mr. Leahy's cellar.

The matter was referred to the sanitary inspector, medical health officer and city engineer, to examine into and report.

The Owen Sound graduates of Queen's university have asked that the name of E. H. Horsey, M.P., be placed in nomination for Queen's university council, the elections for which will occur shortly.

Medical health officer Fox reported that during December there were reported several cases of contagious diseases: Scarlet fever, four; diphtheria, two; typhoid fever, two; total, ten.

Mr. Thompson favored stringent measures being enforced to prevent the spread of contagious diseases.

In his opinion the poorer classes were the greatest respectors of the law in this particular, and he cited several cases of medical officers, etc., and not allowing other children of affected household to attend school.

The Owen Sound graduates of Queen's university have asked that the name of E. H. Horsey, M.P., be placed in nomination for Queen's university council, the elections for which will occur shortly.

Medical health officer Fox reported that during December there were reported several cases of contagious diseases: Scarlet fever, four; diphtheria, two; typhoid fever, two; total, ten.

Mr. Thompson favored stringent measures being enforced to prevent the spread of contagious diseases.

He would like to educate the people to standard of the necessity of observing the health laws.

Chairman McIntyre read the law covering the neglect of persons to report contagious disease cases. It provided that the parents of children, or of contagious persons, must notify the medical health officer, etc., and not allow other children of affected household to attend school.

Mr. Gordon thought it would be better to place a dodger in the hands of every school, bearing a condemnation of the law.

Both Messrs. Meek and Thompson stated that they had been privately told of several cases of measles that had not been reported.

For fear of persons that all public school teachers were diligent in their efforts towards preventing spread of contagious disease, and in keeping from school any pupils suspected of coming into contact with those affected by a contagious disease.

It was decided to have condemnation of the law published in the newspapers.

Touching the question of the spread of diphtheria, Mr. Thompson advanced the theory that each winter, as heavy rains manifest themselves, showing that the best care is not exercised as to the prevention of a spread of the disease. He instance several cases to bear out his theory.

Mr. Gordon read statistics for the past five years, the figures bearing out Mr. Thompson's theory, as there were more cases reported in the early fall and winter than during any other time of the year.

The consensus of opinion was that the disease was not an endemic, and that if diagnosed patients should be destroyed.

Ladies' Evening Slippers At cost, at Abernethy's.

INCIDENTS OF THE DAY.

Newspapers Picked Up by Reporters on Their Rounds.

Princess street is now almost passable. The snow banks have been removed.

The tory executive promises "to hold the seat now lost," etc. Say, has not the seat been lost for ten years past?

Last evening the glee and mandolin clubs of Queen's university, gave a splendid concert of Harrowsmore. After the concert the students were ten minutes.

Plain Things to Say.

Prof. Shortt, of Queen's, Speaks on Canada's Relations To United States—He Has Some Plain Things to Say.

Winnipeg has a beautiful rink, and everything is in keeping with it. They have a sheet of ice about 200 by 90, and it is always in good shape.

Yale men are talking of sending their eight to England this year. The negotiations with Harvard for a series of annual drag, and a trial to England is being talked up.

A Queen's hockey team plays in Belleville on Saturday night, and the Belleville people are fairly delighted, because a Kingston organization has enough sympathy to sacrifice an evening in the sleeping town.

The Cornwall senior hockey team defeated Morrisburg last night by five goals. It was necessary to play ten minutes overtime before the final goal was scored. Morrisburg was faster than their opponents, but weak in scoring.

The winning Boulter, Picton, a great lover of sports of all kinds, with a special fondness for hockey, said that next season he will present a cup to the Quinte hockey league, the team won outright by club winning the Quinte championship.

Father and son will be the odd combination of one of the teams that start in the six-day pedestrian race which begins at Madison Square garden, New York, February 9th. The senior member of the partnership is veteran "Lepper" Hughes, a popular figure in the old days, and one who could keep up the monotonous plod, day after day, with rare grit and speed. His mate is his son, William Constantine Macdonald, a strapping youth of nineteen.

Lady Constance Macdonald, noted as the champion woman swimmer of England, has been in New York, and will tour Canada and the west. Lady Constance is the niece of the duchess of Sutherland, and sister of the countess of Cromarty. She seems to take more pride in her athletic performance than in her pedigree. She is of Scotch blood. Lady Constance is only nineteen years of age. She has already travelled through much of Europe, Asia and northern Africa.

The eastern league baseball championship season will open on the 1st of May, and will end the 26th of September. A total of 126 games will be played. At Toronto and Worcester are the only cities that do not play Sunday ball at home, the bases being decided to allow them to work in doubleheaders during the latter part of the season, so as to put them on an equal footing regarding games played.

This discrepancy in previous years practically gave Providence, Rochester and Syracuse clubs their pennants.

Either Victorias of Montreal or the Montreal hockey team will challenge for the Stanley cup.

Napanee Curlers Defeated.

One of the closest contested curling matches of the season was that fought out last evening between Kingston and Napanee teams, in the Quinte district arena.

Skilful playing all through characterized the match, which was won by Kingston by a score of thirty-two to twenty-five.

The Napanee curlers were keen sportsmen and good shots, but had several runs of poor luck, which let them out of a victory. The rinks were:

Kingston, No. 1—Dr. Lyons, F. Shaw, Dr. Watson, A. Strachan, ship—12.

Napanee, No. 1—Dr. Leonard, W. Smith, J. W. Robinson, W. Bellhouse, skip—10.

Kingston, No. 2—P. Slater, L. L. Henderson, M. S. Sutherland, W. B. Dalton, skip—20.

Napanee, No. 2—W. F. Herrington, W. A. Daly, J. L. Boyes, F. H. Hamm skip—15.

The Napanee rinks will come down next week to meet Rockwood curlers.

To Play On To-morrow.

Dr. Clark has been notified that the O.H.A. executive committee has disallowed the goal scored by Queen's III team against the Peachgrove-Frontenac team Monday night. It will be remembered that the puck split in two and Queen's scored with one half.

As the rules prescribe the size of the puck, the executive committee had to disallow the goal. As the round now stands a tie, the final match will be played off to-morrow night at the conclusion of the Ramblers-Descroix match. Thus a double-header will be given.

The Napanee rinks will come down next week to meet Rockwood curlers.

Classification of Convicts.

Mr. Platt, warden of the Kingston penitentiary, has submitted to the minister of justice a classification of the犯人.

He has divided the犯人 into three classes, according to the nature of the crime for which they were sentenced and their demeanor since incarceration.

There is no doubt that Canada, as a part of the United States, would have been more prosperous, and the union would have benefited the United States also.

But now the time of annexation is past. Prosperity is coming and there is no longer any need on that score for political union with the great republic.

Our turn is coming, said Prof. Shortt. The long period of our waiting is at an end. The result of Canada's 150 years of parading of its undeveloped resources is beginning to be apparent, not that the cry for capital was particularly effective, but simply that the undeveloped resources of the United States are hard to find, and the capital of the country is turned to the benefit of Canada.
