COUCHES—In old Carpet building. \$25.00 to \$100.00.

T. F. HARRISON CO., UNDERTAKING, ETC. PHONES—DAY USE, 95. NIGHT CALLS, 91-92

Cook's Cotton Boot Compound. It is immediately used monthly by over 1,000,000 people. It is the best remedy for all ailments of the feet. It is a perfect cure for corns, blisters, and all other ailments of the feet. It is a perfect cure for all ailments of the feet. It is a perfect cure for all ailments of the feet.

It is really owing to the benefits imparted while so delicious a drink that the MAGI CALEDONIA WATER is such a success. All best dealers sell it.

CONVOCAION VERY BRIEF.

REMARKS BY THE HONORARY GRADUATES.

Mr. Hoyle Addressed Words of Caution—Mr. Seath and Mr. MacArthur—Rev. Prof. Clark Addressed the Graduates.

Queen's convocation proceedings yesterday afternoon were unusually short, covering only an hour and twenty minutes. The students' witticisms were about up to the average. Perhaps the best bit of the day was that aimed at Prof. Pike, who, when he rose to present the Latin medal, was greeted with the song, "Oh, Where is My Little Dog Gone?" The hit was well appreciated by those who understood, and a unanimous occurrence was the laughing of Miss Alice Watson by her father, Prof. Watson, whose duty it was to perform that service on the graduates. Rev. Dr. Thompson, of Sarnia, was chaplain of convocation.

N. W. Hoyle, K.C., Toronto, who received the honorary degree of LL.D., made a most remarkable address, brief but very pointed. It consisted of a few words of caution to the graduates on whom he pressed the necessity of loyalty to God, which, he said, was not so strong as it used to be. That they feared man so little because they feared God so much, he hoped they would always be able to say. That is a quality which the present age demands. Mr. Hoyle advised the graduates to cultivate the grace of respect for their superiors, the duty to their inferiors. In referring to Queen's Mr. Hoyle, said it was recognized throughout Canada as a strenuous, an intellectual, a virile and progressive university.

John Seath, Toronto, inspector of Ontario collegiate institutes and high schools, also received the LL.D. degree. He was presented by Prof. Dupuis as a national uncertainty, having been born in Scotland and educated in Ireland. Whatever he may be called, the inspector has an Irish tongue. Mr. Seath remarked that professional critics like himself very seldom get their names in this world; it was reserved for them at another time and in another place. But he regarded himself as an exception. Queen's, he said had become one of the most famous universities in the country, and of its graduates he had abundant opportunity to see their worth. Referring to the question of university matriculation, Mr. Seath said the standard was too low, and the effect of it was easily seen in the schools, for it prevented a high scholarship.

Rev. Prof. Hart, of Manitoba college, Winnipeg, was unable to be present, but he was referred to by Rev. Dr. Ross, as a man who for thirty years had labored in the cause of education, and had left a grand impression on the north-west. Rev. Prof. Clark, of Trinity university, also received the D.D. degree. He has been spending the past few days in Kingston, and is highly respected at Queen's. Prof. Clarke, Dr. Barron, Dr. Milligan, Toronto, and Dr. Douglas, New York.

Mr. and Mrs. Carruthers and family, Kingston, will be among the many occupying cottages this summer. He is a well-known contractor, and has been building the "Buttercup Cottage." Charles McConville, aged nineteen years, was found dead on his father's farm on the Perth road, on Sunday. He had been seeding with his father shortly before.

Prof. Goodwin will speak at the dinner of the Canadian section of the society of economic industry at Toronto tomorrow night. His subject will be "The manufacture of charcoal and by-products in Ontario." John Dorion, proprietor of the Pacific hotel, North Bay, and son of the late Judge Dorion, returned home on Wednesday after spending a few days in the city on business. He states that things are booming in North Bay.

Capt. H. A. Morrow is transferred from the reserve of officers to be captain of the Charlottetown, P.E.I., engineers, vice J. Harvey Morris, three years ago. Capt. Morrow, who is on the engineering staff of the city of Toronto, was the chief of the graduate of the Royal military college.

Getting Ready For Opening of Navigation. The steamer New Island Wanderer today commenced her semi-daily trips to Cape Vincent. The steamer India and consort, timber-laden, arrived at Garden Island from Toronto. Richardson's elevator, Schooner Two Brothers, from Trenton; sloop Granger, from St. John's; schooner Swallow, from Oswego with coal; steamer Hamilton, Hamilton to Montreal. Craig's wharf, Steamer Cuba, Hamilton to Montreal; called this morning on her first trip of the season; steamer Waterbury, Cobourg to Montreal.

Whipped By The Police. Yesterday William G. Pennell came up to the city from Gananoque. He is of an inventive turn of mind, and he had an idea in his head. His plan was to the effect that he could place the mechanism of a bicycle in a skill and use it to turn the paddles and propel the boat. Accordingly he bought the frame of an old bicycle, giving two dollars for it. Mr. Pennell left the wheel beside some barrels at the side of Kent's mica factory, Ontario street, intending to place it on board of a barge (when the boat should come in) and take it to Gananoque. But it happened along, and thinking the old machine had been thrown upon the rubbish heap he took it home with him. Pennell reported his loss to the police, who within an hour had William K. Macdonnell, who was seriously ill of enteric fever and dysentery in South Africa. The letter was written by the nurse who was attending him. Young Macdonnell belonged to court Cataragui, No. 242, I.O.F., and went out to Africa with the second mounted rifle. He was a popular young man, and his many Kingston friends hope soon to hear of his recovery.

