SHE PATIENTLY BORE DISGRACE
A Sad Letter From a Lady Whose Husband Was Dissipated.

How She Cured Him With a Secret Remedy.

"I had for years patiently borne the disgrace, suffering misery and privation due to my husband's drinking habits. Hearing of your marvelous remedy for the cure of drunkenness, which I could give my husband secretly, I decided to try it. I procured a package and mixed it in his food and, lo! his appetite for solid food returned, he ate as he used to do, and his work returned, and we now have a happy home. After he was completely cured I told him what I had done, when he acknowledged that it had been his saving, as he had not the resolution to break off his own secret. I heartily advise all women afflicted as I was to give your remedy a trial."

FREE SAMPLE and pamphlet giving complete and full particulars, sent on request. Correspondence strictly confidential. Send stamp to: **THE SAMARITAN REMEDY CO., 25 Jordan Street, Toronto, Canada.**

BRITISH

TROOP OIL LINIMENT

Sprains, Strains, Cuts, Wounds, Ulcers, Open Sores, Bruises, Stiff Joints, Bites and Stings of Insects, Coughs, Colds, Contracted Cords, Rheumatism, Neuralgia, Bronchitis, Croup, Sore Throat, Quinsy, Whooping Cough and all Painful Swellings.

Maypole Soap
Sole Importers: THE NEW YORK CO., 100, St. Nicholas St., N.Y.

are desirous of giving to the dear public a dollar in gold for 50 cents in silver, and they are willing to continue that charitable donation every day in the week. Before me as a public advertising agent, I trust for 50 cents a share and they inform you in confidence that next week it will be 60, and though they never saw or know you they want you to share in this golden opportunity without trouble or cost. Is this thing so good and so profitable why do they not keep it themselves. There is a proverb as old as the hills. Beware of the Greek when he comes with gifts. Now listen to the voice of tenderfoot who has had some experience, who has been tempted, shipwrecked a hundred times while in search of fortune, and who has sounded most of the depths and shoals of human folly, that time after time has brought with it punishment and repentance.

When any man comes to you and offers to give you a valuable consideration for nothing, beware, a caveat is a fair, pure and simple; leave him severely alone. This is not altogether a charitable world that we live in. There are in it good men and bad men; good trusts and bad trusts; in the present condition of affairs, my advice would be to the inexperienced speculator, let others get rich on them. You will see how they have fared one year from to-day and you will find that to one that has gained, ninety-nine have lost; so keep your hard earned savings in the old stock of the savings bank, but don't speculate in trusts. To people of small or ordinary means, a careful investigation will show you that the ornamental part of your housekeeping and living is far greater than is necessary for the support of a decent life. The unnecessary expense slip away in small sums, but the lottery, the rent and the food are the points where with rigid economy, in a few years a respectable fortune for a poor man can be accumulated and in the present time, you, in this very hour, if the proper time to begin. I don't mean that a man or woman should be mean or parsimonious; it is only a single step from generosity to penny. I believe in a decent, generous, honest, and bright carpet on the floor, a picture on the wall, with some instrument of music if you can afford it, so that the children as they grow up may remember home as the happiest spot on earth, and that they may have frequent occasions to refer to some of the questionable practices of our public, but it seems as if the monster has the heads of hydra.

A new, well-kept policeman who was acting as a policeman for a police captain or prominent was convicted of taking a bribe from a woman of questionable character who kept a house of prostitution. No one in his senses suspects that a bribe of \$500 was put in the wardman's pocket. He was merely the retrieving dog who takes the game his master shot and lays it at his feet. No one saw the second transaction, but to the least aware, the first was the wardman who took the bribe and the soiled dove who paid it. This wardman was tried and on the testimony of another policeman named McAllister he was convicted and sent to the penitentiary. A few nights after McAllister was found in the street dead, the mortal blow being a large contusion made with some blunt instrument with sufficient force to kill. No one there are all sorts of conflicting stories as to how McAllister died. One is that being intoxicated he fell down stairs and so received the injury which caused his death. Another and more fearful suspicion arose that 'the dog' was a wild beast and enemies to society, then goodly honor, goodly honesty, for advancement is the reward of infamy and crime. Our district attorney is pledged to do his duty and have all sorts of reformers are pledged to help him. We shall watch for the result with the greatest anxiety and hope the Almighty may assist the ministers of justice in hunting the assassins down.

