sorbent properties of the skin. A the ear. The chemical elements forming the compound on the plaster are progressively absorbed by the skin, and the work of regenerating the organ and of restoring the hearing begins. This is the basis of the Drouet treatment. Those who are interested in the subject would do well to read the complete description of this method of treatment in Journal For the Deaf," a review published at the Drouet institute, 72 Regent Park-road, London, England, and sent free to anyone asking for it. They will find in it also detailed accounts of a large number of cures effected in chronic and long-continued cases which had resisted all other methods of treatment, and had even been pronounced incurable. A special feature of the Drouet treatment is that patients who cannot come. London to be examined are enabled to receive free advice by filling up pathological report form, which al lows them to state explicity their home of the late Mrs. M. A. Pomecase. This form may be had free of charge by writing to the secretary of the Drouet institute.

Admirals Reach Age Limit. Washington, D.C., Feb. 8.-The official life of admiral Sampson ends at What a vast field for christian work midnight to-night, when, by reason of there is in South Africa.