INCIDENTS OF THE DAY.

Newly Paragraphs Picked Up By Reporters on Their Heads.

Violet scented household ammonia, 10c, a bottle, recommended. That is butter made by the Clarified Milk Co. The parks are looking fresh and green; the recent rains have improved the parks. H. Cunningham, piano tuner from Chiddingfold, New York, orders received at McAuley's book store. The parks committee was to have met yesterday afternoon, but chairman Walkem could not muster a quorum.

Hundreds of young men may vote this year if they register. Is your name on the list? No, give it to some of the liberal workers. Services in connection with the month of May will begin at St. Mary's cathedral this evening, and continue throughout the month. The court of registration will this time be composed of George Crawford, John Muldo and A. McGill. The Clarified Milk Company is shipping a great deal of butter to Toronto. William Ryan & Co. wrote last night a good deal of remarkably well, saying "kindly ship us some more."

Chatsaline bags are more fashionable than ever this year, they are entirely superseding purses, we have a splendid assortment of them at all prices. Members of the Cactus club, of Queen's, held a dance in the Whig hall last night. About 100 were in attendance. Music was furnished by Crosby and Thompson on the organ. This is a splendid weather to sow lawn seed, and our footless seed is the best seed to sow, only at Mitchell's. "The Story of Jeremy Boyes," and "The Legion of the Lost," are being published by the Cactus club. The splendid weather to sow lawn seed, and our footless seed is the best seed to sow, only at Mitchell's.

Queen's may establish a chair in forestry. Wouldn't it be more appropriate? We may expect to hear a good deal of "barking," done by the opposition because the government proposes to aid the scheme. We should not "leave out" this thought.

Hamilton Herald (Ind.): We think that the leader of the opposition might be in better business than publishing his followers to deeds of violence. Such talk as his is demagogic and dangerous. "I repeat that I am sick and tired and disgusted with hearing these men, who have business to attend to, constantly held up to the public as high-waived, common thieves and robbers."—George F. Mackenzie. Not one of any body of men, however excellent, to be in office. Is there one man in the legislature who has been in office thirty years? Not one. With such exceptions the men in the legislature have not been there over ten years. New blood and new energy has constantly been infused. "It is a recognized rule that government officials should not take an unpaid office in politics," remarks the Ottawa Citizen. But only made a rule since liberalism prevailed in the dominion. Before that conservative office holders were common. Rev. Dr. Milligan, Toronto, and Dr. Douglas, New York.

Mr. and Mrs. Carruthers and family, Kingston, will be among the many occupying cottages this summer. He is a well-known contractor, and has been building the "Buttercup Cottage." Charles McConville, aged nineteen years, was found dead on his father's farm on the Perth road, on Sunday. He had been seeding with his father shortly before.

REMEMBER ROSS AND PENNE

THEY REPRESENT THE PROGRESSIVE PARTY.

The Real Grievance of the Conservatives is That They Have Been Too Long Out of Office. Penne. He's a winner. For the electorate support him. He has been fine aid to Kingston's development. Keep cool. Build up Ontario! Ross and progress! Ross says "Build up Ontario." The whole province is with us. The trouble is the Tories want the "change." Young man! Unless your name is on the list you cannot vote. Ross and Penne. Now there's a team for you. Let the pair win. The News (Ind.): The liberal administration has been a progressive one, few will deny. Hon. G. W. Ross has infused enterprise and energy into the control of provincial affairs since the day he accepted the leadership. "I am for Penne," said a conservative, "and because of the work he has done for this city. His energy is dispiriting to the Tories." The liberals have been in power for thirty years in Ontario, but the real grievance of the opposition is that the conservatives have been outside for thirty years. The service Mr. Penne has rendered Kingston deserves the best reward, let the province have the benefit of his skill and energy. Kingston will not be "wasting" the lands and resources of New Ontario.

Hamilton Herald (Ind.): We think that the leader of the opposition might be in better business than publishing his followers to deeds of violence. Such talk as his is demagogic and dangerous. "I repeat that I am sick and tired and disgusted with hearing these men, who have business to attend to, constantly held up to the public as high-waived, common thieves and robbers."—George F. SPORT IN GENERAL.

Notes About the Various Sporting Fields.

