

THE DAILY BRITISH WHIG.

69TH YEAR. NO. 224.

KINGSTON, ONTARIO, THURSDAY, SEPTEMBER 25, 1902.

LAST EDITION.

LOCAL MEMORANDA.

The Daily Note Book For Whig Readers to Post Themselves By.
Jenkins, my hater.
Mars Bros. at Victoria theatre to-night.
Sun rises to-morrow at 5:52 a.m., and sets at 5:50 p.m.
"Way Down East" at the Grand Opera House this evening.

Limstone Lodge, No. 91, A.O.U.W., meets to-night at eight o'clock.
Even if the streets in your own town are muddy, you can be clean enough to insist that the mud is cleaner than that in the next town.

That man is a fool who will mourn because the lack of money shuts him out from what is many times erotically termed the "best society."
Somehow it does not seem just the thing to the average man for a woman to drown through by imbibing in the stuff that makes trouble for man.

When you lose patience with your son, be fair enough to stop for a minute or two and think what trial your father had when you were a boy.

This day in the world's history: Death of Premier Marchand, of Quebec, 1866; Philadelphia captured by the British, 1777; Calumet ship sailed on his second voyage, 1492; siege of Paris began, 1870; Arnold deserted, 1780; Frontenac arrived in Canada, 1680; New York surrendered to the British, 1776; discovery of the Pacific ocean by Balboa, 1513; William II crowned, 1087.

Write for particulars today. Aldis Owen Hall, proprietor.

OWN PLANTS.

Municipal Ownership is Favored.

SAVE THE JEWS

BY CRUSHING TYRANNICAL ROUMANIA.

But None of the Powers Will Take the Lead—A Valuable Invention—Bicycle Records Broken—Disapprove of Education Bill.

London, Sept. 25.—Seventeen out of the twenty-eight Metropolitan boroughs have either installed electric plants or made arrangements for introducing it as a municipal or borough work. Many of these boroughs are poor districts like Poplar, in the east end, where the ratable valuation of property is low and the private consumption of electric light is small.

Nothing that will do any permanent good can result from Secretary Hay's note to the powers on Rumania's treatment of Hebrews, unless somebody is willing to crush Rumania, and no power seems anxious to take on that task. The foregoing quotation from the utterances of an experienced English official represents the real opinion of the British foreign office on the subject of the negotiations between America and Europe.

F. W. Chase, riding a twenty-three and one-fourth horse power motor bicycle at the Crystal Palace, yesterday, broke all records from five miles in six minutes thirty-five and two-fifths seconds, to fifty miles in one hour and seven minutes and fifty-seven and two-fifths seconds.

It is announced from an official Vienna source that Austria does not intend to accept the leading role among the continental powers in regulating the affairs of the Rumanian Jews. On the other hand a statement emanates from Paris that the French government will support the note of Mr. Hay. The attitude of France will be published when the signatories of the Berlin treaty agree upon their action.

At a meeting of the liberal unionists in Mr. Chamberlain's constituency, West Birmingham, it was resolved to hold meetings to express disapproval of the government's education bill.

Austin Chamberlain has asked Signor Piccoli, the inventor of the electric fan, to come to London and explain his system for the benefit of the British postal authorities.

A Londoner named John Willis has patented a novel engine for marine propulsion, which, he claims, will reduce the crossing of the Atlantic to a three days' journey.

The Morning Post says it hopes an American will be put on the committee of supervision, and that he accompanies the committee to South Africa to see the conditions in the new colonies, the hardships of the Boer women and children, and the British efforts to diminish them.

A Vienna correspondent quotes a despatch from Salonica, in which it is said that anarchy is rapidly spreading in Macedonia and the uneasiness of a peaceful portion of the population is general. The Bulgarian chiefs are directing their attention chiefly toward the Turkish gendarmerie, many of whom have been killed. The state of the Balkan Peninsula will continue to grow worse, as never since the Berlin congress has there been less prospect of understanding between the powers with a view to collective diplomatic military intervention in any part of the sultan's dominions.