To give the world an idea of how profits are made by contractors who are lucky enough to get the city's work, we are now building a new bridge over the river. The Engineer in charge of the work for the city has ordered to do his duty and have all sorts of reformers are pledged to help him. We shall watch for the result with the greatest anxiety and hope the Almighty may assist the ministers of justice in hunting the assassins down.

Droopy and Heart Disease.
"For ten years I suffered greatly from Heart Disease. Fluttering of the heart and Smothering Spells made my life a torment. Dropsy set in. My physician told me to prepare for the worst. I tried Dr. Agnew's Cure for the Heart. One dose gave great relief. One bottle cured me completely."
Mrs. James Adams, Syracuse, N.Y. For sale by Henry Wade and E. C. Mitchell.—107.

The Best of The Arguments.
Washington Star.
"Look at the birds in the trees," said the man who was sent to the penitentiary several months ago. Before quitting this subject I have a word to say about those trusts, large and small, and to people who scarcely ever do their own thinking, but in the most important events of their lives allow other people to think for them. Just reflect for one moment, does it not seem to you a little strange that we have men conducting crime in the city of New York who

PROSPECTUS
The following is an extract from one of the reports: "I have been working in the lumber woods for twenty years or more, and have traveled and examined limits in the State of Maine, New Brunswick, and Quebec, and worked in Wisconsin and Minnesota, and I can assure this is the best pulp limit I have ever seen or traveled over."
On the basis of any one of these reports a conservative estimate shows that there is sufficient pulpwood now on the limits to supply the proposed mills for more than 65 years. As spruce wood will replace itself in from twenty-four to thirty years, it will be seen that there is sufficient wood on the limits to afford a perpetual supply to a mill double the capacity of that now contemplated.
The freehold property consists of twenty acres where the saw mill, dwellings, and office are situated, and 256 1/2 acres on the bank of the Little Cascapedia River, where it is proposed to build the Pulp and Paper Mills.

OBJECTS OF THE COMPANY
The Atlantic Pulp and Paper Company, Limited, has been organized in order to take advantage of the unrivalled facilities for the manufacture of pulp and paper at New Richmond, on the Bale des Chaleurs, and by its charter, has powers of the fullest description. It is confidently believed that pulp and paper can be more economically manufactured there than any other place in America.

The essentials to the success of such a concern are:
1. Cheap and unlimited pulp wood;
2. Adequate water power cheaply developed;
3. Pure water for the manufacturer;
4. Cheap labor;
5. Low transportation charges;
6. Efficient management.

It will be seen that the facilities possessed by this Company assure a point of cheapness in the production of paper never attained before, while the situation of the mills on the Atlantic seaboard makes it possible to ship to all foreign ports by water without trans-shipment. As the Company proposes to confine itself almost exclusively to the export trade, it will readily be seen that this gives it further advantage over all other companies.

1. WOOD SUPPLY.—No paper mill in Canada has greater advantages in point of situation. Many companies do not own their own limits, being entirely dependent on outside purchases, and subject to fluctuations of supply and price. Other companies owning limits have to transport their wood from great distances by water or rail. Thus we find mills at Merston and Niagara Falls are bringing their pulpwood from Central Quebec. Some prosperous paper companies even buy their pulp in the manufactured state. The mills of the Atlantic Pulp and Paper Company, Limited, will be mill-pond capable of holding several million logs. The Little Cascapedia River flows from end to end through the center of the limits, and the large number of tributary streams does away with the greater part of the hauling usually entailed in getting out pulp wood, thereby greatly decreasing the cost.

