Trains Run Into Crowded Car in Milwaukee.  
Milwaukee, Wis., May 2.—Six persons were injured in a collision last night between a street car on the West street line and a switch engine at the Clinton street crossing of the Chicago, Milwaukee & St. Paul road. The most seriously injured are Fred Rowley, right arm and right leg broken; Miss Cora Cox, head and internal injuries; Frank Berg, left arm and back injured. Roche is likely to die. Three others were hurt, but not seriously.

**CARDINAL MARTINELLI.**  
Announces That He Has Been Recalled To Rome.  
Philadelphia, Pa., May 2.—Cardinal Martinelli, apostolic delegate to the United States, said yesterday that he had been recalled to Rome by Pope Leo XIII. While declining to be interviewed, cardinal Martinelli said he was about to leave this city and would sail for Rome as soon as he could adjust the affairs of the papal delegation. The cardinal has been in this city since Tuesday.

**PRESIDENT ACTS.**  
Washington, D.C., May 2.—Following the precedent set in the case of Gen. Smith, the president has himself through secretary Root, ordered the trial by court-martial of Maj. Edwin F. Glenn, 6th infantry, one of the officers referred to as a participant in the administration of the water cure in the testimony developed before the senate Philippine committee recently.

**SMALL-POX AT BROCKVILLE.**  
Another Case is Reported of Light Character.  
Brockville, Ont., May 2.—Peter Wood, an occupant of a large boarding house here, was found yesterday to be suffering from a mild form of small-pox, and was removed to the isolation hospital. He was quarantined in a disease ward several weeks ago, but appears to have carried the germs with him.

## WHAT THE BILL MEANT

Practically The Abolition of Marriage  
REGRET WAS EXPRESSED

THAT EARL RUSSELL HAD INTRODUCED THE BILL.

It Was Rejected by the House of Lords—Edison's Invention Will Be Used in Norway and Will Greatly Help England's Iron Supply.  
London, May 2.—In the house of lords yesterday the lord chancellor, in behalf of the government, said he regretted the introduction of earl Russell's divorce bill. The bill practically meant the abolition of marriage. It was an outrage on the house that such a bill should be introduced, and he should be sorry to think that any one would wish to debate the question whether the institution of marriage should continue in this country. He moved that the bill be rejected, and this motion was agreed to.

Herman Dick, Chicago, representing Thomas Edison, has succeeded in forming a company to utilize Mr. Edison's patent for extracting iron ore and profitably working the vast deposits on the west coast of Norway. The company has a capital of £1,000,000. Its stockholders include all the principle British iron masters. Mr. Dick says the application of Mr. Edison's discovery will be one of the greatest booms possible to Great Britain. Eighty million tons of crude ore are already available for quarrying. This will render Great Britain practically independent of American supplies and will not affect the United States, which is unable to supply its own requirements in this direction.

May day was conspicuously celebrated here yesterday. The houses were covered with ribbons and the national colors. There was a great trade in roses for house decorations. The shipping combination continues to absorb public attention. The peace is in process of adjustment in South Africa. Mr. Morgan's operations are on so vast a scale that the public is at once confused and alarmed. Ministers were again closely questioned, yesterday, about the disclosures from the White Star officials and other sources. There will be harassing tactics from both sides of the house until definite information is supplied.

"Sappho," produced by Olga Nethercole, at the Adelphi theatre, last night, was a "strong meat" for judicial critics, even with modifications of the original scheme. The action was excellent, but the success of the unweary play will depend upon the judgment of the censor who was present last night.

**REASONABLE AND GENEROUS.**  
So Gen. Dewet Speaks of the British Terms.  
London, May 2.—A despatch to the Telegraph, from Pretoria, says that the Boer leaders are certainly pleased with the issue before them plainly and without reservation. Gen. Dewet is moving everywhere among his people setting forth the facts most honorably. He has frankly stated that in his opinion the struggle is now hopeless, and that the British terms are reasonable and generous.