Attrack may rejoin the Toronto pitching staff. The Australian cricket team, now in England, will likely visit Canada in September. "Cully" Robertson, of the Toronto Tin-Horn, is billed to appear at the Buffalo-Toronto baseball match this afternoon in a shirt waist. The Quebec rugby union will follow the custom of the intercollegiate union, and appoint a board of referees, so as to avoid those oft-occurring troublesome experiences. The Y. M. C. A. baseball team is endeavoring to arrange for a league with three other city teams. A silver cup, donated by the members of the various teams, will be played for. The association team is practising every night. In the case of W. Grant, of the Argonaut rugby team, which was submitted to the C.A.A.U., it was decided that he is not an amateur because of the receipt of remuneration for assistance in the training at various universities. The people up west would not believe the Argonauts had professionals when we told them so. And there are others besides Grant. Toronto. "Taxman" Brennan caught and so did Elliott. Everybody seems to think well of Brennan, and he looks like a ball player, but strange to say, he does not seem able to hit. The Spalding for some apples. Folks here like "Taxman" Elliott and are calling that he be with us all season. If he is to go manager Barrow will get him in some soft spot in another league. Last night the sports committee granted the lacrosse club \$25 for a game on the afternoon of May 20th. This morning William Peters, secretary of the lacrosse club, received a telegram from W. M. Belair, secretary of the Belleville club, enquiring about the formation of a league. Mr. Peters expects to arrange a game with Belleville for the afternoon of the 26th inst. If manager Barrow decides to "chance" Elliott, it is quite likely the Ponies will have him again this season. "Chaucer" went up for a trial, and if he isn't wanted, he'll come back quite satisfied. But one thing is certain: If Mr. Barrow turns Elliott down for Brennan he is getting a mighty poor substitute. The Kingston catcher is just as good as Brennan, and can hit as well as Brennan. Brennan is no better at all.

Y. M. C. A. NOTES. Pointers Picked up About Association Doings. The new bicycle rack is much appreciated. R. J. McEwall has again made a generous donation toward the growing library. The Y.M.C.A. parlor would be much improved by some fresh, warm-colored paper on the walls and two pairs of tasty curtains. The question of putting in the card index membership system is being discussed. George A. Bateman has offered the use of his two and a half acre island, near Gananoque, as a place for the coming boys' camp. Charles Low has coming over at the end of the week, one of three ideal spots in view, one of twenty-five miles up the Rideau. The tramp to Fort Henry on Saturday last was enjoyed by fourteen boys, Rankin Smith, of the party, freed the rank of sergeant. He was an average of fifty men, drop in daily to read the city daily papers. LECTURED ON PERSIA. Dr. Eshoo, the Persian student, who lately graduated in medicine at Queen's college, addressed young men on St. George's hall last night. Rev. G. L. Starr presided, and the attendance was very good. The young speaker gave a very graphic account of the life and customs of the inhabitants of Persia. The farmers, he said, could not achieve independence very easily, as they were compelled to give from one-third to one-half their produce to the government. The land of Persia, was fertile in a manner worthy of the growth of fruits, but the farmers were far behind the times in their methods. They used a primitive kind of plow, and it would take five men almost a week to accomplish the work of one week in Ontario. The speaker was moved a hearty vote of thanks for his entertaining lecture.

Robert Mantell. The coming of the eminent tragedian is being impatiently awaited by all true lovers of art. Mr. Mantell will be seen at the Grand Friday and Saturday, with what is reputed to be the most carefully selected company of the stage in a repertoire of romantic and classic plays. He is logically conceded to be one of the greatest actors in the legitimate field of tragedy; it is only fitting that he should be presented in a manner worthy of the high position he holds. His productions are elaborate and costly and well deserve the praise bestowed by critics along the route.

Separate Cloak Rooms Needed. A citizen this morning called attention to the fact, brought out at the late request, that there was only one cloak room for each class in the public schools. Where there were mixed classes, the boys and girls alike used this room. The citizen does not see this to be a wise provision, and as an instance referred to the tragedy that occurred in the cloak room of the junior fourth class in Frontenac school, where boys and girls associated together. He holds that the board of education should provide a separate cloak room for the girls of the school, or of the various classes, if circumstances would permit.

III In Africa. Mrs. Macdonnell, Brock street, is in receipt of a letter saying that her son William K. Macdonnell, was seriously ill of enteric fever and dysentery in South Africa. The letter was written by the nurse who was attending him. Young Macdonnell belonged to court Cataragui, No. 242, I.O.F., and went out to Africa with the second mounted rifle. He was a popular young man, and his many Kingston friends hope soon to hear of his recovery.

Whipped By The Police. Yesterday William G. Pennell came up to the city from Gananoque. He is of an inventive turn of mind, and he had an idea in his head. His plan was to the effect that he could place the mechanism of a bicycle in a skill and use it to turn the paddles and propel the boat. Accordingly he bought the frame of an old bicycle, giving two dollars for it. Mr. Pennell left the wheel beside some barrels at the side of Kent's mica factory, Ontario street, intending to place it on board of a barge (when the boat should come in) and take it to Gananoque. But it happened along, and thinking the old machine had been thrown upon the rubbish heap he took it home with him. Pennell reported his loss to the police, who within an hour had William K. Macdonnell, who was seriously ill of enteric fever and dysentery in South Africa. The letter was written by the nurse who was attending him. Young Macdonnell belonged to court Cataragui, No. 242, I.O.F., and went out to Africa with the second mounted rifle. He was a popular young man, and his many Kingston friends hope soon to hear of his recovery.