The Cape Town correspondent of The Times says the Archbishop of Cape Town, speaking in a native college for the sons of chiefs, emphasized the distinction which, he said, existed between a loyal boy called Ethiopian Order of the Anglican church and the so-called Ethiopian movement engineered from America by educated negroes, which he regarded with grave anxiety by all persons who are acquainted with native Africans. The American Methodist Episcopal church authorities deny that their mission has any political significance, but there is strong evidence to the contrary.

A correspondent in Alexandria gives alarming statistics of the cholera epidemic raging there. On Monday there were 726 fresh cases reported; the death list reached 610.

THE TEMISCAMING COUNTRY,

Interesting Report on Its Rocks and Forests.

Toronto, Sept. 25.—The preliminary report of geologist L. L. Ballou, who accompanied T. B. Speight, surveying party into the country lying between Lake Temiscaming and the Abitibi river, has been received at the bureau of mines.

In part the report says that the rock in the township of Elvy are chiefly of the Huronian series and as the minerals of Ontario are chiefly found in that formation this is considered encouraging.

Few miles north of Black River he encountered a clay belt, which extended northward about twenty miles, in the land being almost completely level. The timber is chiefly spruce and poplar balsam. Balm of Gilead and white birch are also found, but only in small quantities while white or red pine is almost completely absent from the territory visited.

Mrs. Frances Holy, of Chicago, seeks to collect \$10,000 damages from a seaman, who she declares, sold liquor to her husband, causing him to become a habitual drunkard.

NEWS FROM LONDON.

Talk of British Shipping Combine—The Boer Appeal.

New York, Sept. 25.—Tribune London cable: American stocks were weak and unsupported yesterday, declining in consequence of the conditions of monetary uncertainty at New York and Chicago. There were signs of bewilderment rather than of nervousness among the operators, who were intently watching the dealing in quotations at noon, without being able to explain what was going on.

Reports that the Morgan shipping combination had been arranged in detail were regarded as reassuring, owing to the magnitude of the operations carried out by American and British capitalists. The completion of the Atlantic shipping trust is followed quickly by a revival of the rumors that the counter combination will be formed between the Cunard line and the various lines interested in Canadian commerce. This has been a favorite theory in Liverpool, but there has been no confirmation from any Canadian source. The bulk of the subsidies required for a fast Canadian service will come from Ottawa, but no portion will be available for Cunarders running to United States ports.

The Cunard line will receive, without doubt, a largely increased mail subsidy if it agrees to build ships which can compete with the fast German liners. The Cunard and Canadian services are not likely to be combined for any purpose, but each will be sustained by liberal aid from the government, whose plan are fully worked out during the winter.

The appeal of the Boer generals in mitigating the sufferings of homeless burghers excites unsympathetic comments here. It is intimated by several writers that the British grant should be supplemented by the remainder of the Transvaal funds which Mr. Kruger and Dr. Leyds have controlled and that English charity should be reserved exclusively for the loyalists in South Africa.

TO GET RID OF SMOKE.

Council Will Adopt Device of Scotch Engineer.

Paris, Sept. 25.—According to present outlook, Paris, the last modern city to suffer from the smoke nuisance, will be the first to rid itself of that evil. The committee of the municipal council, which, last year, offered a large prize for the most practicable smoke consumer, has completed its examination of several scores of inventions, both French and foreign. The preference is given to an invention of John Alves; a Scotch engineer, which is called the "Bunsen apparatus."

By the use of it an ordinary furnace is converted into a Bunsen furnace through the injection of heated air in such a manner as thoroughly to mix the gases and at the same time supply an extra third of oxygen and bring the latter in contact with the uncombusted gases of the fuel. This large quantity of oxygen ignites the carbon, which otherwise would escape in the form of smoke. The apparatus greatly increases the heat produced by any given quantity of fuel. It is being applied to locomotives of the Northern and Western railways of France, as well as to the furnaces of several state manufactories, and here it has proved entirely successful.