2. WATER POWER.—Mr. George F. Hardy of New York, the foremost American authority on this subject, has made a thorough examination of the water power that can be developed on the Little Cascapedia River at a point immediately adjoining the proposed mill site, and his report shows that sufficient power can be developed to run mills of even greater capacity. This report can be seen at the office of the undersigned, or at any office of the National Trust Company, Limited.

3. WATER SUPPLY.—Pure and clean water is one of the most important factors in connection with pulp and paper-making. The bed of the Little Cascapedia River is rocky, and owing to its crystal-like clearness and purity the water in the river is suitable for making the finest grades of paper without the expense of filtering, which is almost invariably required at other mills.

4. COST OF LABOR.—The labor employed in the mills and woods cost less than probably any other American mill, as far as known, as competent men in this section of the country, on account of the cheapness of living, ask very low wages.

5. TRANSPORTATION CHARGES.—The shipping facilities of this Company are certainly unequalled by any similar enterprise in Canada, the situation of the mills on the Bale des Chaleurs giving every possible advantage for export trade, which is probably the most profitable field. Arrangements can be made with Atlantic steamship lines to run steamers from New Richmond for eight months in the year, as required. During the winter months favorable winter rates have been arranged with the Railway Companies to St. John and Halifax, New Richmond being on the line of the Atlantic and Lake Superior Railway, which will be connected with the mills by a siding.

6. MANAGEMENT.—The Company has been fortunate in securing the services of Mr. Wm. M. McIntyre, formerly Mechanical Superintendent with the Laurentide Pulp Company, Limited, who will act as Manager of the construction and operation of the mills. Mr. McIntyre has had over twenty years' experience in pulp and paper-making, and is regarded as an authority on the manufacture of pulp and paper.

PROPERTIES
The properties and limits acquired by the Company contain about three hundred and two square miles, or one hundred and ninety-three thousand two hundred acres, more or less. The wood is principally spruce, and there is also a large quantity of cedar, pine, birch, balsam, balsam of Gilead, and poplar. The Company has reports on this property made by five different expert Rangers, acting independently. Copies of these may be seen at any office of the National Trust Company, Limited, or at the office of the undersigned.

ISSUE OF STOCK
For the acquiring of the said property, equipment of the pulp and paper mills, the development of the water power, building the railway siding to the mills, and the furnishing of sufficient working capital, the present issue of Preference Stock is made. The whole of the Seven Per Cent. Cumulative Preference Stock has been authorized to be issued on the following terms:

For every two shares of Seven per cent. Cumulative Preference Stock subscribed and paid for, there will be allotted by way of bonus one share of fully paid Common Stock.

The Seven Per Cent. Preferred Stock is Cumulative, carries yearly dividends, and has priority over the Common Stock as to both dividends and assets.

After the payment of the dividend on the Preferred Stock, and before any payment of dividend on the Common Stock, a further dividend of one per cent. must be applied to a Reserve Fund, under the charter. This fund will be for the further assuring of the dividends on the Preferred Stock. Application will be made in due course for the listing of the shares of the Company on the Toronto and Montreal Stock Exchange.

Applications for Preferred Shares should be forwarded to the NATIONAL TRUST COMPANY, Limited, Toronto, Montreal, or Winnipeg; or to SUTHERLAND & CAMERON, Brokers, Ottawa, Canada. Checks, drafts, etc., are to be made payable to the NATIONAL TRUST COMPANY, Limited.

If the whole amount applied for be not allotted, the surplus paid on deposit will be appropriated towards the sum due on allotment. Where no allotment is made, the deposit will be returned in full.

Further information and Forms of Application can be obtained at the offices of SUTHERLAND & CAMERON, 48 SPARKS STREET, OTTAWA, CANADA, or the NATIONAL TRUST COMPANY, LIMITED, TORONTO, MONTREAL, and WINNIPEG.

We offer the Preferred Stock for sale on the above terms.

SUTHERLAND & CAMERON, Brokers
OTTAWA, CANADA.
