Dr. Williams' Pink Pills cure diseases that have their origin either in a poor or watery condition of the blood or shattered nerves. It is because they make rich red blood and strengthen the nerves with every dose that they cure such troubles as anaemia, consumption in its early stages, nervous headaches, St. Vitus' dance, rheumatism, partial paralysis, kidney trouble, indigestion, etc. Ordinary medicine merely acts upon the symptoms of the trouble, and when such medicines are discontinued the trouble returns often in an aggravated form. Dr. Williams' Pink Pills on the contrary go direct to the root of the trouble, and cure to stay cured. See that the full name, "Dr. Williams" Pink Pills for Pale People," is found on the wrapper of every box. HOW KITCHENER DOES IT. A Staff Was Collected In Short

Blackwood's Magazine. A Hidden Bust.

A sad little romance lately came to light at Windsor, says The Ladies' Field. When the prince consort died a bust was made of him, and this was taken everywhere by his widow. At the same time queen Victoria, desiring to perpetuate the personal appearance of husband and wife at the time of her separation, had a bust made of herself. This was lost sight of by those at court, and there was a tradition at Windsor Castle that, by direction of the queen, it had been hidden away. The king caused enquiries to be made of an old servant. who was on the domestic staff at the time of the prince consort's death, and h was able to indicate a place where the bust was walled in. The wall was broken and the bust-an teresting marble presentment of queen's appearance in early middle life -restored to sight.