Will Revise Maritime Laws.

Hamburg, Sept. 25.—Nearly every country of the civilized world is represented at the annual session of the International Maritime conference, which began a three days' session here to-day. The conference is of the usual importance, as a strong effort is being made to correct the discrepancies which exist in the laws of the maritime and admiralty laws. The differences in the laws of countries have worked great injustice to both shipowners and shippers. With a view to bringing about a better uniformity in maritime laws, the conference will discuss an international code on collision cases, and the law of property in ships, maritime mortgages and liens and rights in rem.

Reitz Coming To America.

Amsterdam, Sept. 25.—Among the passengers sailing for New York to-day is Mr. Reitz, formerly state secretary of the Transvaal republic. The purpose of Mr. Reitz' visit to America is to deliver a series of lectures for the benefit of the Boers. It was known that he had the trip in contemplation for some time, but his early departure was unexpected and it is said to be due to the insistence of the Boer Generals Botha, Dewet, and Delarey, that the anti-British propaganda in Europe must be moderated.

Texas Republicans To Fight.

Dallas, Texas, Sept. 25.—Politicians of all parties are manifesting keen interest in the fifth district republican congressional convention in session here, as it is believed to mark the beginning of a vigorous fight that the republicans purpose to make for congressmen in Texas. The candidates for the nomination are Dr. S. H. Pitts, of Hillsborough, and S. H. Lumpkin, of Meridian. There is a strong possibility that fusion may be agreed upon by the republicans and populists.

An Albino Of The Deep.

New Bedford, Mass., Sept. 25.—The whaling barque Platina, of this port, Capt. McKenzie, about May 10th, captured a pure white whale, which made one hundred barrels of oil. In his twenty-five years of whaling Capt. McKenzie writes that he never before saw a white whale.

Treasurer Refuses Information.

London, Sept. 25.—A Wellington despatch says the acting treasurer of New Zealand refuses to inform parliament how his government is raising its new loan. The treasurer has simply said New Zealand could afford to snap its finger at the London money market.

WORLD NEWS

Comes To Us From All Quarters.

FEW BRIEF ITEMS

TELEGRAMS FROM THE FOUR QUARTERS OF EARTH.

Matters That Interest Everybody—Notes From All Over—Little of Everything Easily Read and Remembered By The Dear Public.

The prohibitionists of Toronto are preparing for the coming referendum campaign.

The pension list of the United States government now exceeds the 1,000,000 mark.

At Marceta, Italy, seven people were killed in a fire which destroyed twenty houses.

The United States commissioner of Labour, Carroll D. Wright, says that the striking miners will lose their fight within a month.

A cablegram has been received, stating that a party of Boers, who are to visit Canada, sailed yesterday on the SS. Lake Champlain.

Miss Maude True, of Toronto, visiting at New York, routed a burglar who tried to get into her sister's house. The police captured him.

All the pupils at public school No. 13, Scranton, Pa., struck because the father of the teacher, Miss Florence Freeman, is a watchman at a mine.

At Cologne the International Congress for legislative protection of workmen decided to establish a non-political international labor bureau.

Major Studdart was committed for trial at Dublin on charges of fraud in connection with the purchase of horses for the British forces in South Africa.

Henry Phipps, who has given \$100,000 to aid Boer sufferers through the war, belongs to New York City, and is a director of the Carnegie Steel company.

At St. John the trial of Fred Higgins, charged with the murder of Willie Doherty, resulted in a verdict of guilty, with a strong recommendation to mercy.

A well dressed woman landing from a foreign steamer at New York, was discovered to have \$750 worth of fine ostrich feathers sewed in the lining of her petticoat.

County Treasurer William C. Thompson, charged with embezzling York, Pa., county funds, to the amount of \$73,000, was arrested and placed under \$50,000 bail.

