Toronto Mail and Empire.
A rather melancholy interest attaches to the following essay by Dr. Bucke, of the London insane asylum, who met his death on Thursday morning. He wrote the article months ago, at the editor's request, that it would have an influence on his young readers and direct their attention to some of the greatest philsophical writers the world has known. Dr. Bucke was a cultured man of letters, and a student all his life. His

The plant of his explicit denial, that much of his philosophy was derived from the French thinker whose birth preceded his by some eighteen years, reaction against the so-called "Chaured years much the same taugus salute." Unless all the handstage of my mental growth. I still been waving in the air of a hall close-think highly of many of his works, es-uecially of the Adonais and the Epipsychidion, but no longer feel toward them as formerly. His poems, fine as they undoubtedly are, have lost for

Wordsworth, and many other poets packed by W. Clark, Montreal. with pleasure, but think none with passion except Shelley and Walt Whit-man. The latter probably influenced me more than all other authors put together. In fact, as I look back my spiritual life, such as it has been,

'Leaves of Grass' has been profound-

After reading "Faust," I read a good many other of Goethe's works, and may fairly place him among these writers who have distinctly, although not markedly, influenced my mental

The last author I shall mention is Francis Bacon, incontestably the greatest intellect that the race has produced. His prose is the best in our language; his dramas (called Shake speare's Plays") are probably the noblest expression of genius in any language—while his sonnets, to my mind, reached a spiritual level as high as has ever been attained by St. John or by the author of the "Divine Lay" -the "Bagavad-Gita."

Francis Bacon, by his prose, but still more by his verse, has for twenty years exerted upon me a powerful and looked forward with interest to far as I can see, that influence is its publication, for he hoped no doubt, more likely to increase than diminis during the remainder of my life. -DR. BUCKE.

Brain Vs. Nerve Strings.

TERRIBLE BACK PAINS

Mrs. Maggie Woodford Suffered Terribly Until Cured by Powley's Liquified Ozone.

The kidneys are about the most important organs of the body. All the waste products caused by muscular action and of digested food, which are found in the blood, have to be thrown off from the body-most of them pass through the kidneys. If there is any interruption in this process, instead of being thrown off, this poisonous matter is reabsorbed by the blood and spread to the remotest parts of the system to work harm and injury. Powley's Liquified Ozone stimulates the action of the kidneys, causes them to throw off all poisonous matter, restores health conditions to all the tissues of the body.

The Ozone Co., Limited-Gentlemen: About July last I was attacked with a sinking sensation; I would have frightful dreams; food would not digest, and my nerves seemed to be unstrung. I had a terrible pain across my back; sometimes I felt that it would break, so great would be the pain. I also had rheumatism in all my joints. I tried a laxative and thought I might get some ease, but I only got worse. My husband advised me to try Ozone, as it was doing so much for other people. We purchased a bottle and I am so thankful we did, as I soon got relief and now am well and gaining rapidly in flesh. The Ozone seems to do my blood so much good. My be lief now is that I had a bad attack of kidney disease. We keep Ozone continually in our house and no matter what the trouble is, we find it a ready friend to relieve pain, sores, cuts, stomach trouble or any case where we have need of a good remedy. (Signed) Mrs. Maggre Woodford, 350 Gerrard St., East Toronto.

There isn't any combination of drugs in Powley's Liquified Ozone-it isn't a medicine, contains no alcohol. It is simply Nature's great element, blood food or oxygen, what the blood and system require.
