SOME ENGLISH DUKES. Mottos on Family Arms-Stories

About Them. Chamber's Journal. His grace of Norfolk, the premier duke, is a general favorite. Though his dukedom dates from the 28th of What the People Are Talking June, 1483, he gives himself no airs, puts on no side. When the Sussex archaeological society-visited Arundel castle, a little gentleman in a cutaway coat was seen making himself very allable on the occasion. He even held out his hand to a clergyman. "Ah !" said the parson in those hard tones we know so well, as he adjusted his pince-nez, "I'm afraid I have not the pleasure-have I?" "Oh " quoth the little gentleman, "I'm the duke," There you have him, and we feel it to be only proper that the motto of the victa" (virtue alone is invincible). It is also only or the chief motive appears to ready the rage has begun in New motto that condescends to play upon words. His grace's family name is Prof. Koch, of Berlin, discovered the Cavendish, and his motto is "Cavendo tutus" . (Safe by being cautious). Throughout his public career his grace has religiously lived up to his motto. I cannot say as much for the duke of Buccleuch, because I do not know; but ilv. The first duke was created on the 20th of April, 1663, and when he assumed "Amo" (I love) for his motto, he must have enjoyed many hearty laugh as he called to mind the exploits of the Scots, who were certainly dauntless in border warfare, al though never particularly faithful nor specially laggard in love.

Standing next to Norfolk in age, but not antiquity, for in this respect none of the dukedoms are remarkable, the duke of Somerset (created February 16th, 1547) has the eminently laudable motto of "Foy pour devoir" (Faith for

Another of the three Victorian dukedoms, that of Westminster, was creat ed on the 27th of February, 1874. This was the duke who acquired the beautiful portrait of Mr. Gladstone by Sir J. E. Millais. When the home rule bill was introduced it was said-I hope untruly, for it was such an ungracelike thing to do-that he turned the picture with its face to the wall. Afterward he sold it for three thousand pounds to Sir William Agnew. Then Sir Charles Tennant secured it. and, wih admirable judgment and However this may be, the first duke showed unusual pawkiness in the Saturday evening and arranged for the | choice of a motto. Qua dake, he was as we have seen, quite an infant, Therefore he boldly proclaimed, "Virtus, non , stemma" (Virtue, not pedigree), although as a Grosvenor needed not to be ashamed of his blood. for no doubt his remote ancestor came over with the conqueror.

The animals pretium recti" (Both the ornament and eward of worth), which, all things considered, "takes the cake," frank, unblushing impudence.

The duke of Wellington, whose creation dated from May 11th, 1814, selected the singularly tame, prosaic, and uninspiring sentiment, "Virtutis fortuna comes" (Fortune is the companion of valor) for his motto. Still it cannot be gainsaid that Strathfieldsave and Apsley house were very substantial comrades.

During the last half of the seventeenth century no fewer than eight dukes were created, and the same rate of ennoblement was kept up for the following fifty years. As there are now only twenty-seven dukes all told. it will be seen that a single spell of a hundred years accounts for sixteen of them, leaving eleven for the whole period, barring those that became extinct.