**Shaping Towards Peace.**  
London, May 2.—Distinct confirmation is given, this morning, to the belief that events in South Africa are shaping themselves towards an early peace. The Standard correspondent in Pretoria says the predominant feeling among the burghers, who have been contending, originally in favor of peace but, at the same time, he anticipates that an intractable and irreconcilable minority may declare itself at the Vereeniging conference.

**Canadians Located.**  
Ottawa, Ont., May 2.—Lord Minto has received the following cable from Mr. Chamberlain dated London, April 30th: "Referring to your telegram of April 22nd, Kraus and McCluskey have now rejoined." These two men are members of the South African consular corps, who were reported missing on April 22nd, from their corps, since March 27th. Kraus belongs to Palmerston, Ont., and McCluskey, to Montreal.

**Chicago Wants Prof. Riggs.**  
Chicago, May 2.—The board of directors of McCormick theological seminary elected Prof. James S. Riggs, of Auburn theological seminary to the chair of New Testament literature and Exegesis to-day. A committee was appointed to visit Prof. Riggs and notify him of his election.

**Victorian Cabinet Resigns.**  
Melbourne, Victoria, May 2.—As an outcome of dissatisfaction with the constitution and the government, the Victorian cabinet has resigned. This step was taken in order to enable the premier, A. J. Peacock, to reconstruct the ministry. He is now considering the situation.

## A POLITICAL CANARD.

Issued By Agitators In South Russia  
BROUGHT INTO COLLISION

THE FORMER SERFS AND THE LANDOWNERS.  
Peasants Distributed the Land, Leaving the Noblemen a Small Portion—Then Occurred Riot and Devastation.  
St. Petersburg, May 2.—It develops that the agitators who are chiefly responsible for the spread of the revolutionary movement among the hungry peasants in south Russia, used a curious political canard to bring the former serfs and the land owners into collision. A rumor was industriously circulated that the czar had ordered the lands of the nobles to be divided among the emancipated serfs. The peasants thereupon formed committees under the commune officials, and ordered them to vacate the land withheld.

The peasants chose their own agents and proceeded to distribute the land and moveables, leaving the noblemen from fifteen to twenty acres each. The proceedings, which were orderly, were conducted with the utmost gravity, until the authorities interfered. Thereafter there was riot, arson, and devastation. In military circles it is believed that the army manoeuvres, which have been planned to take place in Creil and Koursk cannot occur, owing to the disturbed state of those governments.

**THE AIR SHIP.**  
Describing the New Wonder Built in Paris.  
Paris, May 2.—Senator Severe, the Brazilian aeronaut, has completely inflated his air ship, which is now ready to be launched. The air ship has a capacity of 2,344 metres, four times as great as the air ship of Dantos-Dumont. A third car is built into the balloon, giving it the appearance of a dirigible with a thin rod out of it. The frame fits into the wedge-shaped opening. The air ship is driven by three screws, two attached to the central axis of the balloon, and one cooled with water. There are also electric batteries for ignition purposes. The air ship will carry, besides Senator Severe, two engineers, whose sole duty will be to attend to the motors.

**REVISION OF SENTENCES.**  
Will Be Considered Every Twenty Years.  
Ottawa, May 2.—The government may shortly introduce an important change with respect to prisoners who are committed for long terms or for life. In England the practice is to revise the sentences of such prisoners after they have served twenty years. The same procedure may be adopted here.  
Some sixty odd convicts would be affected if a system of revision were to be adopted in Canada.

**TORNADO HITS IOWA TOWN.**  
Two Elevators and Dwellings Are Destroyed.  
Des Moines, Iowa, May 2.—A tornado struck Bayard, Iowa, early last night. Two elevators, the Chicago, Milwaukee & St. Paul railroad station and a number of dwelling houses were destroyed. The agent of the Chicago, Milwaukee & St. Paul railroad is missing, and is supposed to have been killed or injured. Telegraphic communication with Bayard was paralyzed by the storm. Details of the disaster are difficult to obtain.

