THINKS PREMIER ROSS WILL HAVE WORKING MAJORITY.

Coal Goes Up in Montreal, Touching the Highest Point Ever Reached at This Season of Year,

Montreal, July 18.—Speaker Evan-turel, of the Ontario legislature, who is spending a few days in Montreal, in an interview on the Ontario political situation said:

"The situation is a difficult one at present, of course, since there are constituencies in dispute, and until they are determined nothing positive can be said. I am perfectly confident, however that the government will be sus-tained. North Renfrew, the late Mr. Munro's constituency, has been opened up, and it will go strongly liberal. I was there recently, and I could see no possible doubt of liberal success. South Oxford was lost through overconfidence, It has always been strongly liberal, one of the strongholds, in fact, and it may be thrown open again, in which case the situation will be reversed, and there will be a lib eral member instead of conservative." Regarding the rumors of a coalition, Mr. Evanturel said "Such an idea has gever been mentioned, and is absurd. When Mr. Ross returns from the coronation things will be straightened out, and I have not the slightest doubt but that be will obtain a comfortable working majority."

An advance of twenty-five cents yes terday, brought the price of hard coal to \$6.50 a ton, which is the highest point reached for many years at this season. Scarcity of the necessary commodity caused by the strike in the Pennsylvania fields, is the cause of this advance.

A Story Of Sir John. Ottawa Events.

An incident in connection with Sir John Macconald, which has never appeared in print, is worth telling, and, what is more, is true. The prime minister had gone into the Kingston post office to see an old triend. On coming out, the caretaker commenced having, and a bountiful a man named Dunbar, stood ready to crop is being harvested. Many new open the outside door. Stopping in Langwith has a force of masons erect his hand on his forchead and said to himself aloud There's something I've forgotten.

LATEST FARBION NOTES. An Attractive Golf Costum

Pipings have so gained in populari y that they are a feature of by far the greater number of garments of whatever sort, even appearing upon what it is the fad of the moment to call "tub" frocks and shirtwaists.

Quite a novelty in this line are pipings of leather and kid which to be seen upon a few of the most exclusive models of the tailor-made styles. Such a one is shown in the accompanying illustration. This smart frock is made of tartan in shades of dark and light gray, and is designed for golf or walking. The skirt clears the ground by about two inches. has the very narrow front panel which appears upon so many of the skirts of the season, the pipings of white kir defining shaply the outline. The edge of the skirt is finished with rows of machine stitching done with Corticelsilk. The blouse is very simple design, double breasted, and with basque, all the edges being piped with white kid, which also forms the belt There is an outside breast pocket flap. and a velvet collar facing.

Short Cut Highway. Atlantic City, N.J., July 18 .- Prominent automobilists, bleyclists and good road crusaders took part in a conference here, to-day, to discuss the

building of a short cut highway from New York to Chicago, which will reduce the distance of the present round about route between the metropolitan cities of the east and the west from 987 to 850 miles. The promoters of the project, including Col. Albert A. Pope, of Boston, and others, outlined their plans at considerable length and dwelt upon the benefits to be derived from the completion of the highway. It was pointed out that fully 400 miles of the projected route already has been equipped with good roads. Much of it has been macadamized, and it is estimated that the other portion can be put in good shape at a cost
