MRS. CUMMINGS' ADDRESS DELIVERED AT WOMEN'S COUNCIL ON WEDNESDAY.

The Standing Committee Increased and Duties Assigned to the Six Just Added.

There was an informal meeting of the local branch of the national council of women, yesterday afternoon, in the council chamber to welcome Mrs. Willoughby Cummings, of Toronto, who was, last week, appointed corresponding secretary of the national council in Canada, in place of Miss Theresa Wilson.

Mrs. Cummings has been actively interested in the national council ever since its organization. She was its first corresponding secretary, and, although the position was not sinecure, she did the work as a labor of love, receiving no pecuniary remuneration for her services. Three years ago she resigned to make way for Miss Wilson, Lady Aberdeen's private secretary, and fulfilled the duties of recording secretary ever since. At the time of Miss Wilson's appointment, Lady Aberdeen raised a guarantee fund of \$1,000, payable annually for three years, out of which to pay the corresponding secretary's salary (\$800) and rent of an office. That guarantee fund expired this year, and all the council members felt that the annual meeting at St. John, this month, would be a crisis in the history of the organization.

Mrs. Cummings and Miss Machar have just returned from St. John, and their report of the gathering is highly satisfactory. The local council was pleased to hear that Mrs. Cummings was being unanimously appointed corresponding secretary and while her present salary is only \$400 (while Miss Wilson's was \$800) it is hoped that the council may be in a position to increase that amount before long.

No rent will be asked for an office for Mrs. Cummings, as the council will reimburse in that way. Miss Laidlaw, Montreal, was appointed recording secretary in Mrs. Cummings's place.

In her account of the annual meeting at St. John, Mrs. Cummings said that there was a feeling of fear about the financial standing of the council, but when the treasurer's report was read it was found that there was a balance of \$250 at the close of May—something that never before occurred in the annals of the council. While the annual meeting was in progress in New Brunswick, the executive of the International council was meeting in Copenhagen and greetings were sent from St. John. One of the most important features of the work done at the St. John meeting was the increase of standing committees. There are seventeen committees now instead of eleven, and Mrs. Cummings dwelt upon the work expected of the six new committees. The national council chooses the convenors of these committees and every local council sends one member to represent it on each committee. Each local council will therefore be especially interested in the six new committees as they will be expected to choose members who are particularly fitted for the subject assigned them on the different committees.

1—Domestic science. With reference to this committee a lady from Orillia had written suggesting that the council establish training schools for the Indian girls on the reserves in Ontario and Quebec. There is a reserve near Orillia; another near Brantford, and in other parts of both provinces. If these girls were trained for domestic service the servant problem might be solved without the introduction of Chinamen.

2—Agriculture for women. There are splendid training schools of this sort in England, and the matter is worthy of serious consideration in the agricultural districts of Canada.

3—Promotion of industry and fine arts, including music. It is suggested that the members for this committee be chosen from the woman's art association.

4—Election of women on the school board. In New Brunswick they have women on every school board and they were greatly surprised to hear that this was not so in Canada. These members are not elected in ward elections, but are chosen by the city councils. The school board must comprise a certain number and so many of that number must be women. This is the work in which Mrs. Boomer is especially interested in London, Ont. It is claimed that women are interested in the school board for its own sake, whereas men use it as a stepping stone to politics.

5—Vacating schools. These schools are becoming most popular in the states. Children of the poorer districts are taught for two hours a day in vacation, not according to the usual curriculum, but history or some such subject, while little ones are given a heap of sand and allowed to play with it.

6—A uniform standard of education for teachers in Canada. At present the standard in Quebec is lower than that in Ontario, while we are below the standard of Manitoba. The medical men have only just succeeded in establishing a dominion standard for their profession, and the teachers should also secure a standard that would be equally recognized all over the dominion. In closing her address Mrs. Cummings said that the council meant to publish a leaflet called "Council News." The first issue will be ready in September at five cents a copy. After that the leaflet will be issued quarterly (possibly monthly) at fifteen cents a year. The chief work of the affiliated societies is to touch with the work done by the whole council.

The city council of Toronto sent a message to the national council meeting at St. John, asking it to hold its next annual meeting in Toronto. The invitation has been accepted.

Lake Ontario Park. Another large crowd hied to Lake Ontario park last evening, completely filling the pavilion. The Roberts company are giving good performances. The illustrated songs are pleasing features. Tomorrow is children's day, and an afternoon matinee will be given.

Remember to pay your gas and electric light bills before the 20th and get the benefit of the discount.

GOING TO BE MARRIED.

To Ask That California Asphalt Be Shut Out.