King Oscar's yacht, the Crown Princess, Princess Victoria, on board, has run on the rocks near Ralmor, in the Baltic. Vessels have gone to the yacht's assistance.

Dr. Balfour, of Edinburgh; Dr. Abbott, of Philadelphia, and Dr. Westbrook, of Minneapolis, are mentioned in connection with the chair of hygiene in McGill College.

Sir Wilfrid Laurier has telegraphed the Lord Mayor of Liverpool that he accepts the invitation to open a new Produce Exchange in that city, prior to his sailing for Canada.

A technical school will be established in Montreal. The Montreal branch of the Canadian Manufacturers' Association and the Mechanics' Institute are to cooperate in founding it.

The trial of the big \$10,000 libel suit brought by T. H. Preston against the Ottawa Journal, arising out of evidence given in the Cook Senate investigation, opened at Ottawa to-day.

The General Board of Methodist Missions has appointed Rev. James Macdonald, M.A., Sault Ste. Marie, to the superintendency of missions in New Ontario, with headquarters at Sault Ste. Marie.

OTTAWA NEWS BUDGET.

Died In The Philippines—New Post Office Regulations.

Ottawa, Sept. 25.—Word has been received of the death of Walter A. Scott, formerly of Ottawa, by cholera, after a few hours' illness at Calcoacan, near Manila, on July 31st. Mr. Scott was a member of company "E," second Battalion Engineers, and with his company was engaged in building roads and bridges for the United States government. Deceased was formerly a member of the Primrose Snowshoe Club, of Ottawa, and was well known in athletic circles in the capital.

The latest supplement of the Canadian Postal Guide contains the following notice: "The senders of a registered article posted in Canada for delivery in Canada or in any other postal union country, may obtain an acknowledgment of its receipt by the addressee at a cost of five cents in addition to the ordinary postage and registration fees."

The visiting British editors touring Canada were shown the sights of the capital to-day. They were taken through the Eddy sulphite paper and match factories, the Booth lumber mills, and to the Experimental farm. Luncheon was served at the shanty erected in Rockcliffe Park when the Prince of Wales was here last fall. They called upon Hon. R. W. Scott, secretary of state, who explained some of the most advantageous features of our federal system of government, and told them they might find something to interest them in the statesmanlike way the school question has been handled in Canada, by which the various localities are permitted practically to run their schools on lines to suit their own views. He would commend through them to the British authorities Canada's manner of dealing with education.

CONDITIONS IN PANAMA.

Becoming Serious—Liberals Cannot Walk the Streets.

Kingston, Jamaica, Sept. 25.—The British steamer Antilian, just reached here from Colon, Colombia, brings a report that the situation on the isthmus was extremely critical when she left there last Sunday. The rebels at that time were reported to be massed near the railway between Colon and Panama, and the government was sending troops according to these reports, from Panama to Aguadulce, to cut off the rebels' retreat should they be beaten on the isthmus. The main rebel army, under Gen. Herrera, was reported Saturday and Sunday to be within seven miles of Colon. Officers of the Antilian said the business at Colon has been suspended and that the privations there are great. The government soldiers at Colon are mainly youths, and are apparently unable to stand the hardships of a campaign.

The decree preventing liberals from appearing on the streets is being strictly enforced at Colon. Enormous prices are being charged for foodstuffs, according to reports brought by the Antilian, a number of prominent people in Panama have been imprisoned because they sympathized with the rebel movement.

GUNNERS FOR COLOMBIA.

Six Arrive At Colon For Duty on Warship Bogota.

Colon, Colombia, Sept. 25.—The Colombian government received from New York by the Panama railroad steamship company's steamer Alliance two cannon and a large consignment of ammunition destined for the recently purchased warship Bogota, which is expected to reach Panama in a few days.

Six American gunners for the Bogota arrived here on board the Panama Railroad company's steamer Finance. The government expects to receive a further large shipment of ammunition shortly.