**MURDERED IN CHINA.**  
Catholic Priest Was Slain—Head Put on Pole.  
Pekin, May 1.—A French Roman Catholic priest, belonging to the Jesuit mission at Kait Chuan, China, 100 miles south-west of Tien-Tsin, was murdered on April 27th. His head was afterwards displayed on a pole. The priests fled from this district a month ago, as they feared something like this would happen. They returned a short time afterward, however, having apparently become reassured as to their safety.

## OPENING AT BROCKVILLE.

Large Make of Cheese in May Predicted.  
Brockville, May 2.—By pursuing a waiting policy the factorymen in the Brockville district have averaged at least one-half cent per pound more for their first offerings of cheese this season than those in other districts in eastern Ontario. In the Cornwall, Morrisburg and other sections east of here the salesmen some weeks ago contracted what little April output they had at 10c. and 10½c. The Brockville factorymen did not do so, but held on their first sales of a few hundred odd being made privately last week at 10½c. Thursday the board was opened for regular business and 1,410 cheese were offered, 559 white and 851 colored. The first bid made was 10½c. and the buyers stood at this price until they found that the factorymen would not accept. Finally, just before the last call, 10½c. was offered, and by the time the session closed 329 white and 584 colored were sold. After the board the remainder accepted the board price, and about 300 that were not offered also changed hands at the same figure, making 1,700 odd boxes in all. Ayer & Co. and Hodgson Bros. got the bulk of the offerings, but A. W. Grant, Lovell & Christmas and James Alexander were also considerable buyers. The factorymen present reported the grass was a little earlier than last year, but hardly as far advanced as it was stated to be in other sections. With weather conditions as they were now, however, a large May make was pretty certain. They were naturally all in a good humor on account of the strong opening, the price being two and a quarter cents per pound higher than last spring's, remarking that it would help them to recoup on the extra money they had been compelled to pay out last winter on account of the exceptionally high price of feed.

**COMMONS DEBATE.**  
Bernier's North Pole Scheme Under Discussion.  
Ottawa, May 1.—The proceedings in the house of commons to-day were of a quiet nature, and although there was considerable business done, there was not much discussion. One of the subjects that came up for consideration was the proposal by John Charlton to give some substantial aid to Capt. Bernier, who proposes to find the North Pole, and when he has found it to attach thereto the British flag. Mr. Charlton thought that Canada should aid a Canadian in this worthy expedition, which would do much credit to the country, and perhaps materially for the country. Sir Wilfrid Laurier and Mr. Borden took a part in the discussion which followed, and both sides agreed that if there was a man in Canada, and perhaps out of Canada, who could get to the North Pole, that man was Capt. Bernier; that if pluck and determination count for anything, the premier would not say that the government would take the expense of both sides of the house into serious consideration.

When the members got back from their polar expedition, Mr. Bourassa read a resolution against the embargo on Canadian cattle in Great Britain, and the house expressed sympathy with the purpose of his resolution.  
In a discussion on the salaries of judges Mr. Casgrain protested that those officials were not sufficiently paid. Mr. Fitzpatrick's bill to amend the act respecting judges of provincial courts was given a third reading.  
The house further considered the annual estimates of the minister of railways and canals.

**WILL TAKE NO STOCK.**  
To Offer At the Great Packing Centres.  
Denver, Colo., May 2.—Not a single head of cattle was sold in the Denver market yesterday, and the commission men almost without exception wired to their customers in all parts of the west not to ship any cattle or hogs or sheep to the markets in this city or Kansas City or Omaha, or Chicago. Commission men in the other cities understood to have taken similar action. Many thousands of head are on the way to market and three or four days will pass before the effect of the order is felt but at the beginning of next week little or no stock will be offered at the packing centres. Commission men say they have taken this radical action because of the raid made by the "cattle trust" on prices of stock.
