Doomed to Destruction. The Foundations of the Place Are Very Shaky. Venice, July 16.—Prof. Wagner, the city architect, is of the opinion that practically the whole of Venice is doomed to destruction. He says that the sub-soil has deteriorated and the piles and pillars are rotten and unable to stand the pressure on them. Shrinkages and sinking have been observed in the sub-soil for many years, although an official commission lately declared that there was no danger from these causes. Prof. Wagner advocates the restoration of the loggia of Sansovino, but not the tower. He says that if the tower is rebuilt it should be in modern style. The municipal council, however, has decided to rebuild the campanile of St. Mark's and the Sansovino loggia. It has opened the subscription list for this purpose with a vote of 500,000 lire.

Brain Food Nonsense. Another ridiculous food fad has been branded by the most competent authorities. A correct diet will not only nourish a particular part of the body, but it will sustain every other part. Yet, however good your food may be, its nutriment is destroyed by indigestion or dyspepsia. You must prepare for their appearance or prevent their coming by taking regular doses of Green August Flower, the favorite medicine of the healthy millions. A few doses aids digestion, stimulates the liver to healthy action, purifies the blood, and makes you feel buoyant and vigorous. You can get this reliable remedy at Wade's drug store.