Toronto, July 17.—The marriage of John Winchester, master-in-chambers, to Miss J. Butler, of the general hospital will take place this evening in Parkdale Presbyterian church. The asphalt trust is going to fight the Forest City paving company, of London, in the courts in the endeavor to prevent the introduction of asphalt into California. A writ was taken out this morning at Osgoode Hall, on behalf of William Allan and the constructing and paving company to obtain an injunction to prevent the Forest City company and D. W. Hole from paving Spadina and other streets with California asphalt, the ground set forth being that the city's specifications require Pitch Lake asphalt from Trinidad.

Alexander Jones (colored) was sentenced, this morning, to two years in the Central prison for a murderous assault on J. Jackson, also colored. The fight was a real old-time scrap in "de war," and Jones slashed Jackson across the wrist with a razor, fell on his neck and showed it and finished up by kicking him in the head.

The iron moulkers of America will not, at present, make a demand for an eight-hour day after May 1st, 1903. The motion in favor of an eight-hour day was defeated at this morning's session, and a decision was arrived at, on the advice of president Fox, to secure first the adoption all over the continent of a nine-hour day. No general strike for this will be made, however, the intention being to adjust wage scales to call for a nine-hour day rather than an advance in wages, in the cities where longer hours are now existing. This decision is a distinct triumph for the conservative element in the convention and precludes the possibility of a general strike next spring.

ONE OF THE YARNS

Spread About the Work of New British Cabinet.

London, July 17.—The premier, A. J. Balfour, presided, to-day, in the foreign office, at the first meeting of the new administration. The colonial secretary, Joseph Chamberlain, was sufficiently recovered from the effects of the accident to attend. The meeting of the cabinet gave fresh impetus to the reconstruction reports. The most interesting of these reports is the suggestion that the duke of Marlborough will succeed Lord Curzon as viceroy of India. But there is not the least possibility of any such appointment. It appears very doubtful if Lord Curzon will resign before the expiration of his term of office. As a matter of fact there is no appointment which could be offered him.

FREEDOM OF EDINBURGH

Is To Be Conferred Upon Premier Laurier.

Edinburgh, Scotland, July 17.—The municipality of Edinburgh has decided to confer the freedom of the city on Sir Wilfrid Laurier, the premier of Canada. A bond, the premier, and colonial secretary, Newfoundland, on the occasion of their visit here, July 26th, to receive degrees from the university.

Gypsy Band Kept Moving.

Watertown, N.Y., July 17.—Sheriff Ballard, started a gypsy band out of this county last night, and his deputies saw them across the county line in Oswego. About sixty gypsies were camped by the No. 4 mill race in Watertown. The sheriff and his deputy, superintendent Renwick of the International paper company telephoned the sheriff that he did not care to have them as neighbors.

The sheriff and his deputies went to Glen Park and notified the chief of the gypsies that it was "his move." The chief told the sheriff to guess again, and the sheriff handcuffed several of the men and started for the mill. Then they were notified that they came from Alabama, and had been taking a tour through Canada.

Down The River Notes.

The trustees of Thousand Island park association have had plans drawn for a large hotel which will be called the New England, as it is to supplant the present New England and will no doubt be run on the same plan.

A baseball team has been organized at Thousand Island park, and an amateur team has been organized at Gen. Andrew C. Field, of Tarrytown, N.Y., has purchased Hub Island, situated directly above Thousand Island park.

The steamer York, on Saturday, will carry the A.O.R. excursion from Cortland and Central New York points among the Thousand Islands.

Speaks Well For System.

Hamilton Times—Never at any time in the history of the public schools of the city has the permanency of the pupils been so good as it is now. That speaks well for the vertical system. It makes for stability, and that is the first thing to be secured. The few who wish to acquire a fancy style can easily get it elsewhere.

Not According To Specifications.

Messrs. Milo, Savage and Abernethy tendered for the painting of the city buildings' roof and fire hall No. 1. The latter's figure was the lowest, but none of the three were according to specifications. If Mr. Abernethy agrees to do the work as laid down in the specifications, the Board of Works committee will award him the tender.

Grasshopper That Eats Cloth.

New Brunswick, N.J., July 17.—The species of grasshopper that feeds on wearing apparel has arrived here. The first victim was John S. Stewart, who found a grasshopper on his coat. He knocked the insect off, and it carried away a section of the coat larger than a pea. Several other cases of a similar nature have been reported.

INCIDENTS OF THE DAY.

PARAGRAPHS PICKED UP BY OUR BUSY REPORTERS.

The Spice of Every Day Life — What the People Are Talking About—Nothing Escapes Attention.

Green gage plums, 2 lb. can 10c., at Mullin's.

Mr. Hannah Carr, Belleville, for vagrancy, will spend a year in the Mercer reformatory.

Monkey Brand soap makes copper like gold, tin like silver, crockery like marble, and windows like crystal.

Remember to pay your gas and electric light bills before the 20th and get the benefit of the discount.