The plans of the insurgent General Herrera, in view of the clear statements made by Commander McLuan of the United States cruiser Cincinnati, with regard to transit over the isthmus, are unknown, but it is surmised in certain quarters that the transfer of all Gen. Herrera's forces to the department of Cauca is possible.

CARRIED CANADIAN COINS.

Body With Bullet-Head In Head Found At Fall River.

Fall River, Mass., Sept. 25.—The body of an unknown man, with a bullet hole in his head, has been found on a raft made of two pieces of board, fastened together with clouts, two miles from the city. A heavy revolver was clenched in the right hand. The body was that of a man twenty-five or thirty years old, 155 pounds, five feet five inches in height, brown hair, with a sprinkling of gray, teeth badly decayed. The body was well dressed. Several English and Canadian coins were found in the clothing, a gold ring set with four diamonds, three loaded cartridges and a pair of bone cuff-links. The money was in a chamois skin purse, with a brass plate, bearing the name of "G. or V. Brenna."

High Price In Winnipeg.

Winnipeg, Man., Sept. 25.—Winnipeg has practically exhausted its supply of hard coal. Two or three dealers have very small stocks, which they are holding at fifteen dollars a ton. It is suggested to use Gait coal from the west, of which a fair supply can be obtained. This will mean the substitution of soft coal grades for the present ones.

Emperor Is Reported Dead.

Paris, Sept. 25.—In a despatch from Seoul, Korea, the correspondent of the Figaro says it is reported that the emperor of Korea, is dead.

Grandulated Sugar In 100 Pound Bags

cheap at Mullen's grocery, corner Johnston and Division streets.

WEATHER PROBABILITIES.

Toronto, Ont. (10 a.m.) Sept. 25.—East of wind, cool and partly cloudy; showers to night in extreme western portion. Friday, easterly wind, cool and unsettled.

"A WORD OR TWO"

About the

NEW CLOAKS

The new cloaks—they're simply stunning—"gorgeous" shall we say? But that's hardly the expression for one usually associates the word gorgeous with voluminous splendor, whereas the new cloaks or mantles—or jackets, as you are pleased to call them, are more subdued. They have the charming refinement that indicates elegance, that subtle something that can only be found in the imported garments. Our stock is most complete in Ladies' and Children's goods.

Enthusiasm in Our Dress Goods Department.

Don't let the nicest things slip away from you—without seeing them at any rate—they're going fast; good reason, too—styles were never more charming—nor were prices ever more tempting.

Steady's THE WOMAN'S STORE.

DIED.

O'NEILL—In Kingston, on September 23rd, 1902, Arthur O'Neill. Funeral will leave his family residence, 263 Sylvan street, at 9 a.m., Friday, for St. Mary's cathedral, where a solemn requiem mass will be sung. Friends and acquaintances are respectfully invited to attend.

PEEL—At 299 University avenue, September 24th, Dorothy Peel, aged 2 years and 8 months, daughter of Mr. and Mrs. H. Peel. Funeral private from above address, at 3 p.m., Friday, September 26th.

WE HAVE ...

COMFORTABLY FURNISHED ROOMS, LIGHT and airy, centrally located. First class table board if desired. Apply at 214 Brock street.

SURGEONS USE IRON CAP.

To Reduce the Size of a Child's Head.

Trenton, N.J., Sept. 25.—Surgeons are using an iron cap, the inward pressure of which may be increased at the will of the operator, in an effort to reduce the abnormally large head of a seven-month-old child of Henry Ulrik, a Trenton butcher. The baby was born with a head twenty-three and one-half inches in circumference, and no change was apparent, until a week ago, when a reduction of one and one-half inches was obtained. The physicians say water on the brain is the cause.

We have not advanced the price of our tobaccos. Under smoking tobaccos, Bobs, Currency and Fair Play chewing tobaccos are the same size and price to the consumer as formerly. We have also extended the time for the redemption of Snowshoe tags to January 1st, 1904. The Empire Tobacco Co., limited.
