The Circular reseven years of age, fatally wounded anything, which caused a revival of fers neither to the nature of the base of the brain. He was removed to the coronation ceremonies could not correspondents in all the chief centhe hospital and cannot live. The father of the Martin Monahan, is prompt operation was the only course there of the Martin Monahan, is prompt operation was the only course the course t available to save the king's life. This pean capitals are arriving in large decision was acted on with the utmost speed. The public were notified of details of the king's condition while the postponement, the announcement of which fell on the city like a bolt and sorrow, speken by the prominent from the blue sky and the necessity men from all over the world, who paraphernalia for the operation were are visitors in London, tell the same quickly requisitioned from the nearest story.

The news of the king's condition came with great sudgenness even in official circles and to those nearest the 1901, and says he went from there to er part of last week, and was attended by his physicians.

> The Operation Performed. The Morning Leader says that all he nearest senior members of the lamily saw the king shortly before the operation. His majesty bore the anaesthetic remarkably well. When the incision was made considerable removed to his own bed where he will await the issue. Soon after his

quoted as saying that the doctors as perityphlitis and in cutting down the patient's right side. Dr. Treves of putrid pus, and as soon as he got through the abdominal wall. When this was evacuated the intended opcration was not completed. It remains a question whether, there is any infiltration of pus into the peritoneum. This latest news explains the apparent hesitation of medical authorities in their diagnosis when the operation was described as successful. The Times' medical correspondent writes that from the history of the The King Insisted on Close Per- king's islaess, it would appear that sonal Supervision of All the he had suffered for some time with symptoms pointing to trouble around the vermiform appendix and his advisers were able to encourage the hope that these would pass away under London, June 25.-It is known the the influence of rest and care. The king has been critically ill for more symptoms became urgent on Monday than a week. The condition of his ma but the king was anxious to defer the jesty is very grave, and the operation operation until after the coronation. was most serious. The following is an It was evident, on Tuesday, that this authentic account of the origin of could not be safely done, as the sud-

attack: The king had been in fairly den accession of symptoms indicated able size. The correspondent does not know whether, hesides pus from nervous over the many weeks of bad abscess, the surgeons removed the weather, which had spoiled many of his plans. Sir Francis Laking, who is occasionally better to be contented his majesty, for several days, warned the king not to undertake the arduous programme at Aldershot on June lieved to have the foregoing is behad been paying close attention to in the first instance with immediate thority. It suggests that another operation may be necessary.

The Daily Telegraph declares that

the illness from which the king suffered, last week, did not afford any absolute indication of the ailment which forced the operation. Monday night and vesterday morning a change set in which necessitated a minute examination, and, after careful delibera was imperative in order to avoid the chances of blood poisoning which A cabinet council, which lasted