Mr. Hetherington and Miss M. Hetherington, New York city, arrived this afternoon on a visit to Mrs. M. Brennan, Johnston street.

Mrs. Johnston and Miss Maud Guy, Lamoine, Montana, are en route to Kingston, to visit their mother, Mrs. John Hamer, Princess street.

D. A. Cays, real estate agent, has disposed of two brick dwellings on Brock street, owned by Mrs. Chadwick, to John Hughes, formerly of Hatteras.

This morning Fred Murray, an employee of the street railway company, stepped on a rusty nail, which penetrated his foot. He will be laid up for some days.

The financial district meeting of the Methodist church will be held on August 6th, in Brock street church, Kingston. Sabbath school convention at 4 p.m. and 8 p.m.

The same matter as the masonic order reported that he had appointed R. W. Bro. A. Shaw, P.D.D.G.M. (Kingston), representative of the grand lodge of Mississippi, in place of Mr. W. Bro. Hungerford, deceased.

Owing to the high wind Thomas McCaughey had considerable difficulty in bringing his steam yacht from his summer home at the foot of Howe Island to the city this morning. He did not arrive here until eleven o'clock.

During a thunder storm this week Joseph Smith, this city, engaged in fishing near Kingston Mills, was struck by lightning. His right arm has since been powerless. He was locking a barn door at the time, the lightning striking the lock and affecting his arm.

Remember to pay your gas and electric light bills before the 20th and get the benefit of the discount.

This morning 140 campers of Utica, N.Y., holding forth at camp Darling, near Cape Vincent, came over in a private yacht and spent half a day in this city. They all belong to the Y.M.C.A. at Utica, and secretary Lawrence, of the local association, arranged for them to lunch at a local restaurant.

Will Return Voluntarily.

Chief of police Baillie this afternoon received a message from Syracuse, N.Y., to the effect that a policeman, constable would come over to-morrow to return with the young man Milne and his wife, under arrest here. As far as known there is not any complaint against the young man; the warrant charges the girl with the theft of \$303. The young man tells contradictory stories concerning his alleged marriage. He has told some that he was married seven months ago to others that he was unmarried. At all events, the young man possesses a ring, which looks like the conventional matrimonial hoop of gold. It is expected that upon their return to Syracuse, they having volunteered to go, reconciliatory steps will be effected and proceedings against them dropped.

Served In Fenian Raids.

George Sarsfield, who died at his home in this city on July 16th, had been a well known resident for many years. He was born in Ireland about fifty-six years ago, and came out to Canada when a young lad. For many years he was proprietor of a boot and shoe store on Princess street. Lately he conducted a shoemaking and repair business on Montreal street, near from Prince Street. He was a member of Kingston lodge, No. 20, C.O.C.F., and an attendant at Brock street Methodist church. He is survived by a wife and daughter. The deceased was a veteran of the Fenian raids, serving in Kingston at the time.

They Were Afraid.

Both Aldermen Tait and Sears refused to move the motion instructing the market clerk to enforce the terms of Miss Shanahan's lease at the market shambles. Alderman Abbott blew wreaths of smoke around the Frontenac representative's head, and declared that the two aldermen were afraid. "Well, I'll move it," called out Alderman Graham. "I'm afraid of nothing," and so the city engineer, inscribed the Victoria ward man's name upon the resolution.

Clever Little Girl.

Little Miss Marion Hewton, who headed the list of those passing the entrance examinations, is a daughter of John Hewton, manager of the Kingston brewery company. The little girl will be twelve years of age in the coming next, and is one of those who has been advanced from class to class by the interim promotion system.

A NEW EXPLOSIVE.

Hathaway is Claimed to Have Qualities of Its Own.

Cleveland, July 17.—Much interest has been excited here over the recent tests of a queer, greenish powder which may revolutionize warfare. The new explosive is known as Hathaway. Prof. Charles F. Olney, N. C. Brooks, I. R. Seagrave, and Charles Seares were among those present at the tests. The inventor's claims are as follows: A combination of concussion and flame is necessary to explode the powder. The greatest concussion results only in sparks, and in fire the explosive powder burns only as a match would. The powder will explode when frozen, and therefore can be used where, for blasting purposes, dynamite would be useless.

The tests were designed to prove the above conditions. A quantity of the powder was buried in a ton of ice and when a thermometer had registered a temperature below thirty-two degrees, a detonating cap was exploded in the charge and infinitesimal fragments of ice were blown to the four winds. A tin can was filled with the powder, and a forty-four calibre rifle ball fired through the can. No explosion ensued, nor did there when some of the powder was placed on an anvil and struck violently with a hammer. A hollow steel cylinder was placed on the ground and two steel plates, each an eighth of an inch in thickness, were laid on top of it. On these an ounce and a half of powder was scattered, and a rifle ball discharged, with the result that the centres of the plates were blown out as cleanly as though they had been cut with a die and the centre pieces were imbedded in the earth.

