WHAT THE GOVERNMENT HAS BEGUN

Hon. Mr. Ross Tells of the Work Undertaken—He Believes His Administration Has Public Confidence.

Hon. G. W. Ross at Newmarket. We have in the last few years projected some very large measures for the improvement of the country, and it is natural to suppose that those who projected measures of that kind could be most safely entrusted to work them out.

Second, we undertook the improvement of our highways by a grant of \$1,000,000. Already four or five large counties have accepted the proposition of the government in this respect.

Third, we resolved that new Ontario should be opened up by a railroad at the expense of the province, and closely connected with existing railway systems.

Fourth, we undertook with the approval of parliament to recognize the services of the veterans, who at the risk of health and life rallied to the defence of their country over thirty years ago.

Fifth, for several years we have given special attention to the development of the mineral wealth of the province. As a result of these efforts, permit me to submit a few figures.

Production, 1898, 1901. Gold, \$27,078, \$244,443. Silver, 51,960, 84,830.

Canadians Rank First. If we have iron ore to make our own pig-iron, let us make it. If we have sugar beet to make our own sugar, let us use it.

SO VERY DIFFERENT. Some people condemn our advertising, because it is so very different from other advertising.

in any position in Canada, as I understand him, than a Canadian. (Applause). The best men to go to the northwest, would be men from the older provinces; the best men to put in the factory, ordinarily speaking, is the man educated in Canadian schools.

The Development of Agriculture. Then we have set ourselves to develop in a special way the agricultural industries of this country, and in that respect the result has been most satisfactory.

Commands Public Confidence. I say that the government that applies itself to the development of new Ontario, and the construction of a railway into new Ontario, which is now under contract, and will be running within a year and a half, and that sets itself to the development of the mineral and farming resources of the country, is a government that is entitled to and, we believe still has, the confidence of the majority of the people.

CHOPPED OFF

SO AS TO GET RELIEF FROM TASKS.

Convicts Adopt Heroic Methods of Obtaining Respite From Duties That Were Very Irksome.

Chester, Ill., Oct. 8.—Two convicts named Reardon and Rose, in the Southern Illinois Penitentiary here, chopped off three fingers each from their right hands in order to avoid working in the foundry, where they say the demands made upon them were beyond their strength.

Killed In Minnesota. Sangster, Oct. 8.—Farmers are abating through with their potato digging, which is a very good yield. A good deal of fall ploughing is done and grain sown.

Female Disorders.

For the past two years I have been afflicted with female troubles. I had serious bladder disorder; inflammation would set in and I would suffer intensely. Sometimes I could not urinate and the pain was so severe I could not sleep at night. I always had heavy bearing-down back and womb pains. I went to the hospital for three months, paid two visits a week but got no relief. I was advised to try Powley's Liquefied Ozone and before I had finished the first bottle I began to feel better. I have taken in all three bottles and now I am quite well.

MRS. JOHN WAY, 39 Church St., Verdun, Montreal.

There may be a better way of curing female ailments than by Ozone, we don't believe there's a quicker or safer method or one that gives such permanent beneficial results. Powley's Liquefied Ozone is peculiarly adapted for disorders of the mucous membrane. If you try it once you will make use of it regularly.
