ON WIRELESS TELEGRAPHY

BY PROF. GILL.

Large Audience in Convocation Hall-The Illustrations Were Most Interesting and Con-

There was a very large audience in Queen's convocation hall last evening to hear the locture on "Wireless Telegraphy," by Prof. Gill. The lecturer first gave an outline of the different 11 m. When methods of communication without wires by speech, signals and heliograph. He then took up the Marconi system and pointed out that its all systems, communication was effected by means of wave motion. Illustracal models how waves travel and how they can be made to set up oscillation at a distance. Prof. Gill sent A states of two wires. Explanation was Hos. R per nature as light waves may be Fleming 1 veyed by the same medium, the only bulldings here difference being that there would be This as sys- fewer per second, and on account of Crimcion is this, they would travel through bodies

Charity And Pleasure. With such artists as Richard Jose Ferrer, the eminent violinist, Pearl O'Neil, dramatic and society render, Miss Marie Wheler, soprano, the university of a large oil painting Miss Bourden, contralto, and Miss the best press comments to recommend them in their respective arts, the concert in aid of the homeless women on Thursday evening should prove one as well as help a noble charity.

Desires A Beautiful City. Those who have the beauty of the city at heart will agree with alderman Behan that the advertising fence, at the corner of William and Ontario streets, is a very unsightly structure. This alderman objects to the fence on Ontario street being leased to anyone for advertising purposes. Alder man Behan wants to see the city made beautiful, and he will be supported in this by many citizens.