The proper mixture of the ingredients and the carbons which compose the new powder has occupied the time of the inventor, Prof. G. M. Hathaway, for fourteen years, and he now believes that he has an explosive which will make war so terrible that it will be impossible and as well rendered herculean service in peaceful commercial pursuits.

Claim Against Canada.

Washington, D.C. July 17.—Col. W. W. Dudley and Mr. McLeod, of Vermont, yesterday, presented anew to the state department, the case of the State of Vermont, who claims compensation from the government of Canada for land amounting to the twelve square miles at the head of the Grand River. The claim dates back to the close of the eighteenth century, and in one phase or the other has been before the state department repeatedly. Col. Dudley made a two hours' argument on this claim, which is being again considered, with a view to securing its submission to arbitration.

Division In Irish Party.

London, July 17.—It is stated, says the Times, that a section of the Irish nationalist party views with disfavor the policy which William O'Brien, M.P., endorses without himself attending parliament. The earliest symptoms of restlessness were displayed at a recent meeting of the directorate of the Irish League, when O'Brien's proposal that the Irish members should give up attending the house of commons in order to devote themselves solely to an agrarian campaign at home was easily defeated.

Lots of Cranberry Sauce.

Boston, Mass., July 17.—Reports from cranberry growers of the Cape Cod and Plymouth sections indicate that the crop this season will be larger than for many years. There are hundreds of acres of new bog in bearing condition. The season will begin about the last of next month and continue six weeks. The early berries will be shipped to the markets of the west, which during the past few years have been found to be the best that the growers have ever had.

Oak Hall.

Perfect fitting trousers, in serge, fine tweeds and worsteds, \$2.50, \$3, \$3.50 and \$4. The H. D. Bibby Co.

The German emperor's new schooner Meteor was easily first in the yacht race from Heligoland to Dover, for the coronation cup. The weather was not favorable, and the Meteor was about forty-six hours in covering a distance of 310 miles.

It is likely that the Canadian government will erect a separate building at Osaka, Japan, in which to display the Canadian exhibit at the exhibition to be held there in 1903.

SYRUP OF FIGS ACTS GENTLY ON KIDNEYS, LIVER AND BOWELS. CLEANS THE SYSTEM EFFECTUALLY, DISPELS COLDS, HEADACHES, & FEVERS; OVERCOMES HABITUAL CONSTIPATION PERMANENTLY. ITS BENEFICIAL EFFECTS TO GET TO THE SOURCE OF THE DISEASE.

BUY THE GENUINE—MANFD BY CALIFORNIA FIG SYRUP CO.

Cocoa is good—Coffee is better—but Blue Ribbon Tea is best of all!

DR. J. COLLIS BROWNE'S CHLORODYNE.

THE ORIGINAL AND ONLY GENUINE. Chlorodyne Chlorodyne Chlorodyne Chlorodyne Chlorodyne Chlorodyne

It is admitted by the profession to be the most wonderful and valuable remedy ever discovered. Is the best remedy known for Coughs, Consumption, Bronchitis, Asthma, effectively checks and cures those less often fatal diseases: Diphtheria, Fever, Croup, Ague, acts like a charm in Diarrhoea and is the only specific in Cholera and Dysentery, effectively cuts short all attacks of Ectopy, Hysteria, Palpitation and Spasms, is the only palliative in Neuralgia, Rheumatism, Gout, Cancer, Toothache, Menstruation, etc.

From W. Keating, Pettigrew, M.D., formerly Lecturer at St. George's Hospital, London—"I have no hesitation in stating that I have never met with any medicine so efficacious as an Anti-spasmodic and a Sedative I have used it in consumption, Asthma, Diarrhoea, and other diseases; and I am perfectly satisfied with the result." Earl Russell communicated to the College of Physicians that he received a dispatch from Her Majesty's Council at Manila to the effect that Cholera has been raging fearfully, and that the only REMEDY of any service was CHLORODYNE.—See Lancet, 1st December, 1864.

CAUTION—BEWARE OF PIRACY AND IMITATIONS. CAUTION—Vice Chancellor Sir W. Page Wood stated that DR. J. COLLIS BROWNE was undoubtedly the inventor of CHLORODYNE. Also the whole story of the defendant Freeman was deliberately untrue, which he regretted to say had been sworn to.—See Times, July 13th, 1864.

Sold in bottles of 1s. 4d., 2s. 6d., 4s. 6d., and 11s. each. None is genuine without the words "Dr. J. Collis Browne's Chlorodyne" on the Government Stamp. Overwhelming Medical Testimony accompanies each bottle. SOLE MANUFACTURER—J. T. DAVENPORT, 33 Great Russell Street, Bloomsbury, London, Eng.
