Your blood is the principal function of your body. If it is pure, if it contains its normal requirement of oxygen, the organs of your body receive nourishment, they perform their operations thoroughly, and you have health. If, on the other hand, your blood lacks its food, oxygen, in place of carrying nourishment through your body, it becomes the vehicle for disease, and spreads poison to the remotest parts of your system; instead of it being a stream of life, it becomes a foul gathering sewer, breathing disease and death. You become constipated, suffer headaches, your skin gets pimply and blotchy, your breath is bad, you have an evil taste in your mouth, can't sleep at night, and you are altogether in a bad way.

The cure is simple; all you have to do is to increase the oxygen carrying power of your blood by taking Powley's Liquified Ozone, and you will remove every trace of your trouble, just as Mr. Bushby did. By taking Ozone your blood is rendered antiseptic, the poison driven off through the proper channels, the bowels and kidneys and every tissue in your body made sound and healthy. Skin diseases or system weakness of any kind are readily benefited by taking Powley's Liquified Ozone.
