THE CASE ADJOURNED. Striking Machinists in the Police Court.

The Locomotive Works company has found it necessary to take action against its former employees. The "last straw which broke the camel's back" was added Thursday, when the strikers attempted to send out of the city a machinist engaged by the company. As a result Robert Wilson, Henry Brouse and Robert Holding were charged at the police court, this morning, with interference with the Locomotive Works company in the prosecution of its work. The prisoners were represented by Dr. Smythe, while J. L. Whiting, K.C., appeared for the prosecution.

The magistrate did not ask the men to plead, contenting himself with reading to them the charge. Dr. Smythe pointed out that the matter was one of great importance, not only to the men but to the company and the citizens. He asked for an adjournment until next Friday. Mr. Whiting objected, and named Monday.

Dr. Smythe thought that he could not be ready before Wednesday at the very earliest. Mr. Whiting advanced to Tuesday, but Dr. Smythe pressed for Wednesday, which was finally accepted. The magistrate remarked that the strikers had been hanging fire so long, it was a pity it could not be wound up.

Dr. Smythe added that the community desired that the difficulty be wound up. The magistrate further remarked that the men were suffering, as were their wives, families and citizens generally. He advised Dr. Smythe to counsel the men, with a view to settlement, so that both parties could come to terms.

Dr. Smythe—"The Briton and Boer to be done together." The magistrate maintained that it was the duty of every citizen to use his influence towards a satisfactory settlement. The only persons who were profiting by the strike were the lawyers.

FIXED 'EM UP THE FINANCES OF PERSIA ARE ARRANGED

And Good Feeling Has Been Reached—Russia Will Have to Step Back for the Future.

London, Sept. 6.—It is stated on good authority that as a result of the Shah of Persia's recent visit to England, a rearrangement of Persian finances has been accomplished. It is further stated that English influence in Persia, on which Russia has lately encroached, will be restored. A despatch to the Times, from Tokio, says that the Japanese cruiser Takachio has returned from Marcus island. She reports that Capt. Because of Mrs. Mabce's state of health, he left Port Hope and went south as far as New Mexico, and for the last two years has been engaged in sheep farming there on a large scale. Now he is back to Canada, and will try life in the west. To a man from New Mexico, Ontario, with its splendid harvest and bountiful rains, is a very paradise. Mr. Mabce is glad to be under the British flag once more.

A Very Narrow Escape. Last evening Motorman Cummins, of the street railway service, by his presence of mind and prompt action, saved the life of an aged woman at the corner of Brock and Ontario streets. The valve she carried was partly crushed by the car wheels.

It takes only one volcano in the earth to show that the heart of the earth is fire, and that some day it may burst through the thickest crust. This is the tragedy of our single sins. Down the crack which some one transgression makes in the fair face of a smooth and blooming life, we can see waiting for God's judgment word the fire below which that life shall be at last consumed with fervent heat.

RUDOLF VIRCHOW IS DEAD. Noted Pathologist Passes Away at the German Capital.

LATE PROF. VIRCHOW. Berlin, Sept. 5.—Prof. Rudolf Virchow, the pathologist, died here at two o'clock this afternoon, aged eighty-one years.

Prof. Virchow's discovery of the cellular nature of animal tissue won him world-wide fame. His theory was that the cell was possessed of an independent life, and that it was self-propagating. Taking the place of the former vague and pseudo-philosophical views of vitality, this theory formed the basis for a new science of physiology.
