MARINE FINDS HIM BLAMELESS.

Decision Announced This Morning at The City Hall-Commissioner Harty Dissents -Lack of Discipline on Such Vessels As The India.

At last' the suspense has been relieved, and the decision in the Marine City disaster investigation declared. That decision exonerates Capt. Malone, of the steamer India, from all blame. A large number of citizens assembled at the city hall this morning to hear the decision read. Promptly at eleven o'clock, commander Spain, chairman of the investigating commission, mounted the platform and in clear, decisive tones announced the finding of the court. He said

From the evidence submitted at the investigation into the loss of four lives on the derelict Marine City, the court has come to the following con-

That Capt. Malone did all that was possible to do under the then existing conditions. The chief engineer, who apparently was the only person on the steamer to have had any disagreement at all with the captain, and a man of thirty-five years' experience as engineer on steamboats, better than the one that was flying

could have been avoided." It is possible that it would have been better if Capt. Malone had hoisted a flag of distress on his own vessel when he saw that there was one hoisted on the derelict, but the reason he gives for not doing so is reasonable; and in the evidence given by Capt. Craigie-which is very important evidence-it is stated that it was quite impossible to render assistance of any kind from 9 a.m., Thursday.

1. It has been strongly represented,

and brought out in the evidence, that exonerated in that he did all that was no life boat was left on the Marine possible for an experienced man to do City for the safety of the men, when under the then existing circumstances, and his certificate returned, which is the derelict was first taken in tow, but was returned to the India by the done, herewith; Mr. Harty, one of the captain's orders. The reason the cap- assessors, dissenting. tain gives for doing this is that there The court desires to point out that was only one davit on the Marine there is apparently a lack of discip-City, the other being broken. From line on board vessels of the class of The Mantreal produce association again the evidence produced, apparently, the India, as it does not seem correct advises Canadian dairymen against making there were no falls on the davits; con that the first mate and three men cheese from locker milk, in the interests of sequently, it would have been a difboth makers and exporters. They say that ficult matter for four men to handle if the cheese is to bring remunerative prices such a boat without any appliances and to have hauled her up on board the derelict, which was stated to be about ten feet out of the water. Under these circumstances, the court is of opinion that it was , hardly possible for the boat to have been left It Has Passed The Ontario Legison board the Marine City. The first mate was in charge of the men on the derelict, and it it is to be presumed f he considered it was necessary for a boat to be left, that he would have requested the captain to do so. On the mate being asked by the captain from the India, when he was on board the dereliet, if everything was all right, he replied, "Yes, it is all

> 2. The derelict was taken in tow about 10 a.m., Wednesday, and from that time until her arrival off Goderich, about 5.30 p.m., nothing whatever transpired to indicate that there Mr. Marter moved, seconded by Mr.

was any danger. 3, On arrival off Goderich the captain gives as his reason for not mak- pal election day. This amendment ings in the business district of Chiby the second mate that he saw the Dempsey (Prince Edward), the first be- fall to the ground."

Under these conditions and when votes cast for candidates in the gen- vice. the captain found that the anchorage eral elections of 1898, excepting Ottawas not good be went, very properly, wa, where the double vote exists and

The first mate, an experienced measure to a finish had the concessions seaman, no doubt, and possibly as not been made. As passed the act good a judge of weather indications as provides for the formation of a railthe captain, does not appear to have way committee of the government to made any signals to be taken off the regulate all questions regarding conderelict up to this time; nor does it nection between electric lines crossappear that there was any suggestion ings and rights of way over tracks of made by any person to do so.

It is only possible to believe that mittee, however, are to be exercised the captain, who is shown to be a in cities and towns only on consent of master mariner of excellent repute and the councils of these municipalities. extended experience, did what he con- This secured what the cities feared sidered the very best at the time in would be taken from them, under the

the interests of all concerned,

weather began to get very bad, but at no time between the time of anchoring and the breaking of the tow line -of which there are various statements ranging from 8:45 to 1:30 o'clock-does there appear to have been any apprehension of danger the part of anyone on board. After that time there is, apparently, a di versity of opinion as to the safety of lowering the life boat and going to the succour of the men on the Marine City. The captain maintains most positively that he did not consider it safe, on account of the heavy sea, to do so for the reason that the attempt would only endanger more lives. The chief engineer and the wheelsman are of the same opinion; these two men having the most experience at sea, the experience of the balance of the crew being very limited, the second mate seasons: one season as wheelsman, and took place on Friday, at Cataraqui,

fact, that the men on the Marine City | ness of her death that the funeral was hoisted a flag of distress on Thursday held so soon. All her children were morning, and that the captain of the present, except James, who is pracassistance. In the opinion of the court, the captain did all that was

getting into the trough of the sea and coming to grief. The captain of the India tried to drag back to the derelict and throw them a line, but

SIGNS OF DEMENTIA. Ewart, of the Rosedale, an experienced spacter mariner, states that it

He Tried To Force His Way Into a House To Heal a Woman-A Fight Ensued-Cooper Was Formerly of Toronto.

Parry Sound, Ont., March 15 .- A report of a serious affair which occurred near Sequin Falls post office a few days ago has just reached here. Samuel Cooper, a lumberman, who had been working near Sequin Falls, nearly all winter, some time ago showed signs of being demented. He was conidered harmless. However, a few days ago, after walking around all night, he went to the house of one Thomas Hooper, with whom it is said he had some little trouble before, and, it is alleged, attempted to go up stairs. Hooper told him his wife was ill and wished him to go out of the house. Cooper then said he was God Almighty, and if he but touched the woman she would recover. Persisting in his efforts to get up stairs, Hooper, it is said, thereupon, attacked him with an axe. Two other men who were present, and whose names are given as Clair and Bannister, took part in the fight. It is said that six or seven serious wounds were inflicted on Cooper and that he was also shot in the leg. On the following day he was taken to the hospital at Huntsville, where he died yesterday. District constable Hanna, at the instance of crown attorney Haight, has been dispatched to Sequin Falls to arrest Hooper and the others who took part in the affair. An inquest is being held at Huntsville to-day.

DOMINION PARLIAMENT.

Debate On Importation Of Inferior Horses Into Dominion.

Ottawa, March 15 .- The most of vesterday's sitting of the house was taken up with the further consideration of Hon. Mr. Tarte's estimates. The minister of public works was in great humor, and even went so far as to agree to drop one of the items. There was considerable quizzing from the opposition, which kept Mr. Tarte busy in answering.

In the afternoon Mr. Boyd, of Macdonald, started a debate on the importation of inferior horses into the west from the United States, and the subject was taken up by members from Ontario, Quebec and the other provinces, and in the course of an hour a great deal of information was gathered regarding horse breeding. The debate widened so as to include other subjects, which caused Mr. Pope to remark that they had heard all about horses and buggies, and why not now speak of harness?

There was a warm outbreak when \$5,000 was asked for St. Joseuh har bor, on lake Huron, the opposition taking the ground that the vote of money was not needed, and Mr. Tarte intimating that the opposition was caused because the inhabitants situated there were French.
